1 Garden Reel and Line.	1 Sieve.
2 Crowbars.	2 Baskets.
1 Cesspit Ladle.	1 American Cross-cut Saw.
1 Hay Rake.	1 Hand Cart.

REPORT

UPON THE PRESENT STATE OF THE BUILDINGS USED AS A RESIDENCE BY THE OFFICER ADMINISTERING THE GOVERNMENT OF NATAL WHEN IN THE CITY OF PIETERMARITZBURG, AND THE STATE OF THE FURNITURE, AND ARRANGEMENTS UNDER WHICH IT IS PROVIDED AND MAINTAINED.

During the year 1885 no additions of any importance have been made to the Buildings at Government House. The Buildings have been renovated and repaired throughout, and are now in as good a state of repair as it is possible to place them.

The Buildings are the property of the Colonial Government, and are not well designed or constructed, having been enlarged from time to time as found necessary. The cost of repairs and maintenance is met out of the annual vote for Repairs to Public Buildings, under the direction of the Colonial Engineer. The cost of additions is specially voted by the Legislative Council when required.

A Gardener is paid £100 per annum, with an allowance of £25 per annum for a house, and the Grounds and Garden are kept in order by him with the aid of convict labour.

The Furniture is somewhat limited, and is not of the best description; considerable sums have from time to time been expended in the purchase of modern articles of furniture, but much is still wanting to render the furnishing complete for a Government House.

The Furniture is maintained out of the annual vote of £200, under the direction of the Colonial Engineer; and this vote has also to bear the cost of all necessary additions. Under the head of Furniture are included House Linen, Cutlery, Glass, and Cooking Utensils. The vote for the year 1886 has been reduced to £100.

A. H. HIME,
Colonial Engineer.

EXECUTIVE COUNCIL

AND

LEGISLATIVE COUNCIL,

AS

CONSTITUTED UNDER HER MAJESTY'S LETTERS PATENT,

BEARING DATE JULY 16, 1856, AND DECEMBER 22, 1869, AND ORDERS IN COUNCIL OF

† By Order in Council dated 21st December, 1876, this Officer was substituted for the Protector of Immigrants.

POLITICAL FRANCHISE.

1885.

POLITICAL FRANCHISE.

(Extract from Royal Charter, dated 15th July, 1856.)

§ 11. Every man, except as hereinafter excepted, above the age of twenty-one years, who possesses an immovable property to the value of £50, or who rents any such property of the yearly value of £10, within any Electoral District, and who is duly registered in manner hereafter mentioned, shall be entitled to vote at the election of a member for such district. When any such property as aforesaid is occupied by more persons than one, as proprietors or renters, each of such occupants, being duly registered, shall be entitled to vote in respect of such property, provided the value, or, as the case may be, the rent thereof, be such as would entitle each of such joint occupants to a vote if equally divided among them.

§ 12. Aliens, not having been naturalised by some act of the Imperial Parliament, or of the Legislature of Natal, and persons who shall have been convicted of any treason, felony, or infamous offence, and shall not have received a free pardon, shall not be qualified to vote at such election.

§ 13. No person shall be capable of being elected member of the Legislative Council unless he shall be a duly qualified and registered elector of some electoral district in the Colony, nor unless he shall have been invited to become a candidate for such election by at least ten electors of the county or borough which it is proposed he shall represent; nor unless such requisition shall have been transmitted to the Resident Magistrate of the county or borough, with a notification of the said candidate's acceptance thereof, at least fourteen days before such election is appointed to take place.

(Extract from Law 11, 1865, disqualifying certain Natives from exercising Electoral Franchise.)

1. Every male native, resident in the Colony, or having the necessary property qualification therein, whether subject to the operation of Native Laws, customs, and usages in force in this Colony, or exempted therefrom, save as in this Law is provided, shall be disqualified from becoming a duly registered elector, and shall not be entitled to a vote at the election of a member of the Legislative Council for any electoral district of the Colony of Natal.

2. Any male native inhabitant of this Colony who shall show to the satisfaction of the Lieutenant-Governor that he has been resident in this Colony for a period of twelve years, or that he has been occasionally resident therein equivalent to a twelve year's residence, and who shall possess the requisite property qualification, and shall have been exempted [see Law 28, 1865] from the operation of Native Law for a period of seven years, and who shall produce to the Lieutenant-Governor a certificate signed by three duly qualified electors of European origin as near as may be to the form in Schedule A appended to that Law, and endorsed by a Justice of the Peace or Resident Magistrate of the District in which such native resides, a statement to the effect that the Justice or Resident Magistrate endorsing said certificate has no reason to doubt the truth of said certificate, and the persons signing it are credible persons, shall be entitled to petition the Lieutenant-Governor of Natal for a certificate to entitle him to be registered as a duly qualified elector for that electoral division in the Colony in which such native may possess the requisite property qualification.

3. The Lieutenant-Governor may direct that the application of any such native be published in the *Government Gazette*, and call upon any person having objection to any such native becoming a duly-qualified elector, to submit such objection, in writing, to the Secretary for Native Affairs, for the consideration of the Lieutenant-Governor.

4. The Lieutenant-Governor may make such rules and orders in and about the promulgation of any such application, and receiving, and entertaining, and deciding upon, and objection thereto, as may to him seem necessary.

5. The Lieutenant-Governor may, at his discretion, grant or refuse to any native applying in manner aforesaid for such certificate, entitling him to be registered as a duly-qualified elector; provided always no such certificate shall be granted unless it shall have been published in manner described in Clause 3, at least three months previous to the granting thereof.

6. Every male native who shall have been exempted from the operation of Native Laws, customs, and usages for a period of seven years, and who shall have obtained a certificate from the Lieutenant-Governor, entitling such native to be registered as an elector, and who shall be possessed of the immovable property qualification required by any Law in force for the time being in that behalf, shall be entitled to be duly registered as an elector, and, when registered, shall be entitled to vote at the election of a member of the Legislative Council for such district in which he may possess such property.

7. Every male native to whom such certificate shall have been granted by the Lieutenant-Governor, so long as he may possess the requisite property qualification, and who shall not be convicted of treason, or of any infamous crime, or of any crime which, if committed in England, would be felony, shall, subject to the provisions of Her Majesty's Letters Patent, given at Westminster, the Fifteenth day of July, in the twentieth year of Her Majesty's reign, or any Law in force for the time being in that behalf, be entitled to vote at the election of a member of the Legislative Council for the district in which he may possess such property qualification.

(*Extract from Law No. 2, 1883, "To amend the Franchise."*)

§ 3. Every male inhabitant, of three years' residence in the Colony of Natal, whose income, inclusive of allowances, is equal to £8 per month, or £96 per annum, who may be disqualified as an elector under the Charter of Natal on the sole ground of his not possessing the property or rental qualification required by the eleventh clause of said Charter, may cause himself to be enrolled by the Field Cornet of his Borough or Ward on the list of men qualified to vote for members of the Legislative Council.

§ 4. Every person claiming the franchise under the last preceding section shall deliver to the Field Cornet of the Borough or Ward in which he resides (or other person who may be specially appointed for the purpose) in the month of June in each year in which the franchise may be claimed under this Law an application following as near as may be the form given in the Schedule hereto annexed, and such application shall be signed by the applicant, and shall set out his full name, place of abode, and business or quality, and shall also set out that the applicant is a British subject, or, as the case may be, a naturalised alien, and shall also contain a statement that the applicant has resided in the Colony of Natal

for the period of three years, and in the said Borough or Ward for at least six months out of the previous seven months, and that his income, inclusive of allowances, is equal to £8 per month, or £96 per annum. Any such applicant who shall wilfully make a false statement in the said application shall forfeit One Hundred Pounds, and be for ever disqualified from voting at any election within the Colony.

§ 5. On receipt by the Field Cornet (or other person who may be specially appointed for the purpose) of applications made in terms of this Law, he shall enrol the names of the applicants on the list required by the 38th Section of the said Charter, and shall enter the qualification of each such applicant as that of a lodger.

§ 6. No person belonging to a class which is placed by special legislation under the jurisdiction of special courts, or is subject to special laws and tribunals, shall be entitled to be placed on the Voters' List, or to vote at the election of any member of the Legislative Council: Provided that any such person may be exempted from the operation of this clause by letters of exemption granted to such person by the Governor of the Colony: Provided further, however, that no such letters of exemption shall be granted except upon an application both written in English or Dutch and signed in European characters by the applicant in the presence of a Resident Magistrate, a Justice of the Peace, or other person appointed for this purpose by the Governor, showing to the satisfaction of the Governor that the applicant is a British subject, or a naturalised alien, that he has resided in the Colony for three years, and in the same Borough or Ward for six months out of seven months preceeding the date of application, and that he has not been convicted of any treason, felony, or infamous offence, or that, if convicted, he has received a free pardon: Provided such applicant shall have the qualification required by the Charter of Natal or by the 3rd Section of this Law, and shall, if a Native, have been exempted from the operation of Native Law. If any person shall in such application make any wilfully false statement, such person shall forfeit One Hundred Pounds, and be for ever disqualified as an elector of Natal.

Franchise.	Name of Electoral Division.	Number of Representatives.	Number of Electors Registered in 1885.	Ordinary duration of Sessions and Assemblies, and periods of meeting.	By what acts regulated.	Number of Votes at last General Election.	Date of last General Election.

		Prorogued by Proclamation, dated...	4th October, 1867.
Third Session	Opened by Lieutenant-Governor Keate	18th June, 1868.
		Prorogued by Proclamation, dated...	16th September, 1868.

The Fourth Council was dissolved by Lieutenant-Governor Keate on the 24th October, 1868. The elections for the Fifth Council took place in the months of December, 1868, and January, 1869.

FIFTH COUNCIL.

First Session	Opened by Lieutenant-Governor Keate	6th May, 1869.
		Prorogued by Proclamation, dated...	22nd September, 1869.
Second Session...	...	Opened by Lieutenant-Governor Keate	23rd June, 1870.
		Prorogued by Proclamation, dated...	14th September, 1870.

The Fifth Council was dissolved by Lieutenant-Governor Keate on the 19th September, 1870. The elections for the Sixth Council took place in the months of October and November, 1870.

SIXTH COUNCIL.

First Session	Opened by Lieutenant-Governor Keate	8th December, 1870.
		Prorogued by Proclamation, dated...	...	24th January, 1871.
Second Session...	...	Opened by Lieutenant-Governor Keate	26th July, 1871.
		Prorogued by Proclamation, dated...	...	29th November, 1871.
Third Session	Opened by Lieutenant-Governor Musgrave	5th September, 1872.
		Prorogued by Proclamation, dated...	...	19th December, 1872.

The Sixth Session was dissolved by the Administrator of the Government, Colonel T. Milles, on the 12th July, 1873. The elections for the Seventh Council took place at the latter end of August following.

SEVENTH COUNCIL.

First Session	Opened by Lieutenant-Governor Sir B. C. C. Pine, K.C.M.G.	...	8th October, 1873.
		Prorogued by Proclamation, dated...	...	15th January, 1874.
Second Session...	...	Opened by Lieutenant-Governor, Sir B. C. C. Pine, K.C.M.G.	...	30th July, 1874.
		Prorogued by Proclamation, dated...	...	25th November, 1874.
Third Session	Opened by the Administrator of the Government, Sir G. J. Wolseley, K.C.B., K.C.M.G., &c., &c.	...	5th May, 1875.
		Prorogued by Proclamation, dated...	...	3rd June, 1875.
Fourth Session...	...	Opened by Lieutenant-Governor Sir H. E. Bulwer, K.C.M.G.	...	30th September, 1875.
		Prorogued by Proclamation, dated...	...	17th December, 1875.
Fifth Session	Opened by Lieutenant-Governor Sir H. E. Bulwer, K.C.M.G.	...	26th May, 1876.
		Prorogued by Proclamation, dated...	...	3rd June, 1876.
Sixth Session	Opened by Lieutenant-Governor Sir H. E. Bulwer, K.C.M.G.	...	16th August, 1876.
		Prorogued by Proclamation, dated...	...	11th November, 1876.
Seventh Session	...	Opened by Lieutenant-Governor Sir H. E. Bulwer, K.C.M.G.	...	7th June, 1877.
		Prorogued by Proclamation, dated...	...	17th August, 1877.

The Seventh Council was dissolved by Lieutenant-Governor Sir H. E. Bulwer on the 21st August, 1877. The elections for the Eighth Council took place in the months of October and December, 1877.

EIGHTH COUNCIL.

First Session	Opened by Lieutenant-Governor Sir H. E. Bulwer, K.C.M.G.	27th June, 1878.
		Prorogued by Proclamation, dated...	9th September, 1878.
Second Session...	...	Opened by Lieutenant-Governor Sir H. E. Bulwer, K.C.M.G.	6th November, 1879.
		Prorogued by Proclamation, dated...	19th February, 1880.

The Eighth Council was dissolved by Governor Sir G. Pomeroy-Colley on the 19th day of July, 1880. The elections for the Ninth Council took place in the months of September and October, 1880.

NINTH COUNCIL.

First Session	Opened by Governor Sir G. Pomeroy-Colley, Major-General, K.C.S.I., C.B., C.M.G.	21st October, 1880.
		Prorogued by Proclamation, dated...	22nd December, 1880.
Second Session...	...	Opened by the Administrator of the Government, Major-General Sir H. Evelyn Wood, V.C., K.C.B.	6th October, 1881.
		Prorogued by Proclamation, dated...	14th December, 1881.
Third Session	Opened by the Administrator of the Government, Lieut.-Col. C. B. H. Mitchell, late R.M., C.M.G.	23rd February, 1882.
		Prorogued by Proclamation, dated...	2nd March, 1882.

The Ninth Council was dissolved by Governor Sir H. E. Bulwer, on the 10th day of March, 1882. The elections for the Tenth Council took place in the month of May, 1882.

TENTH COUNCIL.

First Session	Opened by Governor Sir H. E. Bulwer, K.C.M.G.	7th June, 1882.
		Prorogued by Proclamation, dated...	25th August, 1882.

The Tenth Council was dissolved by Governor Sir H. E. Bulwer on the 2nd day of April, 1883. The elections for the Eleventh Council took place in the month of May, 1883.

ELEVENTH COUNCIL.

First Session	Opened by Governor Sir H. E. Bulwer, G.C.M.G.	5th July, 1883.
		Prorogued by Proclamation, dated...	24th October, 1883.
Second Session...	...	Opened by Governor Sir H. E. Bulwer, G.C.M.G.	12th June, 1884.
		Prorogued by Proclamation, dated...	26th September, 1884.
Third Session	Opened by Governor Sir H. E. Bulwer, G.C.M.G.	18th June, 1885.
		Prorogued by Proclamation, dated...	24th September, 1885.

BONDING WAREHOUSE CHARGE.

Under Section 10 of Laws Nos. 18, 1866, and 1 of 1867, there is leviable upon any Home consumption entry, in addition to the Customs Duties payable thereon, a further charge of two and a half per cent. upon the total amount of duty on the goods specified in said entry.

ARTICLES PROHIBITED TO BE IMPORTED.

Books, Drawings, Paintings, Prints and Photographs of an immoral or indecent character, Coin, base or counterfeit.

Taxes, &c.

II.—QUEEN'S WAREHOUSE RENT.

The Tariff of Rent, per week, of Goods deposited in the Queen's Warehouse is levied in terms of the 38th Section of Ordinance No. 6, 1855, and Government Notice No. 86 of July 21, 1856, and will be found in the Natal Blue Book for 1882, at page O 5.

III.—WHARFAGE DUES.

These Dues are payable under authority of Laws Nos. 12, 1875, 21 of 1880, and 3 of 1881. The Schedule and Exemptions will be found in the Natal Blue Book for 1882, at page O 5, with the following additions however:—After the word "Wool" (in par 1 of the Schedule), read "and Angora Hair."

IV.—STEAM TUG FUND.

By Law 2, 1871, passed for the purpose of raising funds to repay the Steam-tug Loan, re-enacted by Laws No. 10, 1875, and 2, 1881, it is enacted that, on every Bill of Entry, provided for by Sections 32 and 39, Ordinance 6, 1855, for goods imported, or to be delivered from Crown or Bonding Warehouses, and upon which import duties shall be due and payable, there shall be charged and paid on the total amount of the import duties set forth in such entry, a further sum of threepence for every pound and portion of a pound sterling of such total amount of duties; and on every Bill of Entry for goods imported free of duty, on which registration charges shall be due or payable, there shall be paid, in addition to the fees and charges set forth in Law 1 of 1867, Schedule C, fees and charges at and after the rates set forth in the Schedule published in the Natal Blue Book for 1882, at page O 6.

V.—PORT DUES.

The Port Dues levied under authority of the Regulations of the Port and Harbour of Natal, approved by the Administrator of the Government in Council, under Law 29, 1880, will be found in the Natal Blue Book for 1882, at pages O 6-8. The following alterations should, however, be noted:—For "Consignee" (on page O 7) read "Consignees"; for "Goods which are liable under Regulation No. 60" (on page O 8) read "Goods which are liable under Port and Harbour Regulation No. 58;" and for "Surveys by hatches and report 4s." (on the latter page) read "Surveys of hatches and report £1 1s. 0d."

VI.—EXCISE DUTIES AND CHARGES.

DUTIES.

Under Law No. 16, 1884, the following duty is levied upon rum or other spirits distilled in the Colony, viz. :—

Spirits for consumption within the Colony a duty of Four Shillings and Sixpence Sterling per proof gallon as denoted by Syke's Hydrometer.

Taxes, &c.

VI.—EXCISE DUTIES AND CHARGES (*Continued*).

Provided that upon Spirits distilled by the owner or occupier of any land from fruit of any description being the *bona fide* produce of such land, there shall be paid instead a duty at the rate of Ten Shillings for every gallon of the working capacity of the still so used for each and every month or portion of a month that such still shall be in operation; such duty to be paid by said owner or occupier before commencing to distil.

Spirits for removal overland beyond the boundaries of the Colony, a duty of Sixpence Sterling per each liquid gallon.

Provided that before the removal of such Spirits from Warehouse the exporter thereof enters into a Bond with one or more sureties for an amount equal to three times the duty for colonial consumption that the said spirits shall be duly exported out of the Colony or be otherwise accounted for to the satisfaction of the Controller of Excise.

CHARGES.

The undermentioned tariff of charges, deemed as Excise Revenue, is levied at the Public Warehouses appointed under Law No. 14, 1868, viz. :—

Under Government Notice No. 258 of 1881, on the removal from Warehouse of Spirits contained in—

Casks or Vessels of the capacity of 15 gallons and under	2d. per week.
„ „ of quarter capacity than 15 and under 54 gallons	4d. „
„ „ of the capacity of 54 gallons and upwards	6d. „

Broken periods to be charged as one week, and one week's rent to be charged for receipt and delivery.

Under Government Notice No. 200 of 1868, for vessels into which spirits are run off while in a Public Warehouse :—

Flasks or bottles of the capacity of 1 quart and under, per dozen	...	1d. per week.
Casks, kegs, or vessels of the capacity of 1 quart and not exceeding 5 gallons	$\frac{1}{2}$ d.	„

Every fraction of a dozen to be charged as a dozen.

Broken periods to be charged as one week, and one week's rent to be charged for delivery.

VIII.—LAND REVENUE.

By Proclamation of October 16th, 1880, the Rules and Regulations for the disposal of the Crown Lands in this Colony were proclaimed. These Rules and Regulations will be found in the Natal Blue Book for 1880.

IX. TRANSFER DUTIES.

(Under Law No. 5, 1860.)

	£	s.	d.
On any Sale or Exchange of Landed Property per cent.	4	0	0

By Law No. 10, 1863, two per cent. is payable on one-third of the rent of the term of all Leases of Landed property.

By Law 7, 1864, four per cent. is payable on the purchase amount of a Lease, in addition to the foregoing.

X. POSTAL REVENUE.

TABLE OF RATES OF POSTAGE

FROM NATAL TO THE UNDERMENTIONED PLACES THROUGH THE UNITED KINGDOM, WHERE NOT OTHERWISE EXPRESSED, WITH THE LOCAL AND OTHER COLONIAL RATES.

ITALICS—1. Letters cannot be sent unpaid to the Countries the names of which are printed in *Italics*.

(a) 2. No Letter or other Article can be registered to the Countries marked (a); to all other Countries any Article may be registered. The Registration Fee is 4d. in all cases.

† 3. No Book Packet, or Packet of Newspapers addressed to the Countries marked (†) may exceed 4 lbs. in weight; and the weight of a Packet of Patterns for these Countries is limited to 8 ounces. The weight of a Book Packet, or Packet of Patterns, addressed to New South Wales or Queensland, is limited to 3 lbs. In all other cases the weight of a Packet is limited to 5 lbs. The size of a Packet of Patterns addressed to any of the Countries marked (†) is limited to 8 inches in length, 4 inches in width, and 2 inches in depth.

4. In addition to all kinds of printed, engraved, or lithographed matter, legal and commercial documents and music in manuscript may be sent as a Book Packet. Proofs of printing, or of music, may bear corrections with a pen, and may have manuscript annexed to them. Circulars, &c., may bear the signature of the sender, his trade or profession, place of residence, and a date. A Book may have dedication or complimentary inscription in manuscript, and printed or lithographed stock or share lists, prices current, and market reports, may have the prices added in writing.

Taxes, &c.

X.—POSTAL REVENUE (*continued*).

Post Cards, issued by the Postal Department, bearing impressed half-penny stamps, may be transmitted between places within the Colony with letters printed or written upon the back. And, similarly, Post Cards bearing impressed penny stamps may be sent from Natal to the Cape Colony, the Orange Free State, or the Transvaal.

Parcels not exceeding 7 lbs. in weight, or 2 feet in length, or 1 foot in width or depth, may be forwarded by post from one place to another within Natal, or from Natal to any place in the Cape Colony, the Orange Free State, or Transvaal, the charge on any parcel being at the rate of 3d. for every four ounces or a fractional part thereof.

PRIVATE LETTER BOXES AND BAGS.

PRIVATE LETTER BOXES.

The Yearly Fee is £1 1s. 0d., payable in advance, the year to be taken from the 1st January to the 31st December.

PRIVATE ROADSIDE BAGS.

The Fee by Private Roadside Bags, which will be levied according to the following scale, must be paid yearly in advance, the year being taken as from the 1st January to 31st December:—

<i>Delivered Once a Week.</i>				<i>Delivered Twice a Week.</i>			
		£	s. d.			£	s. d.
One or two persons	1 1 0	One or two persons	1 1 0
More than two persons	2 2 0	Two persons	1 11 6
				More than two	2 2 0
<i>Delivered oftener than Twice a Week.</i>							
		£	s. d.			£	s. d.
One person	1 11 6	Two or more persons	2 2 0

Unexpired portions of a year are charged for at the rate of one-twelfth of the Yearly Fee for each month, or portion of a month.

SOLDIERS' AND SEAMEN'S LETTERS.

Soldiers' and Seamen's Letters, not exceeding half-an-ounce in weight, are chargeable with 1d., when posted for delivery in the United Kingdom, Cape Colony, or other British possessions; but if any such letters have to pass through a foreign country, they are subject, in addition, to the foreign postage, whatever that may be.

Taxes, &c.

X. POSTAL REVENUE (*continued.*)

POST OFFICE MONEY ORDER DEPARTMENT.

INLAND.—Money Orders are issued at the Post Offices of Pietermaritzburg, Durban, Ladysmith, Newcastle, Greytown, Estcourt, Harding, Ixopo, Richmond, Umzinto, Verulam, Stanger, Umsinga, and Dundee upon each other, at the following rates, fixed by Law No. 22, 1884:—

							s.	d.
For any sum not exceeding £1	0	3
„ exceeding £1 and not exceeding £2	0	6
„ „ £2 „ £3	0	9
„ „ £3 „ £4	1	0
„ „ £5 „ £10	1	6

Money Orders can be obtained at the Post Offices at Pietermaritzburg, Durban, and Newcastle upon any Money Order Office in the United Kingdom, Cape Colony, Mauritius, or St. Helena, for sums not exceeding £10, at the following rates, viz. :—

<i>Cape Colony, St. Helena, and Mauritius.</i>				<i>United Kingdom.</i>			
			s. d.				s. d.
Not exceeding £2	0 9	Not exceeding £2	0 6
£2 and not exceeding £5	1 6	£2 but not exceeding £5	1 0
£5 „ £7	2 3	£5 „ £7	1 6
£7 „ £10	3 0	£7 „ £10	2 0

Money Orders are also issued at Pietermaritzburg, Durban, and Newcastle, upon most foreign countries, the rate being the same as that chargeable to the United Kingdom. But a further rate is afterwards levied by the British Post Office, and deducted from the amount of any Order, as follows :—

							s.	d.
For sums not exceeding £2	0	3
„ exceeding £2, and not exceeding £5	0	6
„ „ £5 „ £7	0	9
„ „ £7 „ £10	1	0

XI.—TELEGRAPHS.

The following is the authorised tariff of charges for the transmission of telegrams :—

Ordinary Messages.

NATAL, CAPE COLONY, OR ORANGE FREE STATE.

Ten words, 1s. Every additional five, or fraction, 6d.

*Taxes, &c*XI.—TELEGRAPHS (*continued*).

TRANSVAAL.

Ten words, 2s. Every additional five, or fraction, 1s.

Cipher or Code Messages are charged at the rate of fifty per cent. in excess of the “ordinary” rates; Press Messages at a rate of one-fourth the “ordinary” rates, the minimum charge for any Press Message being 1s.

Ocean telegrams are transmitted at a charge of 2d. per word, such amount being in addition to the published rates of the other administrations or companies over whose lines the telegrams pass.

The following are the rates to England:

Via Madeira - 1s. 10d. per word, and 6d. postage, in addition to an Agent's charge of 4s. for the first 20 words, and 1s. for every additional 10, or fraction of 10, words.

Via Durban and Aden - 8s. 11d. per word.

XII.—DIRECT TAXES.

COURTS OF RESIDENT MAGISTRATES.—The tariff of fees chargeable by the Messengers of the Courts of the Resident Magistrates and leviable under Ordinance No. 16, 1846, will be found in the Natal Blue Book for 1882, at page O 29.

Taxes, &c

XIV.—FEES IN OFFICE (*continued*).

COURT OF THE PROTECTOR OF INDIAN IMMIGRANTS.—By Government Notice No 85, 1873, the scale of fees to be taken in the Courts held by the Protector of Indian Immigrants was laid down as follows :—

	£	s.	d.
In civil cases between Indian Immigrants, where the amount sued for is			
£5 or less	0	5	0
More than £5, not exceeding £10	0	10	0
„ £10, „ £15	0	15	0

And thereafter at the rate of one shilling in the £.

Where the claim is for property other than money, the fee shall be fixed on the above scale according to the estimated value of the property or thing claimed—such value to be fixed after such inquiry as may be necessary by the Protector of Indian Immigrants.

XV.—MARKET DUES.

Under authority of Ordinance No. 8, 1847, dues are leviable at markets established at any place not being a municipality at the following rates :—

Sellers, where produce does not exceed £20	2 per cent.
„ „ amounts to £20 or upwards	1 „

XVI.—TOLLS.

By Law No. 18, 1872, a proviso is made with respect to the Toll at the Berea, that, on payment by the Government of a sum to be agreed upon, not exceeding £10,000, to the Town Council of the Borough of Durban, the power and authority for the levy and collection of the Toll shall vest in and be exercised by the Colonial Government. The Government has not yet taken any steps to acquire this right.

The Tariff of Tolls leviable at the Tugela Bridge, Colenso, will be found in the Natal Blue Book for 1882, at page O 31.

The Tariff of Tolls leviable at the Sunday's River, Incandu, and Klip River Bridges, will be found in the Natal Blue Book for 1883, at pages O 10 and 11.

XVII.—FINES.

Fines are levied according to circumstances, after condemnation of the parties by a competent Court. They are either fixed by Law for particular offences, or left to the discretion of the Judge or Magistrate before whom the parties are tried.

XVIII.—REIMBURSEMENTS IN AID OF EXPENSES INCURRED BY GOVERNMENT AND SUMS REFUNDED AND SURCHARGES RECOVERED.

It is impossible to state the nature of the receipts which are ordinarily brought to account under this head, since they depend for the most part upon circumstances and contingencies not to be foreseen ; moneys received on account of the keep of lunatics and maintenance of military prisoners are classified under this head.

Taxes, &c.

XIX.—PROCEEDS OF SALE OF GOVERNMENT PROPERTY.

The proceeds under this head are, of course, variable, and cannot be defined with any degree of exactness, but generally arise from the sale of presents from Native Chiefs, school-books, stationery, and such sales of other Government property as cannot be classified under other heads of revenue.

XX.—SALE OF AMMUNITION.

The receipts under this head are the proceeds of the sale of Ammunition, which by Laws Nos. 12 of 1862, and 6, of 1876, is placed under the control of the Colonial Government.

XXI.—MISCELLANEOUS RECEIPTS.

Under this head are classified several minor receipts, among which are comprised the following:—

1. SURVEY FEES.—These consist of sums paid by purchasers of Crown Lands for the survey of such lands when performed by the Surveyor-General.
2. SCHOOL FEES.—For tuition at the Government Schools:—
 High Schools, Pietermaritzburg and Durban, 15s. a month for each pupil.
 Primary Schools, Pietermaritzburg and Durban, 1s. and 5s. a month—according to advancement.
3. POUND SALES.
4. REGISTRATION OF FIREARMS.
5. FINES INFLICTED UNDER THE SCAB LAW.
6. RENTS OF GOVERNMENT BUILDINGS.

XXII.—PATENTS.

The tariff of charges leviable under authority of Law 4, 1870, will be found in the Natal Blue Book for 1882, at page O 32.

XXIII.—NATAL GOVERNMENT RAILWAYS.

The rates for the conveyance of Passenger, Parcel, Horse, Carriage, Dog, &c., traffic will be found in the Natal Blue Book for 1882, at pages O 33-47, with the following alterations, however: For "Hides and skins, loose, 54 per cent. additional" (on page O 41) read, "Hides and skins, loose, 50 per cent. additional" and for "Ditto, minimum charge, 2s. ton" (on page O 44) read "Ditto, minimum charge, 2s. *per* ton."

FEES OF OFFICE (PERSONAL)

SUPREME COURT.

Table of Fees allowed to be taken by the Sheriff under Ordinance 32, 1846, and Rules of Court, dated respectively 4th May, 1869, and 13th April, 1876.

				£	s.	d.
Registering summons, or other process				0 1 0
Service in any town or village				0 2 0
By Rule of Court, dated May 4, 1869.	{	Service out of the City, and within one hour's distance		0 4 6
		Service at a greater distance, per day		0 7 6
		Horsehire out of the City, and within one hour's distance		0 3 6
		Horsehire at a greater distance, per day		0 7 6
By Rule of Court, dated 13th April, 1876.	{	Service of process out of any town other than the City, and within one-and-a-half hour's distance from any such town				0 10 6
		When at a further hour's distance, or any fraction thereof, an additional				0 7 0
		When at a place exceeding two-and-a-half hours' distance, per day				1 5 0
		[All computations of fees based on time and distance to be computed and taken as though the process served were dated and issued from the seat of that Magistracy which (notwithstanding its location as to county or division) shall happen to be the nearest in time to the particular place of service.]				
		Postage (if papers be transmitted), per charge.				
		Taking inventory, not exceeding in length 100 words				0 3 0
		" " exceeding " " per folio				0 3 0
In respect of process of execution, on the amount directed to be levied.	{	Where process shall be withdrawn before any levy made, at the rate of 1 per cent.				
		After levy made, but before sale, at the rate of 2½ per cent.				
		Where sale made, at the rate of, the first £100, 5 per cent.				
		For every following £100, 4 per cent.				
Keeping possession of property on the premises per diem				0 7 6
If removed from the premises and placed in the hands of the Sheriff's broker, who is responsible to him, the broker to be paid ordinary store-hire or warehouse-room, and necessary expenses of removal in addition.						

Fees, &c.

FEES OF OFFICE (*continued*).

	£	s.	d.
Executing any writ of arrest	1	0	0
Drawing and executing bail-bond	0	10	0
Executing any writ of ejectment	1	0	0
Executing an attachment upon immovable property	1	1	0
Notice to the Registrar of Deeds of the attachment of immovable property	0	5	0
Drawing and copy of advertisement	0	3	4
Expense of advertising (amount paid for same).			
Stamps in addition, when required by law to be used.			
Necessary charges (not particularly specified, and incurred in the execution of process), subject to taxation by the Master of the Supreme Court.			

VICE-ADMIRALTY COURT.

The Tables of Fees to be taken by the Judge, Registrar, Marshal, Advocates, and Proctors of the Vice-Admiralty Court in Natal, in pursuance of Her Majesty's Order in Council of the 23rd day of November, 1860, are published in the Natal Blue Book for 1880.

LAND SURVEYORS.

The Tariff of Charges allowed to Government Surveyors for the Survey and Measurement of Land within the Colony of Natal, is published under Government Notice No. 124, of 28th October, 1861, and will be found in the Natal Blue Book for 1880, at Page P 15.

RESIDENT MAGISTRATES.

Courts of Resident Magistrates, other than those of Pietermaritzburg and Durban. The Tariff of Fees chargeable by the Messengers of the Courts of the Resident Magistrates is fixed by Ordinance No. 16, 1846, and will be found in the Natal Blue Book for 1882, at Page P 3.

Under Section 43 of Law No. 11, 1862, there is payable by the person registering Firearms a fee of 6d. for every Firearm so registered. This fee is paid into the General Revenue by the Officer registering the Firearm.

Fees, &c.

FEEES OF OFFICE (*continued.*)

COURT OF PROTECTOR OF INDIAN IMMIGRANTS.

The following fees are allowed to Messengers for serving summonses, under authority of Government Notice No. 85, dated 8th April, 1873 : --

EDUCATIONAL RETURNS.

1885.

REPORT

OF THE

SUPERINTENDING INSPECTOR OF SCHOOLS

FOR

1885.

Fifty-one schools have been under inspection during 1885. Two—Thornville and South Shepstone—were given up in the course of the year, and two—the Y.M.C.A. Night School in Maritzburg, and the Night School at Wilge Fontein—received aid only for the second quarter of the year. The cause of the failure of the first two is given in the Inspection Notes on the schools; the third could not secure the services of a qualified master; and the fourth could not obtain a sufficient number of pupils. Eleven are Government Schools—2 High, 4 Model Primary, and 5 Primary. The other 40 receive aid from the Council of Education in accordance with the Primary Education Law of 1877.

The aggregate number of pupils in regular attendance is 3,922—2,244 boys and 1,678 girls—and the number presented for inspection is 3,747. In 1884 the numbers were 3,930 and 3,533 respectively—a decrease in the present year of 8 in the number in regular attendance and an increase of 214 in the number presented for inspection.

The attendance at the Government Schools is 2,216, and at the Aided Schools 1,706.

The average daily attendance for the year is 83 per cent. of the *working* number on the registers—slightly higher than last year's, but about 1 per cent. lower than that of 1883. This satisfactory percentage is due in some measure to the grant of 4s. given to the teacher for every child who attends school for not fewer than 175 days in the course of the year. This grant amounts to £394, and was paid on account of 1,970 children. In 1884 the corresponding number was 1,785.

The average number of pupils who have received free education is 607—15·5 per cent. of the number in attendance. The proportions in 1884 and 1883 were respectively 12·6 and 9 per cent.

The ages of the pupils vary from 3 to 20 years. 1,755 are under 8 years; 1,503 between 8 and 12; 580 between 12 and 16; and 84 over 16.

In addition to the 3,922 children being educated under Government supervision, there are probably about 650 in attendance at private schools, about 700 under instruction from tutors and governesses, and about 200 without tuition of any kind. The means of education is within reach of most of these 200, but probably nothing but a compulsory clause would make them take advantage of it.

The following Table gives some statistics of the schools which have been maintained by, or have received aid from, Government during the whole or any part of 1885. The second column shows the number enrolled at these schools in 1875. The ordinary attendance then was about 28 per cent. less:—

b. There were 26 other Aided Schools in or near the two towns, with an aggregate attendance of 940 pupils. Most of these Schools were given up when the Education Laws came into force, and their pupils joined the other Schools, chiefly the Model Primary Schools.

The work of the schools is tested by (1) The University of Cambridge Local Examinations ; (2) an annual examination of the High Schools by examiners appointed by the Council of Education ; (3) a yearly written collective examination of the most advanced pupils of schools in and near the two Towns, and (4) an individual examination and a classification into Standards of all the pupils of the Government Model Primary, the Primary, and the Aided Schools.

Payment for results depends on the last only, and it is not made unless the school is throughout in a satisfactory condition. These capitation grants are paid over and above the fixed salaries and the fixed grants, and they go solely to the teachers as a reward for, and an incentive to, good work. This annual inspection secures due attention to junior and senior pupils alike. Special opportunities are given to senior pupils by the Annual Collective Examination and by the Junior and Senior Cambridge Locals.

Every teacher has a copy of the requirements for a "Pass" in any of the seven Standards, and he was furnished in the beginning of the year with a copy of the following Resolution of the Council of Education :—

- (1.) In 1885 Grants for Attendance at Primary Schools will be made at the rate of 4s. for each child who, during the course of the year, attends the School to which the Grant is payable, for not fewer than 175 days of not less than $4\frac{1}{2}$ hours school-work each.
- (2.) In 1885 Grants for Educational results in Primary Schools will be 5s. for each separate pass in English, Writing and Arithmetic, as detailed in the revised Schedule of Standards issued on 5th November, 1881.
- (3.) No payment for results will be made in respect of any child who has not advanced at least one standard since the last annual inspection of the School, or of any child over 12 years of age who passes lower than Standard III.
- (4.) No payment for results will be made in respect of any child who has not attended the School in which it is examined for at least three months immediately before the date of inspection.
- (5.) Payments for results will not be made to any school which the Inspector considers unsatisfactory in its general discipline and organisation, or in its work in subjects other than those for which Capitation Grants are payable.
- (6.) Infant Schools or Infant Departments of Primary Schools will receive a Capitation Grant at the rate of 5s. for each child below Standard I. who has attended the school regularly for not less than three months immediately before the Examination, provided that the number of such children be not fewer than 20, and that the Inspector is satisfied that Kindergarten or similar instruction is regularly and efficiently given, and that object-lessons, singing, and calisthenic exercises form part of the daily work.
- (7.) The subjects for the Annual Collective Examination in November, 1885, for Government Certificates of Proficiency in Elementary Subjects or Instruction will be as follow :—

Handwriting.

Spelling from Dictation.

Arithmetic.

English Composition.

English Grammar, including Analysis of Sentences and Etymology.

Geography of Asia and Africa, including Map Drawing from Memory.

Freehand Drawing.

English History from the earliest period to 1399.

Rome : Macmillan's Primer.

Physiology : Macmillan's Primer.

- (8.) The examination for Bursaries will be the same as that prescribed in paragraph (7), with the omission of Roman History and Physiology.

The following Standards have been in use since January, 1882. Reference to this schedule will make clear the results set forth in the Tables which follow it :—

STANDARDS OF EXAMINATION.

Stand.	ENGLISH.	WRITING.	ARITHMETIC.
I.	Read from Standard I. Reading Book. Learn by heart 20 lines of simple verse, and know their meaning.	Write 10 easy words from dictation. Show Copy Books (large hand).	Notation and Numeration up to 1,000. Simple Addition and Subtraction. Multiplication Table up to 6 times 12.
II.	Read from Standard II. Reading Book. Learn by heart 40 lines of poetry, and know their meaning. Point out nouns and verbs. Geographical terms simply explained. Point out continents and oceans.	Write 3 lines dictated from Standard Reader. Show Copy Books (large and half-text).	Notation and Numeration up to 100,000. The four Simple Rules. Multiplication Table. Pence Table to £1.
III.	Read from Standard III. Reading Book, or stories from English History. Recite with intelligence and expression 60 lines of poetry. Point out nouns, verbs, adjectives, adverbs, and personal pronouns, and form simple sentences containing them. Chief countries, towns, and physical features of the continents.	Write 6 lines dictated from Standard Reader. Show Copy Books (capitals and figures, large and small hand).	The former rules with Long Division. Addition, Subtraction, and Multiplication of Money.
IV.	Read from Standard IV. Reading Book or History of England. Recite 80 lines of poetry, and explain the words and allusions. Parse simple sentences, and illustrate the use of the parts of speech. Detailed physical and political geography.	Write to dictation passage from Reader. Show Copy Books (improved small hand).	Division of Money, and Reduction of Money and of Weights and Measures.
V.	Read from Stand. V. Reading Book, or some standard author. Recite 100 lines from some standard poet, and explain the words and allusions. Analyse and parse simple sentences. Prefixes, affixes, and common Latin roots. More detailed physical and political geography, Natal and South Africa particularly. Latitude and Longitude. Day and night. The seasons.	Write from memory the substance of a short story read out twice; spelling, handwriting, and correct expression to be considered. Show Copy Books and Exercise Books (improved small hand).	Practice, Bills of Parcels, and Rule of Three by the method of unity. Addition and Subtraction of Proper Fractions with denominators not exceeding 20.
VI.	Read from Stand. VI. Reading Book, or some standard author. Recite 150 lines from Shakespeare or Milton, and explain the words and allusions. Analyse and parse complex sentences. Prefixes, affixes, and Latin roots. More detailed physical and political geography. Manufactures and commerce. Circumstances which determine climate.	A short exercise in composition. Passage dictated from newspaper. Show Copy Books and Exercise Books (improved small hand.)	Vulgar and Decimal Fractions, Proportion, and Simple Interest.
VII.	Read a passage from Shakespeare or Milton. Recite 200 lines from Shakespeare or Milton, and explain the words and allusions. Analyse and parse sentences, and know derivation of ordinary English words. The Ocean. Currents and tides. Planetary system. Phases of the moon.	More difficult exercises in composition. Show note books and exercise book.	Higher Arithmetic, with Mensuration of Parallelograms, Right-Angled Triangles, and Circles.

Reading with intelligence will be required in all the Standards, and increased fluency and expression in successive years. Questions will be put on the meaning of what is read. The Dictation and Arithmetic of Standard III. and upwards may, at the discretion of the Inspector, be on slates or paper. The work of girls in Arithmetic will be judged more leniently than that of boys. Mental Arithmetic suitable to the respective Standards will be given. Pupils need not pass in the same Standard in the different subjects.

b. Includes Infant Grant.

c. Only half-year.

The degree of general proficiency set forth in this Table is quite satisfactory, and it is probably as high as we can hope to attain for several years to come. The number of children examined—3,747—is 214 more than in 1884 and 1,219 more than in 1880. In England the number of children passing in the Upper Standards has more than doubled in the last five years. In Natal we are equally fortunate. Standard V. and upwards number 846 passes in 1880, and 1,756 in 1885. Of the 861 passes for which no payment is given, 423 were made by pupils who had not been three months at school at the time of inspection, and 170 were made in Standards below III. by pupils of twelve years of age or over. The remaining 268 represent 132 children who have not made sufficient progress during the year in one or more of the three subjects for which a grant is given.

THE MODEL PRIMARY SCHOOLS

continue to be conducted in a thoroughly efficient manner. The number of pupils steadily rises; the organization is the best possible; strict discipline is maintained without severity; a healthy tone exists among the teachers and between teachers and pupils; and the progress and proficiency of the children in Standard and other work are worthy of all praise. The increasing number of passes in higher Arithmetic and in Grammar gives evidence to outsiders of the absence of mere routine in the preparation and examination of lessons. The Kindergarten work and the Sewing in both Girls' Schools merit high commendation. The teachers have made these schools what they are, and the thanks of the Colony are due to Miss Broome, Miss Day, Mr. Richmond, and Mr. Crowe, for the high character of the Primary Education they have succeeded in establishing in our midst. Several teachers who have been trained, or who have taught for some time, in these schools are now engaged in similar successful work in other centres of population.

WESLEYAN INFANT SCHOOL, MARITZBURG.

Miss Dickens, an English-trained teacher, has considerably improved this school since she took charge of it over two years ago. The passes are higher and more numerous than those of last year, and still higher and more numerous than they were ten years ago, although the attendance then reached 101. The organization and discipline are good.

ST. ANDREW'S SCHOOL, MARITZBURG,

has been in existence for 17 years, and has had during that period an average attendance of 30 pupils. The children are all young, and only now and again does any pupil reach Standard IV.

ST. MARY'S SCHOOL, MARITZBURG.

During the year the attendance has risen from 99 to 123. The average proficiency of the pupils is gradually advancing, but there is still room for improvement, especially in Arithmetic and Writing. Twelve of the most advanced girls failed in one or other of these subjects, and three failed in both. Grammar is weak. The Infant Department is quite satisfactory.

ARCHBELL'S SCHOOL, MARITZBURG,

continues to maintain the high position it has held as an Aided School for the last 15 years. The attendance averages 50, and only four pupils are lower than Standard I. The Arithmetic is this year rather weak, but the passes on the whole reach last year's good average. Ten years ago the attendance was 35, and IV. was the highest pass in Reading and Arithmetic.

VLEI INFANT SCHOOL, MARITZBURG.

Ten years ago the average attendance was 20 : this year it is 32, although the Girls' Model School is now within easy reach. The little ones look perfectly happy as they go through their numerous exercises under the kindly sway of the scholastic veteran—Miss Buchanan.

KELLY'S EVENING SCHOOL, MARITZBURG,

has an average attendance of 40 pupils. The ages range from 10 to 20 years and all are at work during the day. More than half are free pupils : the others pay from 2s. 6d. to 5s. a month. The attendance is far from regular, but the proficiency of those who attend for an average of four nights a week is quite satisfactory. Nothing beyond the three Rs. is attempted. The Master's income for the year was £118 1s. 6d., of which Government contributed £94 13s.

THE GOVERNMENT PRIMARY SCHOOL, RICHMOND,

was opened in the beginning of the year. The building is similar to those at Newcastle, Ladysmith, Verulam, and Greytown, and contains accommodation for about 100 pupils and 20 boarders. Mr. Hedgcock, who had been in charge of the Aided School for two years, was appointed Head Master. His sister, an English-experienced teacher, has helped him as Assistant since the 1st August. Fifty children were present at the annual inspection. Standards 1, 2, and 3 are under average, and Standard 4 is weak in Grammar. The work of the upper standards is quite satisfactory. There are only four boarders. Before the school was built a petition from the residents stated that the parents of a very large number of children in the district were eager to secure the advantages of a good Boarding School.

CAMPERDOWN SCHOOL.

Mr. De Verneuil left in August, and Mr. R. A. Wood, from New Leeds School, took his place. The attendance has risen from 40 to 59, but the passes are still under average. Mr. Wood has begun well, and he will be able to show a more satisfactory state of things at next inspection if he can improve the regularity of the attendance. The high per centage of non-paying passes—32 out of 88—is due mainly to pupils over 12 passing lower than Standard III.

YORK SCHOOL.

Mr. John Muirhead has succeeded in making this school one of the best in the Colony. He is a trained teacher, and he takes a pride in his work. All the children—45—in the district are in attendance. The junior classes—Standards I. to III.—need a little more attention, but the results shown in the upper standards are worthy of all praise. Arithmetic and Grammar—subjects which best reflect the teacher's skill—are exceptionally good. Nine passed in the highest standard in Arithmetic, eight in English, and six in Writing. Five years ago the attendance was 23, and no child passed in Arithmetic higher than V. Part-singing is a special feature in the school-work. The teacher's income consisted of £82 5s. collected as school fees, and £104 6s. contributed by Government.

NEW HANOVER SCHOOL.

The opening of a branch school at Noodsberg Road in the beginning of 1883 slightly lowered the attendance at New Hanover School, but it did not affect the high character which the school has acquired under Mr. Schmidt's guidance. The children in the higher standards read English with fluency and expression ; their intelligent understanding of English Grammar and Analysis and higher Arithmetic is far from common ; and their minute acquaintance with geography is only such as is found in good German schools of a similar grade. The children professed a knowledge of the general Geography of the World. I tested them by giving a collective lesson on the New England States and the Basin of the

St. Lawrence. It was a most agreeable surprise to notice the readiness with which about 30 of the 51 children present answered questions which would have produced only a vacant stare from the pupils of not a few of our English-speaking schools. Although some of the children walk to and from school more than 12 miles every day, absence, except from sickness, is almost unknown. There are no school fees, but the parents guarantee £45 a year to the Master. In 1885 the Government aid amounted to £131 5s.

NOODSBERG ROAD SCHOOL.

This school, like that at New Hanover, is attended by German children only. It is an off-shoot from the latter, and it was begun in 1883 with 34 pupils. Since then the attendance and proficiency have steadily improved. Forty children were present at the annual inspection. All passed in Writing, and 30 read in English and answered questions set in Standards I. to V. Mr. Mummbrauer, the Master, deserves a word of encouragement for the methodical way in which all the work is conducted. No fees are charged, but a sum of £40 is annually collected for the Master. The Government aid during 1885 amounted to £76 2s.

NEW LEEDS SCHOOL

keeps up its high average of upper standard passes, although the attendance has fallen during the year from 44 to 27. Several families have temporarily left the district, and a change of Masters has taken place twice during the past 18 months.

THORNVILLE SCHOOL

near Maritzburg, has had an existence of only six months. No school had been held since 1875, when, owing to paucity of numbers, the attempt to establish one had to be given up after one year's trial. Twenty-three children were enrolled in the beginning of the year, but the average attendance reached only 15. Those who lived at a distance of a mile or more from the school gradually ceased to attend, and the Master found more remunerative employment as a private tutor.

HOWICK SCHOOL

has improved much under Mr. Fleming's mastership. Within two years the attendance has risen from 35 to 54, and the progress and proficiency of the pupils are quite satisfactory. There were only four failures at the inspection—3 in Writing and 1 in Arithmetic. The grant for passes is £12 more than it was in 1884.

DEEPDALE SCHOOL

is on the Upper Umkomaas—about 40 miles west of Maritzburg. It was begun 12 years ago, and it is attended chiefly by the children of the owners of the yellow-wood forests in the neighbourhood. The Master—Mr. A. H. Jennings—has been in charge since September, 1884. The attendance averages 20—16 whites and 4 half-castes. Until recently the whites came to school only in the forenoon, and the coloured children only in the afternoon. Mr. Jennings is a St. Mark's College man, and the results of his training are apparent in the work of his pupils and the tone of his school. The children are not advanced, but what they do know they know thoroughly. Only 3 of the 20 present at the inspection have been at school for more than 12 months. The fees are from 5s. to 10s. a month, and the amount collected during the year is £58 10s. This and the Government grant of £51 9s. form the teacher's income.

WILGE FONTEIN SCHOOL

was begun in November of last year. So far it has been fairly successful. The Master—Mr. Tindall—is very painstaking, and the children showed a good average in the standards they professed. The Land

and Immigration Board kindly gives rent-free the old farm-house as a school-room and Master's quarters. Mr. Tindall tried for a few months to keep a night-school. The Council of Education gave a grant in aid, but only three or four pupils came, and these attended but irregularly.

THE WESLEYAN INFANT SCHOOL

in Durban is fortunate in having a teacher trained by Miss Day of the Girls' Model School. Although Miss Hawkeswood has been only 6 months in charge, the change for the better all through the school is very marked. The attendance will probably rise from 60 to 100 before the end of 1886. The school is not sufficiently supplied with appliances for amusing and instructing the infants.

ST. JOSEPH'S SCHOOL, DURBAN,

has now almost succeeded in keeping pace with the Model Primary Schools. The attendance has increased year by year, and it now reaches 220—three times what it was ten years ago. The weakness in Arithmetic and Grammar prevalent for three successive years is disappearing, but Geography is weak. The Infant Department is highly successful. The Government grant for 1885 amounts to £185 19s. and the fees collected reach £234 19s.

THE DURBAN GIRLS' SCHOOL

has been conducted for over 20 years by Mrs. George Smith. The thoroughness of all its work enables it to maintain the high position it has always occupied among our Colonial schools. Of the 59 girls who were present at the annual inspection only two failed to pass, and these in only one subject each. Much attention has evidently been given during the past year to Grammar and Arithmetic.

ADDINGTON SCHOOL

has been slowly declining for the past three years, owing chiefly to the increased facilities for sending children to the schools in Town. Last year the attendance was 60, and there were 14 Reading passes in Standard V. and above. This year the attendance is 45 and the corresponding passes only 4.

THE BEREA ROAD SCHOOL

is most successfully conducted by Miss Wilson. The attendance and proficiency of the pupils have increased considerably during the past two years. The 64 children who were present on the day of inspection acquitted themselves well throughout.

SYDENHAM SCHOOL

is making good progress under Mr. Howell's guidance. Year after year the attendance and the results steadily improve, and both the organization and the discipline are now excellent. Arithmetic and Drawing are considerably above the average of our country schools. The Committee did well to appoint an English-trained teacher to the mastership.

PINETOWN SCHOOL

has improved during the last two years. Before that time matters were not quite satisfactory. The attendance was low and irregular, the discipline was lax, and the results were disappointing. The lower Standards are still weak and require special attention, but the upper Standards passed their examinations with credit.

NEW GERMANY SCHOOL

has been under Mr. Schulze's charge for 12 years. The attendance keeps at about 40. The proficiency of the children is not high, but it is steadily improving. The attendance is very irregular, and the Master has to contend with the apathy of parents, and the jargon of mixed Low German and Kafir spoken in many of the children's homes. Some of the parents think that if their boys are able to tell, say, the

price of three bags of potatoes at 3s. a bag, they are fairly equipped educationally for their probable future calling. The teacher's income consists of £40 subscribed by the parents and the Government grants, which this year amount to £69 9s.

WESTVILLE SCHOOL

continues to do quiet, steady work under Mr. Holm's supervision. The number in attendance has fluctuated between 20 and 30 for the past 12 years. The results of the examination evidence pains taking and intelligent instruction, those in History and Geography especially being worthy of commendation. Mr. Holm's income consists of £19 18s.—school fees, and £48 13s.—Government grants.

THE SCHOOL AT BELLAIR

has been moved to a more convenient building. The attendance improves and the children are carefully taught. Reading and Writing are fairly good; Arithmetic and Geography rather weak.

THE GOVERNMENT PRIMARY SCHOOL, VERULAM,

was at a low ebb for the three years during which Mr. Spiller was Head Master. Since the appointment of Mr. White the school has made continuous improvement. The attendance rises steadily, and the favourable results seen at the inspections of 1883 and 1884 are again abundantly apparent.

THE TONGAAT SCHOOL

has maintained an attendance of about 40 pupils for the last three years. All the available children of the district go to school. The passes have gradually increased in value since Mr. Chalklen took charge, and they have now reached a fair average. There is room for improvement, however, in the degree of intelligence shewn by the pupils and in the amount of general information at their command. Reproducing on paper once a week, in their own words, the substance of a lesson previously read would probably remedy these deficiencies.

MILKWOOD KRAAL SCHOOL.

is not successful. The numbers have fallen from 23 to 15, and the passes are very poor. Mrs. Bailey gave up the school at the beginning of the year and was succeeded by Mr. Jas. Ripley. Most of the children in the district are taught by governesses or go by train to schools in Durban or Verulam.

UMHLALI SCHOOL

is one of the best-taught schools in the Colony. The attendance is small—18—but it includes all the children of school-age in the neighbourhood. For two successive years there have been no non-paying passes. This result is due entirely to Mr. Plant's earnestness and ability.

STANGER SCHOOL

has during the year maintained with some difficulty a regular attendance of 25 pupils—the number requisite for the Government grant of £50 a-year. Twenty-four pupils were present for inspection out of 27 enrolled. Mr. Breary was gradually raising the character of the work and giving the school the impress of an experienced teacher when he died suddenly from sunstroke in the middle of the year. His successor—the Rev. W. J. H. Banks—is an English-trained Master.

NEW GUELDERLAND SCHOOL

has made good progress since it was re-opened by Mr. Teare two-and-a-half years ago. The attendance, which was returned as over 40 during part of 1884, has averaged 30 for 1885. The written work done both in school and at home is careful and is worthy of commendation. Last year there were 14 non-paying passes: this year there are only 5.

ISIPINGO SCHOOL

was re-opened by Mr. Hutton, on the 1st of August, after having been shut for about three years. Twenty-five of the twenty-seven children on the register are under 12 years of age. The proficiency of the pupils is not high, but their work gives evidence of careful instruction. Ten years ago the number in attendance was 22.

UMZINTO SCHOOL

does not show by its attendance that the population of the district is increasing. Ten years ago the school numbered 21 pupils, and had a regular attendance of 20.5. It was not till the beginning of this year that the school—which in the interim had only fitfully existed—was able to secure an attendance of 15 pupils—the number required by the Council of Education. With the exception of eight or nine girls who attend a private school, these are all the children of school-age within reach. Only four of the pupils are over 12 years of age, and it will be quite a year before any of the others are able to pass a moderate examination in the three Rs.

SOUTH SHEPSTONE SCHOOL

was held in a school-church building in the small township on the Point at the mouth of the Umzimkulu. It was begun in July, 1883, but, like the settlement, it has never flourished. The maximum attendance reached 21 in the middle of 1884, and the minimum—13—was found at the inspection in April of this year. There seems to be no settled industry in the locality. Seven of the 13 pupils paid no school fees. Only one boy was able to read, write, and cipher fairly; the others are backward for their ages. The Master's income from the school was about £52 a year, of which Government contributed £38. Mr. Hutton gave up the school at the end of June and went to Isipingo. Most of the children are now under private tuition.

THE NORWEGIAN SCHOOL AT MARBURG

has received Government aid since the beginning of 1884, at the rate of £40 a year, in addition to the Capitation Grant, which this year amounts to £15 15s. The Master—Mr. Kjönstad—who was a school-master in Norway, is fairly acquainted with English and gives instruction in that language to all his pupils. At the time of inspection they numbered 40—17 boys and 23 girls. The educational results are not high, but they are quite satisfactory when we find that only three of the pupils knew a word of English before they came to the Colony three years ago. No pupil pays any fee, and the Master's income consists solely of the Government grant. It is a pity that the three German communities in the immediate neighbourhood do not avail themselves of the advantages offered by this school instead of attempting to maintain small sectarian schools under their several ministers.

THE GOVERNMENT PRIMARY SCHOOL, GREYTOWN,

is proving quite successful as a Day School. It was begun early in 1883 with an attendance of 25 pupils. Eighty-two were present at the last annual inspection—45 boys and 37 girls. The Infant Room shewed excellent work in reading, calisthenics, and singing. The Upper School, though better than in previous years, has not yet reached the desired standard of proficiency. Grammar and Arithmetic are weak, especially in Standard IV. The buildings and furniture are suitable and are in good repair. The grounds are neatly laid out, and everything about the school is tidy and bright. The large number of non-paying passes—49—is owing to the circumstance that 13 girls came to the school when the private Girls' School was given up in July, and consequently had not completed the necessary three months' attendance in September—the month for the inspection of schools in Umvoti County.

HERMANNSBURG SCHOOL

was at one time a flourishing Boarding-school, attended by 35 or 40 English boys, in addition to the children of the German missionaries, for whose benefit alone the school was established. Only German children attend now—15 boys and 17 girls. Eight who live with their parents on the Station pay 5s. a month each as school fees; the rest—the children of the Hanoverian missionaries in Natal and the adjoining territories—receive board and education free. The standard of English education attained has latterly never been high, but it is perceptibly improving. The children leave school on “confirmation” at the age of 13 or 14. The Government grant for the year amounted to £69 13s., and the school fees to £14 15s.

WELGEGUND SCHOOL

is attended by 17 children—all Dutch—and is kept by Mr. Muirhead, senr., on a private farm 10 miles E. of Greytown. The younger children are naturally backward in English, but the elder ones are remarkably proficient. The latter answered readily questions on the scope of a lesson taken at random from the highest standard reading-book. Applied sums in vulgar and decimal fractions, discount, and stocks were correctly worked by the four pupils of the highest class. As the senior pupils finish their schooling at Christmas, and as there are no younger children in the district to take their places, Mr. Muirhead intends to move in the beginning of 1886 to a farm 20 miles East. Mr. Muirhead receives £100 a year and a house from the parents of his pupils, and £48 2s. from Government.

WONDERFONTEIN SCHOOL,

10 miles E. of Hermannsburg, is kept by Mr. A. Muirhead, junr. The attendance has remained about 20 for the past eight years. Only Dutch children attend. Their proficiency, especially that of the elder children, is quite satisfactory. The Master is well acquainted with the Dutch language, but the parents desire their children to be instructed in English only. Mr. Muirhead's income consists of £60 from the School Committee and £49 13s. from Government.

THE GOVERNMENT PRIMARY SCHOOL, LADYSMITH,

increased its attendance by 18 during the year preceding the inspection in June, 1885. The passes, though more in number and slightly higher in value than those of any previous time, are still under average, especially in the middle division of the school. The Infants and Standard I. seem to be making fair progress under the new Assistant—Miss Walton. Ten years ago the Village School, which was then only aided by Government, had an attendance of 46 pupils. Only three of these reached Standard IV. in Reading and Arithmetic, and no one knew more of Grammar than the definitions of a few of the parts of speech. This year 16 passed in IV. and all shewed a fair acquaintance with elementary English Grammar. Mr. Ormond, M.A., who came from England in 1880 as Master of this school, resigned in September, and has been succeeded by Mr. H. W. Graham, M.A., of Trinity College, Cambridge. Since Mr. Graham's appointment the number in attendance has risen from 70 to 80.

THE GOVERNMENT PRIMARY SCHOOL, NEWCASTLE,

was opened at the end of 1882 under the mastership of Mr. S. F. McBean. There was no school in the Village till 1874, when an Aided School was begun with an average attendance of 19 pupils. This school was kept open, latterly without Government help, till the existing school was established. The attendance for the present year is 75—12 less than in 1884. The population, however, has been slowly

decreasing for a year or two, and all the available children attend the school. The building stands in two acres of well-kept grounds, and, like the other Government Day and Boarding Schools, contains accommodation for 100 pupils, 20 boarders, and the Master's family. The complete success of this school as a day-school is due entirely to the ability and zeal of the Master. The discipline and tone of the school are excellent, and the proficiency of the pupils increases markedly from year to year. Thoughtful answers were given by all the classes to questions put on subjects out of the ordinary routine of school-work.

A SCHOOL WAS OPENED IN DUNDEE

seven years ago, but after struggling for 18 months it collapsed for want of support from the neighbouring farmers. As the district has become less thinly peopled of late, another attempt has been made by Mr. A. Graham to establish a school. The attendance averages 25 and comprises all the children of the district, except those under private tuition. The school house is private property, and is rented by the Master. Mr. Graham has resigned from the end of the year owing to alleged inadequate support by the inhabitants. He has, however, tried school-keeping in five or six districts of the Colony in as many years.

THE HIGH SCHOOLS.

In 1884 the Legislative Council passed a Bill amending the High School Law of 1877. Several of the provisions of this measure were suggested by the Head Masters of the High Schools, and one main object of the Bill was to give the Head Masters "every possible opportunity of proving to the Colony what they can make of our High Schools." Previous to this enactment the Council of Education had complied with the request of the Head Masters to be released from the necessity of sending their pupils to the annual Government examination in elementary subjects of instruction.

Still the attendance at these schools diminishes, and the latest results of the work as set forth in the published reports of the special examiners are hardly such as we are fairly entitled to expect. If our Primary Schools had been less efficient than they are, and if the system of part payment by results had not been confined to them, we should probably have had a better attendance and a higher degree of proficiency at both the High Schools.

THE THIRD OF THE UNIVERSITY OF CAMBRIDGE LOCAL EXAMINATIONS was held from the 15th to the 20th December, 1884.

Thirty-three Candidates were examined—26 boys and 7 girls. Twelve were Seniors and twenty-one were Juniors.

The Maritzburg High School sent in 7 Seniors and 10 Juniors, and passed 3 Seniors and 3 Juniors. Two of the Seniors gained honours, one in the 2nd Class, and one in the 3rd Class.

The Durban High School sent in 4 Seniors and 5 Juniors, and passed 1 Senior and 4 Juniors. Two of the Juniors gained honours, one in the 2nd Class, and one in the 3rd Class.

The Durban Girls' School sent in 3 Juniors and passed one.

The Maritzburg Girls' Collegiate School sent in 1 Senior and 1 Junior, and passed both—the Senior with 3rd Class Honours.

The Durban Young Ladies' Collegiate Institution sent in 2 Juniors and passed both—one with 3rd Class Honours.

Sixteen candidates came up to the fourth of these examinations held in December, 1885. Only one took senior papers—Miss Walton, of the Berea High School for Girls. This school sent in 3 Juniors; the Durban High School 7; and the Maritzburg High School 5.

It is not encouraging to find that in 1883 we had 50 candidates, 15 of them seniors; in 1884, 30 candidates, 12 of them seniors; and in 1885, 16 candidates, and only one a senior. In England these and similar examinations are almost universally adopted as an independent test of the work of the advanced pupils of secondary schools.

The Exhibitions to Home Universities were awarded to R. Russell and D. Calder of the Maritzburg High School—the two boys who stood highest in the Cambridge Examination for 1884. Both took honours—Russell in the Second Class with 197 marks, and Calder in the Third Class with 152 marks. Both, as undergraduates of Merton College, Oxford, passed "Responsions" in December 1885.

The Ninth Annual Examination for Government Certificates of Proficiency in Elementary Subjects was held simultaneously in Maritzburg and Durban, on the 5th and 6th November, 1885.

This examination is open to all boys and girls, though practically it is limited to the senior pupils of schools at a convenient distance from either examination centre. It is held for the special purpose of awarding certificates of merit, and it does not in any way supersede the annual inspection of the ordinary work of the pupils who take part in it.

One hundred and forty-eight candidates were present—84 boys and 64 girls. Their average age is 14 years. The Boys' Model School in Maritzburg sent 31 pupils; the Boys' Model School in Durban, 25; the Girls' Model School in Maritzburg, 16; the Girls' Model School in Durban, 14; the Durban Girls' School, 14; the Government Primary School in Verulam, 7; York School, 6; Sydenham School, 6; New Leeds School, 6; Howick School, 5; the Government Primary School in Richmond, 4; the Government Primary School in Greytown, 3; Pinetown School, 3; Miss Wilson's School, Maritzburg, 3; Miss Leask's School, Maritzburg, 3; and Camperdown School, 1. Only one private pupil competed—Cecil Jackson, from Caversham.

The Subjects of Examination were:—Writing to Dictation, Handwriting, Arithmetic, Drawing, English Grammar, Geography, English History, Composition, Roman History, and Physiology.

The following table gives the comparative results for the past eight years :—

Year.	No. of Competitors.	No. who gained Certificates.	Maximum Marks	Highest No. of Marks gained.	Lowest No. of Marks gained.	Average No. of Marks gained.
1878	99	11	1,200	923	128	557
1879	90	24	1,200	1,081	289	684
1880	176	50	1,200	1,132	188	658
1881	198	30	1,200	1,118	79	562
1882	189	60	1,200	1,163	183	680
1883	118	33	1,200	1,101	305	700
1884	129	56	1,200	1,121	277	690
1885	148	116	1,200	1,134	429	888

The questions were answered on the whole exceedingly well. The general character of the work is much better than that of any previous year, and it evidences an amount of careful instruction and thoughtful application worthy of commendation.

The average number of marks gained is 27 per cent. above the maximum average hitherto reached, and is 88 more than the number required for a certificate. The pupil at the bottom of the list stands 124 marks higher than the best of those who occupied a similar position during former years.

The first 116 candidates having each gained over 800 marks will receive certificates. The Maritzburg Boys' Model School takes 23; the Maritzburg Girls' Model School, 16; the Durban Boys' Model School, 15; the Durban Girls' Model School, 14; the Durban Girls' School, 11; York School, 6; the Government School, Verulam, Howick School, and Sydenham School, 5 each; the Government School, Richmond, 4; the Government School, Greytown, and Miss Leask's School, Maritzburg, 3 each; New Leeds School and Miss Wilson's School, Maritzburg, 2 each; and Pinetown School and the private pupil, 1 each.

The following schools passed all their competitors :—

Government Schools :—Maritzburg Girls' Model; Durban Girls' Model; Richmond, and Greytown.

Aided Schools :—York and Howick.

Private School :—Miss Leask's, Maritzburg.

The following List comprises all who made 1,000 marks and over :—

Order of Merit.	Name.		Order of Merit in 1884.	Date of Birth.	Entered Present School.	School.	Maximum Marks, up to 1,200.
							Total Marks.

This examination, with the exception of the papers on Physiology and History of Rome, is the one prescribed by the Council of Education in terms of the following Section of Law No. 8, 1880 :—

“Three Bursaries of the annual value of £40 each, and tenable for three years, shall be open for competition to all boys over eleven and under fifteen years of age on the 15th day of November in each year, provided such competitors have been resident in the Colony for at least one year immediately prior to the 15th day of November in the year in which they compete, and shall not be, or have been, the holders of a Government Bursary ; and the said Bursaries shall be competed for in an examination to be held between the 1st day of November and the 15th day of December ; such examination to be prescribed by the Council of Education, and shall be used for the purpose of allowing the holders to proceed to any one of the High Schools established under Law No. 16, 1877, and shall be held on condition of good behaviour and continuance at said School, of which a certificate shall be furnished half-yearly to the Council of Education by the Head Master of such Schools ; but no Bursary shall be given to any competitor who shall fail to pass an examination in a manner satisfactory to the Council of Education.”

The first six competitors in order of merit are :—

- 1.—Charles François, born August 18, 1871, Durban Boys' Model School, 857 marks.
 - 2.—Walter Plummer, born December 26, 1870, York School, 851 marks.
 - 3.—Wm. McEwan, born January 30, 1871, Pietermaritzburg Boys' Model School, 849 marks.
 - 4.—Hessay Allanson, born October 22, 1871, Pietermaritzburg Boys' Model School, 847 marks.
 - 5.—

{	Charles Stone, born August 18, 1871, Pietermaritzburg Boys' Model School, 846 marks.
{	John Wright, born April 21, 1871, Durban Boys' Model School, 846 marks.
- all out of a maximum of 950 marks.

The three Bursars elected by the Council of Education in 1884 gained respectively 814, 760, and 759 marks out of the same highest possible number.

Education Office, Natal.
11th January, 1886.

ROBERT RUSSELL,
Superintendent Inspector of Schools.

INCOME AND EXPENDITURE

OF THE

COUNCIL OF EDUCATION

FOR 1885.

“The Council of Education shall be charged with the duty of administering such sums of money as may be voted by the Legislative Council for the purpose of carrying out the provisions of the Law, together with such other funds as may in any manner become disposable under the Law.”—Law No. 15, of 1877, Section 4.

INCOME.

The following table shows the monthly collections of fees at the eleven Government Schools. Pupils of the High Schools pay 15s. each a month, and pupils of the Primary Schools pay from 1s. to 5s. each, according to advancement. All fees are paid into the Treasury in advance, and form part of the General Revenue:—

NATIVE SCHOOL REPORT.

1885.

REPORT

OF THE

INSPECTOR OF NATIVE EDUCATION

FOR

1885.

At the beginning of the year 1885, Seventy Native Schools were in receipt of Government grants in aid; out of this number Fifty-nine have been inspected. The fact that all were not inspected is due to two causes: first because the appointment of Inspector of Native Education was not made until April, and second, because some of the Schools were not in session when visited. Out of the above number of Schools, Government aid has been withdrawn from Seventeen, viz.:—Rock Fontein, from 1st of August; Wentworth and two of the Impumulo Kraal Schools, from the 30th of September; two of the Lindlay Schools—Umzinyati, and Ematata, from 30th of November. The grants in respect of the following Schools were discontinued from the end of the year:—Three of the Lindlay Kraal Schools—Hlakolo's; Emtyazi, and Emkumbane; St. Mary's Day and Evening, Pietermaritzburg; Wesleyan Native Night School, Durban; St. Faith's Native Night School, Durban; Wesleyan Native Night School, Pietermaritzburg; High Flats Native School, No. 2; Dronk Vlei Native School; Ikwezi la Maci, and Marburg.

A refund of £10 has been made by Mrs. Edwards in respect to the grant paid to the Lindlay Kraal School, Ematata. The Rev. W. Ireland has refunded £4 of his grant in connection with the Dronk Vlei School, and has called upon the Native who has charge of the School to refund the balance (£7.) These refunds were ordered by Resolution of the Council of Education on the Inspector having reported that instruction had not been given in the schools in question—in some cases during the whole year, and in others for a considerable portion of the year.

The grant to St. Alban's Training School was increased from £15 to £100 from the 1st of October last.

Special grants have been made to the Amanzimtoti Training School, and to the Umzumbe Primary School; the sum of £150 being contributed to the former, and £10 to the latter School.

Two new grants have been made during the year, taking effect from the beginning of April last. One of £2 per month to the Reverend Otto Witt for his Native School at Rorke's Drift; another of £1 per month to the Reverend J. Bridgman for a Kraal School on the Umzambe Mission Reserve.

The total number of Scholars attending the different Schools during the year, as shown by the Returns furnished by the recipients of grants was 3,817, of which number 2,137 were boys, of whom 978 were under 12 years of age, and 1,159 over that age. The number of girls was 1,680, 987 being under and 693 over 12 years of age. The average attendance was 2,294. The number presented for inspection amounted to 1,851.

A block of land, 52 acres in extent, has been surveyed in the Zwaartkop Location, for the purpose of establishing a Government Native Industrial School there. The site has been selected, and the erection of this school is proceeding.

The following Table has been prepared from Returns furnished by the recipients of grants:—

No.	School.	Yearly Grant.	Recipient of Grant.	Name and Yearly Salary of Teacher.
	CHURCH OF ENGLAND.	£ s. d.		
1	Ekukanyeni—Day and Evening School.†	300 0 0	W. James	Mubi Nondenisa, £48.

No. of Pupils doing plain sewing.	No. of Pupils receiving instruction in other subjects.	No. of Pupils receiving instruction in industries.	Means taken to encourage conformity with European habits.
16	All taught singing and drill, 1st Class Geography.	None at present; but the teaching of printing is contemplated next term.	All children are expected to attend school clean and decently clothed. Articles of clothing are given to the scholars when they have learned to make them for themselves.
...	Ten are taught Geography and Grammar. Those at Night School are taught singing and Bible History.	...	Scholars are supposed to come to school neat and well clad. Conformity with European habits is adhered to as strictly as possible.
...
...	...	17 receive instruction in house work, 8 in carpentering, and 6 in gardening.	Every possible means.
...	Seven are taught Tonic Sol-Fa singing.	All the scholars are engaged in work in Durban	...
20	Eight Scholars are instructed in Elementary Latin and French, 20 in English Grammar and History of England, 3 music, 45 spiritual instruction.	30 scholars instructed in house work, field work, and handicrafts.	In constant reflection upon the infallible truth that Europe, though the smallest in size of the four quarters of the globe, is nevertheless the greatest in spiritual, scientific, and military power.
25	All receive instruction in singing, 4 in history, geography, map-drawing grammar and composition; whole further instructed in religion.	All the boys are at present learning needlework, with a view of tailoring.	Tickets are given for regular attendance and punctuality; these tickets are available for the purpose of clothing contributed by friends in England.
4	Mission School children wearing clothes, but heathen children do not wear them.
...	The scholars wear European clothes.
...	All instructed in Bible History, singing, writing, dictation, reading, translation of Zulu into English, English Grammar; 23 in geography, 8 in map-drawing, 3 physics, physiology, chemistry, English History.	Pupils are required to work two hours daily, (three hours on Saturday); some in the garden of the school and grounds, others at cooking, grinding the meal, chopping wood, &c. 7 pupils work three hours a day at carpentering and 2 at printing. One gives the whole of his time during the day to carpentering.	A daily bath, a weekly washing of clothes insisted on. As a rule the pupils keep themselves respectably dressed.
...
67	History of England, geography, reading English with translation and dictation, grammar, Bible History.	All work of the Home is done by the girls.	The girls are required to wash and mend their clothes; many of them learn to cut and make their own clothes.

CHURCH OF ENGLAND SCHOOL—EKUKANYENI.

There were 30 Scholars present at inspection—all within the required ages—they could work Sums in Simple Addition, read Zulu well; English indifferently; some of the scholars could write fairly well. Eight of the girls did plain sewing. The School is presided over by a Native girl, who holds a certificate of competency from the Inanda Seminary. Music is taught by Miss Colenso, who supervises. No special provision is made for teaching the boys.

The Schoolroom is in a very unsatisfactory state and sadly out of repair, and, in my opinion, is unfit for the purpose to which it is devoted, in its present state.

CHURCH OF ENGLAND SCHOOL—ST. MARY'S.

There were 8 Children present, whose ages ranged from 7 to 12—only two out of the number being Natives. The most advanced could only read English imperfectly. One boy was able to work Sums in Simple Division; two others could manage to do Simple Addition. Neither boys nor girls have any other training. The number present was over the average attendance. School is held in the Native Church. No Zulu language is taught. At the

CHURCH OF ENGLAND NIGHT SCHOOL (ST. MARY'S)

there was an attendance of 62 natives when inspected. These were divided into 5 Classes, the first of which read Zulu fairly well, the rest very indifferently. There were 3 scholars in a separate class, learning English, in which, however, they had not made much progress. The scholars attending this School, with few exceptions were adults. Men and women occupied the same forms, and the system adopted at the school appeared to me to be unsatisfactory. Mr. Ikin informed me that the attendance was very irregular.

On the evening of my inspection of the

CHURCH OF SOUTH AFRICA NATIVE NIGHT SCHOOL, PIETERMARITZBURG—ST. MARKS,

Fifty-three pupils were present, but the average attendance is 45. The scholars were divided into 5 Classes. The 1st and 2nd read Zulu well, but I regret I cannot speak so well of their English reading, which was very imperfect. Two were able to write fairly—the remainder were learning Zulu, and were in different stages of advancement. Most of the scholars were above the required ages. The school is presided over by the Reverend Mr. Troughton, assisted by Mr. Spence, and three Native teachers. No Industrial Training is provided. School is held in the Native Church.

CHURCH OF SOUTH AFRICA NATIVE BOARDING SCHOOL, PIETERMARITZBURG—
ST. ALBANS.

There were 18 pupils present at inspection, divided into 3 Classes. The First Class read English well, which they also readily translated into Zulu, which they read fluently. They were able to work the Compound Rules. In Writing and Composition the boys were very good indeed; they also showed a fair knowledge of Geography. The boys in the 2nd Class read and understood English; they also read and translated Zulu. Their Writing was very fair, and they were able to work Sums in Division. The 3rd Class was not far advanced. The pupils' ages range from 11 to 23 years—7 being over the age required by Law.

This is a Boarding School for boys who are taken for a term of years—the parents paying a small sum per annum to assist in defraying expenses. In connection with this school there is a Carpenter's and Cabinet-maker's Shop, in which trades the pupils are instructed. There is also a strip of land set aside for the purpose of instructing the pupils in the best modes of cultivation. The Dormitories were particularly neat and clean. Some of the work done by the pupils was very creditable. The intelligence displayed by all was very pleasing, and I have pleasure in being able to say that the School reflects great credit on those under whose management it is.

No females attend the

CHURCH OF SOUTH AFRICA EVENING SCHOOL, DURBAN—ST. FAITH'S.

The attendance at inspection was 44—32 of the scholars being over age, none were under. The most advanced scholars read and translated English fairly; they also read Zulu well and write passable hands; in Arithmetic they could work Sums up to Division. The next in advancement read English with difficulty, Zulu passably; their writing was poor, and they were unacquainted with arithmetic. The rest of the scholars proved to be even less advanced. The School is under the charge of the Reverend H. P. A. Thompson. The scholars appeared to be very attentive and anxious to learn, but the short time available in the evening greatly interferes with advancement. The Tonic Sol-Fa system is taught once a week. School is held in the Church. The

CHURCH OF SOUTH AFRICA NATIVE SCHOOL—SPRINGVALE.

is divided into an Upper and Lower. In the Upper School 23 Scholars were present, all being within the required ages—14 of the number were girls. Five of the scholars have been placed there as Boarders. The scholars were examined in three Classes—1st (6 boys) read both English and Zulu intelligently, did Compound and all previous Rules; their Writing was good; they showed some acquaintance with both Geography and Grammar. 2nd (4 girls) read English indifferently—Zulu a little better; they were able to work Sums in Addition and Multiplication. 3rd (10 girls) read both English and Zulu very indifferently, but write fair hands, and were acquainted with the first three Rules in Arithmetic. This School is under the charge of Miss Fox. Both boys and girls receive instruction in Sewing—one hour per day in case of the girls, and twice a week in that of the boys. This system obtains in both the Schools. The samples of Sewing shown were creditable. The School Building is suitable in all respects. The

LOWER SCHOOL

had an attendance of 23 Scholars when inspected (6 being under the required age) which were divided into 4 Classes—Class 1 (7 boys, 1 girl.) Able to read English and Zulu fairly. They were able to do the easier Sums in Simple Addition; their Writing was indifferent. The rest of the School had not advanced beyond Spelling and repeating the Multiplication Table. The School is under the charge of a Native named Thomas, and is supervised by Canon Greenstock, who instructs the scholars in the Tonic Sol-Fa system of Music. This school might be designated an Infant School, the greater proportion of the scholars being very young. The

CHURCH OF SOUTH AFRICA MISSION SCHOOL (HIGH FLATS, No. 1)

is about seven miles from Springvale, and is under the charge of a Native teacher named Sianguza. The attendance is small—there being only 10 Scholars present at the inspection, which appeared to represent the average. 1st Class (2 boys, 5 girls) read English fairly, but in most cases

proved unacquainted with the meaning of what they read: all read Zulu well. Four pupils were able to work Sums in the first four Rules of Arithmetic; two could work the higher Rules—four out of the seven wrote very good hands. The rest of the scholars were only sufficiently advanced to be able to spell words of two and three syllables. There is no provision made for Industrial Training. The Schoolroom is built of brick, and at present is large enough for all purposes, but it would not be so were numbers to increase to any extent. The

CHURCH OF SOUTH AFRICA MISSION SCHOOL (HIGH FLATS, No. 2)

is situated about 12 miles further S.E. in very broken country. Nine Scholars only attended inspection—4 of the number over required age, 2 being girls—this number was over the average. 1st Class (2 boys, 1 girl) read English very indifferently, being unacquainted with the meaning of words; their reading in Zulu was much better. They had some knowledge of Long Division. Their writing was indifferent. The rest of the scholars were able to spell out with difficulty the easiest words. Although the School is situated in a thickly populated district, there were only four kraal children in attendance, which may be explained by the fact of an antagonistic feeling having arisen towards it on the part of the Kraal Natives, owing to some quarrel about the purchase of land by the Christian Natives.

AMERICAN MISSION TRAINING SCHOOL (AMANZIMTOTI)

is an institution designed for the higher training of Native youths, who are taken for a term of years. There were 39 youths present at inspection—16 of the number being over the required ages. Class 1 (2 young men, who have been five years at the School) read and translated English into Zulu very well; they also read Zulu fluently. They were as far advanced in Arithmetic as Percentage, and showed a thorough acquaintance with all preceding Rules. They proved to be well versed in Grammar and Geography, and were studying Physiology and Chemistry. Their Writing and Composition was exceptionally good. The 2nd Class (2 boys) read and translated English very intelligently; they read Zulu well, and were as far advanced as Vulgar Fractions in Arithmetic. They also wrote fair hands and showed some acquaintance with Geography, Grammar, and Sacred History; their Composition was creditable. Class 3 (4 boys).—Three out of the number were able to work Vulgar Fractions, the other Compound Numbers; Reading, Writing, and Translation being good. They proved well advanced in both Geography and Grammar. Class 4 (12 boys) all read English and Zulu well, and readily translated both languages. This class study Grammar and Geography, and in both of these branches have a very fair knowledge. Their acquaintance with Arithmetic extended to Weights and Measures. Class 5 (17 boys) read and wrote English very fairly indeed, and showed great readiness in translating the English into Zulu. All in this class were able to work the first 4 Rules in Arithmetic and gave satisfactory evidences of progress in Geography, Grammar, and Bible History. All these classes proved to be exceptionally sharp at Mental Arithmetic. The scholars are instructed in Music on the Tonic Sol-Fa system, and sing well. The School is under the charge of the Rev. H. D. Goodenough, assisted by the Misses Day and Dixon, and a Native teacher. There is an Industrial Department in connection with the school, at which 10 of the boys receive instruction in printing and carpentering. The School Building has been erected at the cost of some thousands of pounds, and is designed to accommodate 50 Boarders. The arrangements are good, and reflect great credit on all concerned, the Dormitories being roomy and well designed, and the food supplied both ample and wholesome. The Amanzimtoto School has sent forth many well-trained and useful men and is doing good work at the present time.

The

AMERICAN MISSION NATIVE SCHOOL AT DRONK VLEI

is practically non-existent, as no school has been held there for the past twelve months, and the grant has been withdrawn. Some so-called scholars were collected for inspection, but their attainments are not worth recording.

AMERICAN MISSION FEMALE TRAINING SCHOOL, INANDA,

is a School established for the education and training of Native girls. There were 29 present at the time it was inspected, all being Boarders. There were 30 pupils in all at the school; 7 of the girls were over the required age. The scholars were divided into 5 Classes. Class 1 (4 girls all over age) were able to work Vulgar Fractions, having a thorough knowledge of all preceding Rules. This class proved exceptionally clever too at Mental Arithmetic: all could read English and Zulu very well, and their Writing from Dictation was good. They showed considerable knowledge of Grammar, Geography, and Sacred History. Class 2 (6 girls) read English and Zulu well—translating the former into Zulu correctly. They were able to do Compound Rules, and had a knowledge of both Grammar and Geography; their writing was good. Class 3 (13 girls) were able to work Sums—5 in Long Division, and 8 in Subtraction—their Reading in both English and Zulu was creditable. Class 4 (4 girls) read English and Zulu, the former with difficulty, and in Arithmetic they were only as far advanced as Simple Addition; their Writing, with one or two exceptions, was indifferent. The scholars were neat and clean without exception. All are well instructed in Needlework, and cutting-out; they make clothes in aid of the Mission at Inhambane, wash, iron, and receive special instructions in household duties. The School Buildings are very suitable. An inspection of the Dormitories showed them to be scrupulously clean, and affording ample room for the Boarders. The arrangements throughout reflect great credit on the Lady Principal (Mrs. Edwards) and the ladies who assist her. The Inanda Training School may fairly claim to be a model Institution. The

AMERICAN MISSION NATIVE SCHOOL, UMZINYATI,

is situated about four miles from Lindlay Station, Inanda, and is attended by children from the surrounding kraals. There were 17 present at examination, 7 being girls—6 under the required age—all but this number only being clad simply in the ordinary cotton sheet. The most advanced pupils (two in number) were able to read English indifferently, though they read Zulu well; they were not further advanced in Arithmetic than easy sums in the 1st Rule. The remainder were only able to spell out easy sentences. The school was under the charge of a child about 12 years old. The state of the school was not satisfactory; the grant has been stopped.

LINDLAY KRAAL SCHOOL—EMKUMBANE.

This is also an outlying School, about $3\frac{1}{2}$ miles from the Inanda Station. The School Roll showed an attendance of 25 Scholars, but on the day of inspection there were only 7 present. Out of this number two could read English, and that indifferently; they did better in Zulu, and were able to work Sums in Simple Addition. The next in advancement read Zulu badly, and had just commenced the study of English, the rest not having got beyond the Alphabet. Most of the scholars appeared dirty and very poorly clad. The school is presided over by a Female Native Teacher. There is no provision made for industrial training. I cannot report upon this School as being in a satisfactory condition. The School-house is a wattle-and-daub structure. The grant has been stopped.

LINDLAY KRAAL SCHOOL, EGUGWINI,

lies about four miles from the Lindlay (Inanda) Station. Nineteen Scholars were present—this number being above the average. These children were all from the surrounding kraals, and unclad, with the exception of the usual dirty sheet. Those most advanced were only able to spell out words in Zulu, the rest had not got further than repeating the Alphabet. Five of the scholars were over the required age, none under. Out of the 19 scholars 16 were girls. The School has a Native teacher. A Native woman from Lindlay Station attends to instruct the girls in Sewing. Though this school was established later than the other Lindlay Schools, still much more system was observable and also a greater amount of intelligence on the part of the scholars.

The other two Lindlay Schools (Ematata and Emtyazi) were not inspected, owing to their not being in session at the time, but in the case of both, the work done has not been considered sufficiently satisfactory to warrant the continuance of the grant after the close of the year. The

AMERICAN MISSION NATIVE SCHOOL, UMTWALUME,

is in reality divided into two Schools—an Intermediate, and a Primary. 19 Scholars were present at the Intermediate—11 girls—5 being above the age allowed. Class 1 (3 boys) read English Standard Reading Book, No. 3, fairly well, but were unacquainted with the meanings of many of the words; their Writing in Copy Books was good. They could work Compound Rules, and showed some knowledge of Geography. Class 2 read English Standard Reader, No. 2, but evinced the same difficulty regarding the meanings of words. In Arithmetic they had advanced as far as Long Division, and possessed a smattering of Geography. Both 1st and 2nd Class read Zulu well, but their writing was indifferent. Class 3 (3 girls, 2 boys) read English very indifferently, and were unable to define the meanings of the words they read; their reading in Zulu was good. These scholars as a class were able to work Sums in the first 3 Rules of Arithmetic, had just commenced Writing, and the study of Geography. Class 4 (3 girls, 1 boy) appeared to have a better knowledge of English than the 2nd or 3rd Classes. They read Zulu passably, and were able to do easy Sums in Simple Addition. A Native teacher is employed in this School. All the scholars presented a neat appearance. The School-room, which is built of brick, appeared to be suitable in all respects. There is a Sewing Class, presided over by Mrs. Wildes, at which the girls receive instruction in Needlework twice in the week.

In the Primary School 58 Scholars were present—29 being girls—1 over and 2 under the required ages. Class 1 (5 girls, 3 boys) read 1st English Standard Reading Book fluently, and readily translated what they read into Zulu, which they read well. They had just commenced Arithmetic. The rest of the scholars were in a less advanced state, from repeating the Multiplication Tables and Spelling easy words, down to the Alphabet. The School is under a female Native teacher. The School-room, constructed of brick, is suitable. The girls are taught Sewing together with those of the Intermediate School.

AMERICAN MISSION NATIVE SCHOOL, UMZUMBE.

Twenty-two Scholars were present at the inspection, of whom 5 were under the required age and 1 over—13 of the number were girls. Class 1 read English well, and was acquainted with the meanings of words; they read Zulu very well; 2 were able to work Sums in Simple Addition; all Write fair hands. Class 2 (2 girls, 2 boys) read English indifferently, Zulu much better, and were able to do Sums in

Simple Addition. Their Writing was passable. Class 3 (4 girls, 2 boys) read and understood English better than the 2nd Class, reading Zulu very intelligently. Class 4—Spelling both in English and Zulu.

Eleven of these children are taken each afternoon by Miss Gilson (a lady connected with the Higher School) who instructs them in the Kindergarten system, which the children readily understand. It was very interesting to see the intelligent way in which these children appeared to grasp each lesson, being able to remember and repeat long sentences. The scholars presented a neat and clean appearance. The School is under the care of a Native female teacher named Uyona.

The Building is suitable in every respect. The attendance was above average.

Twenty-six Native girls were present when I inspected the

AMERICAN MISSION HOME FOR GIRLS, UMZUMBE.

This number represented those at present at the Home—7 were over the age allowed. Class 1 (6 girls) read both English and Zulu well, readily translating the former language into Zulu. All can work Compound Rules, 3 were able to do Fractions, Proportion and Practice. The Writing was good. All showed a fair knowledge of Grammar, Geography, and Sacred History, whilst their Composition deserves special mention; 4 girls out of this class receive special instruction, being designed for Pupil Teachers. Class 2 (6 girls) both read and speak the English language well; their reading in Zulu being very correct. All had mastered the first four Rules in Arithmetic; their Writing from Dictation was also very good; they showed some knowledge of Geography. Class 3 (14 girls) read English passably, Zulu well, and were able to work Sums in Simple Addition. Their Writing was creditable.

The School is presided over by the Misses Gilson and Welch, who teach alternately. The girls are taught Needlework and Cutting Out 8 hours in the week. They are instructed in all household duties. No girl is allowed to enter The Home for a shorter period than 12 months, and in the case of a child of Christian parents the sum of £1 12s. per annum is required, together with the necessary material for clothes. The food required for the Boarders is grown on the Station, and the girls assist in harvesting. An inspection of The Home showed the arrangements to be very good. The Dormitories, Dining, and other Rooms being neatly kept. Nothing but the English language is allowed to be spoken by the girls between the hours of 8 a.m. and 8 p.m. Both The Home and School-house are constructed of burnt bricks, and are very suitable. 106 girls have attended this Institution since it was established, 56 out of that number being from heathen kraals, and only 8 have returned to heathenism. Both Miss Gilson and Miss Welch deserve very great credit for the admirable way in which everything is conducted. The

AMERICAN MISSION NATIVE SCHOOL, AMAHLONGWA,

was not inspected owing to the School house having had to undergo repairs, and the School not being in session when visited.

Forty-nine Scholars were present at the

AMERICAN MISSION NATIVE SCHOOL, IFUME—

21 out of the number being girls. Three were over the age allowed. Class 1 (5 boys, 1 girl) read English very indifferently, and were unable to give the meaning of what they read. They did much better in Zulu. 3 out of this class were able to work Sums in Long Division and 3 in Multiplication. The Writing was

very poor. 2nd Class (7 girls) read easy sentences in 1st Standard Reader unintelligibly, but on the other hand their reading in Zulu was good. The greater portion were able to work easy Sums in Subtraction. Class 3 (3 boys, 1 girl) had just begun the study of English, and were able to spell through easy sentences. They read Zulu well considering their ages, and were able to do Sums in Simple Addition. The remainder had not advanced beyond Spelling in both English and Zulu. The School is held in two small Verandah Rooms—(which, I may remark, are unsuitable for the purpose,)—and is under the charge of a female Native teacher. There is no Industrial Training provided. The children appeared neat. At

AMERICAN MISSION NATIVE SCHOOL, AMANZIMTOTI,

forty-seven scholars attended inspection—36 being girls. They were examined in 4 Classes. Class 1 (5 boys 7 girls) read and translated the English language very well; read Zulu perfectly. 2 had got as far in Arithmetic as Long Division; the rest working Sums in Multiplication. The Writing to Dictation was good. Class 2 (5 girls, 7 boys) read 1st Standard Reading Book, though with some difficulty—they appeared, however, to be acquainted with the meaning of most of the words. They read Zulu well, and could work Sums in Simple Addition. They had only recently commenced Writing, and wrote scrawling hands. Both these classes showed intelligence, and evidently took an interest in their duties. Class 3 (6 girls, 3 boys) had only lately commenced the study of English, but could spell long words in both English and Zulu correctly. The rest of the scholars had not advanced beyond spelling easy words. The School is under the charge of two Native teachers. The scholars appeared neat and clean. The School-house, which is of brick and thatched, is in every way suitable for the purpose.

The number in attendance at the

AMERICAN MISSION NATIVE SCHOOL, IFAFA,

when inspected, was 19—10 being girls. The most advanced class (5 in No.) read only indifferently in both English and Zulu. They could work sums in the first 3 Rules in Arithmetic. Those next in advancement could only spell through simple words, and work easy Simple Addition sums. The other scholars had only lately commenced spelling and could repeat a portion of the Multiplication Table. Thirty-one names appeared on the Register, but as it was not properly kept, an average could not be arrived at.

The Teacher is a Native. The building in which School is kept is too small, and generally unsuitable.

AMERICAN MISSION PRIMARY SCHOOL, INANDA,

is divided into an Upper and Lower School. Thirty Scholars were present in the Upper School—21 being girls. This represents the average. The most advanced (5 in No.) read and understand English; also read Zulu well, and were able to work Long Division Sums. Their writing was indifferent. The next class read English fairly, Zulu well, and could work Multiplication. Their writing on slates was unsatisfactory. The 3rd Class read and translated easy sentences in No. 1 English Standard Reader—and worked sums in Subtraction and Division—read Zulu very fairly. 4th and 5th Classes had just commenced study of English, and could also work sums in Subtraction. There were 52 children in the Lower School—29 of whom were girls. (This number is above the regular attendance.) 12 of the children were below the age required. The 1st Class read English School Primer passably, showing a

knowledge of the meaning of sentences read. They read Zulu fluently, but were not advanced in Arithmetic beyond working Simple Addition. They wrote indifferent hands on slates. The rest of the scholars were in all stages of advancement, from having commenced to read easy sentences, down to the Alphabet. The girls are taught sewing three times in the week. The children were neat and clean. Both Upper and Lower Schools are under Native Teachers.

AMERICAN MISSION NATIVE SCHOOL, MAPUMULO.

Attendance at inspection, 49—30 being girls. Ten read English, but proved to have very imperfect acquaintance with meaning of words. Their reading in Zulu was good. Five out of this number were able to work Compound Addition sums, the rest Simple Addition. Their writing was fair, and they showed some acquaintance with Geography. The next (4 in No.) read Zulu, though not fluently, and had only a very superficial knowledge of Arithmetic. The remainder were in all stages, from being able to spell words of three syllables down to repeating the Alphabet. The girls are taught needlework under the supervision of Mrs. Holbrook. There is no industrial training provided for the boys. The School is conducted by two Native girls, one of whom holds a Certificate of Competency from one of the Training Schools. The scholars appeared neatly dressed and clean. The School Building is suitable in all respects. The

AMERICAN MISSION NATIVE SCHOOL, IMUSHANE,

is situated in very broken country, about seven miles S.E. from Mapumulo Station. There were 28 scholars present, being three above the average. All were within the required ages. Nine proved able to read English fairly, showing acquaintance with the meanings of most of the words read. They read Zulu well—wrote fair hands—and had advanced as far as Simple Division. The 2nd Class (3) could read Zulu, and work Simple Addition Sums. The remaining scholars were in different stages of advancement, from Spelling, down to the Alphabet. This School is under the charge of a Native Teacher who was educated at Lovedale, and who holds a Provisional Certificate. The School Room appeared suitable, being a well-built brick structure. The children's appearance was satisfactory as regards neatness. Though this School is situated in a portion of the Native Location, thickly populated by Kraal Natives, still they did not appear to care to send their children.

AMERICAN MISSION NATIVE SCHOOL, UMVOTI.

One hundred and four scholars attended at inspection—the average being 85. Five were over, and nine under, the regulation ages. 46 of these scholars were girls. 1st Class, 12 (all boys), both read and understood English, their reading in Zulu being very good. They were able to work all Rules up to Compound Division. Their writing was also good to dictation, and all appeared well grounded in both Grammar and Geography. The 2nd Class (12 in number) read English intelligently, and appeared to be well acquainted with the meaning of what they read. Their Zulu reading was very creditable—their writing neat. They worked sums in Compound Addition and Subtraction, and were good at Mental Arithmetic. Class 3 (14 in No.) were only able to read easy sentences in English. They did much better in Zulu. Their writing was better than that of 2nd Class. They could work sums in the first two Rules, and were quick at Mental Arithmetic. Class 4 (9 in No.) read Zulu well, English very imperfectly. Had only commenced study of Arithmetic. The rest of scholars (43) could, in the case of the most advanced, spell Zulu and English words of three syllables, and repeat portions of the Multiplication Table. All the scholars are taught music on the Tonic Sol-fa system, and sing very well. The intelligence displayed by these scholars at the Examination was pleasing, and the general tone of the School reflects great credit on the Native Teacher Benjamin, and his Assistant, Henry. All the girls

are instructed in needle work. No provision is made for giving the boys industrial training at the School, but most are employed at the Sugar Mill in their spare time. This is an Elementary School, at which young Natives are prepared for the Higher Schools at Amanzimtote and elsewhere. The School House, which is substantially built of brick, is very suitable.

AMERICAN MISSION NATIVE SCHOOL, UMSUNDUSE.

Thirty-five scholars were inspected, which represented the average attendance—14 of the number being girls. Class 1 (6 in No.) read No. 1 Standard English Reader fluently, translating the words readily into Zulu, in which they also read. All could work sums in the first four Rules of Arithmetic, one being able to do interest. Most were quick at Mental Arithmetic, and showed a fair knowledge of Geography, being able to trace the whole of Africa without difficulty. All write good hands. Class 2 (12 in No.) were able to read simple sentences in English, which they translated into Zulu. This class can work sums in first three Rules of Arithmetic. Class 3 range from the Alphabet to spelling words in English of three and four syllables. Many are more advanced in Zulu, and able to work Simple Addition. Zulu is taught throughout the School. The girls are instructed in needlework and dressmaking under the supervision of Mrs. and Miss Tyler, and make all their own clothes. No industrial training is provided for boys. The School is under a Native Teacher, who deserves credit for the interest he appears to take in his work, and the order and discipline of the scholars, all of whom were plainly, but neatly, clad. The School House is suitable for the purpose, being roomy and well-built. Both Mrs. and Miss Tyler devote considerable attention to this School.

AMERICAN MISSION NATIVE SCHOOL, ESEDUMBINI.

This School is situated in the broken country E. of the Little Noodsberg. Forty-one scholars were under inspection—25 out of that number being girls—2 under and 2 over the required ages. Class 1 (6 girls), read English very well, and showed a thorough acquaintance with meanings of words. They were further able to read Zulu fluently, and could work the first four Rules in Arithmetic, their writing also being good. Class 2 (3 girls, 1 boy,) read English fairly, and were able to give the meaning of most words; they read Zulu well; and could work the first three Rules in Arithmetic—their writing being passable. The rest of the scholars (chiefly kraal children), were learning to read in Zulu, some being able to do Simple Addition Sums. There is no provision for the boys so far as industrial training is concerned, but the girls are regularly instructed in needlework. Specimens of the work produced were very creditable. The children of the Christian Natives were very neatly attired, but most of the kraal children were unclad. The School is under the charge of a female Native Teacher, though Uziwedu (Male), appears on the returns. This Teacher holds a Certificate of Competency from the Inanda Seminary. The School Room is suitable for the purpose.

AMERICAN MISSION NATIVE SCHOOL, ETAFAMASI.

Twenty-three Scholars attended inspection, all of whom were within the ages required—9 out of the number being girls. Class 1 (3 girls, 3 boys) read from English Standard Reader No. 1, and were able to translate the words into Zulu, though not readily; but when the fact of the study of English only having been commenced a little over a year is considered, the progress made has been good. This class read Zulu very well, and wrote good hands, both in Copy Books and to Dictation. All were able to work Sums in Long Division, and showed some knowledge of Grammar. Most Spell well. Class 2 (9 boys, 4 girls) had only recently commenced the study of English, which 5 out of the number read passably, all being

able to read Zulu well. In Arithmetic they were divided, some being able to work Subtraction, while others were not further advanced than Simple Addition—all showed ability in Spelling. Class 3 (6 boys, 4 girls) had not advanced beyond spelling Zulu words of 4 and 5 syllables; some were able to work easy Sums in Addition.

This is an outlying School about 12 miles from Umsunduze Station, and presided over by a Native girl who received 4 years' instruction at the Inanda Training School.

The Scholars, with one exception, were very neatly clothed and clean—pains appeared to have been taken to teach them singing, as all sang well. The girls attend a Sewing Class. There is no provision made for teaching the boys any industrial pursuits.

The School is at present held in a wattle-and-daub building, which is unsuitable, but a larger building is in course of erection. The

AMERICAN MISSION SCHOOL AT HLOKOLOS

was not inspected owing to its not being in session when visited. The grant in aid was withdrawn at the end of the year, owing to the short time school was held during the year. The

AMERICAN MISSION NATIVE SCHOOL, KRUIS FONTEIN,

has ceased to exist, and the grant has (by permission) been transferred to the Native School under the American Mission at Noodsberg, known as

UMBIYANAS,

at which 25 Scholars were examined—14 being girls—all within the ages laid down. The School Register showed a larger attendance, but, owing to the unsatisfactory way in which it was kept, the average could not be ascertained. Class 1 (6 girls) read 1st Royal Standard Reader very well, and were able to translate correctly into Zulu, which they also read fluently. In Arithmetic they were in different stages of advancement, some working Multiplication Sums, others Long Division. All could repeat the Multiplication Tables correctly and recite pieces from English Authors. The Writing was inferior. Class 2 read English School Primer fairly, which most could translate into Zulu; all read Zulu intelligently, and were able to work Addition Sums. Class 3 (3 boys, 1 girl) had not commenced the study of English, and read Zulu with difficulty; they could repeat Multiplication Tables up to "6 times"; the rest of the scholars were not able to do more than spell easy words.

There is no Industrial Training provided for either boys or girls. The School is under the charge of a Native female teacher. All the scholars appeared neatly dressed and clean. The School-house, which is of corrugated iron sides, with a thatched roof, is in every way suitable. The scholars appeared a very intelligent lot, and must have paid great attention to their duties to be as well advanced as they were, considering that the school has only been established a little over two years, and the teachers not being possessed of very high qualifications. It would be advisable that these scholars should be under a better qualified teacher.

AMERICAN NATIVE MISSION NATIVE SCHOOL, GROUTVILLE KRAALS.

There are Three of these Kraal Schools.

No. 1—Etembeni—is situated about two miles East of the Umvoti Station, and had an attendance of 42 when inspected—23 being girls—2 below, 1 above required ages—the average attendance was 35. The most advanced (9 in number) read Zulu fluently—English indifferently, though they read

rendered the meaning in Zulu of the English words read. Most wrote passable hands to Dictation; they had not advanced beyond Simple Addition. 2nd Class were only able to read Zulu, not having been instructed in English; they could do easy Sums in Simple Addition; rest of the scholars had not advanced beyond easy Spelling. All the scholars are from the neighbouring Kraals, and are taught by a Native teacher, who was educated at Lovedale Institute; he appeared well fitted for his duties. The girls are taught Needlework. No provision is made in the case of the boys. The School-room is suitable, being wattle-and-daub, well built, with iron roof.

No. 2—KWA GUDU—

is about three miles N.E. of the Umvoti Station. The attendance numbered 27—19 being girls—4 over and 9 under the required ages. Class 1 (9 in number) read Zulu very well, English indifferently, and could work Sums in Subtraction—3 being able to do Long Division; the Writing not good. 2nd Class (7) read 1st Zulu Book—2 out of number read fluently—the remainder were in all stages, from spelling words of 4 syllables down to the Alphabet. The girls are taught to Sew, and samples of work exhibited appeared to be neatly done. Miss Hance supervises the Sewing Class. The School is presided over by a Native teacher who appeared to be well instructed and intelligent. The School Building is constructed of wood and iron, and is suitable.

No. 3—HAUNGU'S.

The attendance at inspection was 21 (15 girls.) Class 1 (3 in number) read English imperfectly, Zulu well, and worked Sums in Simple Addition; their Writing was indifferent. Class 2.—The more advanced were able to read simple sentences from 1st Zulu Reader, the rest were in all stages down to the Alphabet. This School, which is also on the Mission Reserve, is taught by a Native girl, who had two years' training at the Inanda Seminary. All the scholars are kraal children, and they appeared neat. The girls are instructed in Needlework, and have learnt to make their own clothes. The School Building—which is wattle and daub, thatched—is very dilapidated and not suitable as a school. Another building is to be constructed as soon as possible.

GROUTVILLE MISSION (AMERICAN) NATIVE SCHOOLS.

There are two Schools under this heading. No. 1 Groutville Memorial School is on the Mission Reserve, about $2\frac{1}{2}$ miles north of the Station. 60 scholars were present at the inspection (39 girls), 21 under ages required. First Class (18) read English only indifferently; their reading in Zulu being good. All could work the first 3 Rules in Arithmetic, write fair hands, and showed some knowledge of Geography. Class 2 (also 18 in number) appeared in all stages of advancement from being able to read Zulu passably down to the spelling easy words. The rest of the scholars (24) were less advanced. Instruction in needlework is given to the girls once in the week. No provision in industrial training is made for the boys. The School Room is well-built and very suitable, being a substantial Brick Building. Native teacher has charge. All the scholars were very neatly dressed, and appeared bright and intelligent.

GROUTVILLE MISSION NATIVE SCHOOL, No. 2, UMNUNDWINI,

is about 2 miles distant from the Umvoti Station on the S.W. and is on the Mission Reserve. At the time of inspection the attendance was 32 (average 35), 1 over and 7 under the required ages, 23 being girls. Class 1 (5 in No.) read English very fairly, but were unacquainted with the meanings of the words. All read Zulu very well, wrote good hands, and could work sums in the first three Rules in Arithmetic. Class 2 (6) also read English fluently; but, like the First Class, were unable to render the meanings of the different words; their reading in Zulu was good. Third class was not further advanced in Arithmetic than

Simple Addition. The 3rd Class had only just commenced reading in Zulu, and read very indifferently. The rest of the scholars were less advanced. A Native Teacher, who was educated at Lovedale, and holds a Teacher's Certificate, was in charge. The girls are instructed in needlework. All the scholars appeared clean. School suitable.

HANOVERIAN MISSION NATIVE SCHOOL, HERMANSBURG.

The scholars at this School were very backward. 36 were present at inspection, 25 being girls; 3 of the girls were over the required age. Class 1 (17 girls, 1 boy,) read Zulu indifferently, and could only work the easiest sums in Simple Addition. They had no knowledge of English, the Writing was very indifferent. Class 2 (7 boys) also read Zulu indifferently, which appeared all that the class could do. Class 3 (8 girls, 2 boys) proved only able to spell the easiest words in Zulu. English is not taught. The girls are instructed in needlework one-and-a-half hours per week. Specimens of the work produced were creditable. No industrial training is provided for the boys. The School is under a Native Teacher named Panl. It cannot be characterised as satisfactory. The Building is adapted for the purposes of a School, being a brick structure and roomy.

THE HANOVERIAN MISSION NATIVE SCHOOL, ETEMBENI,

situated on the Mooi River, has not yet been inspected.

HANOVERIAN MISSION NATIVE SCHOOL, NEW HANOVER,

had an attendance of 26—15 girls—3 of whom were over age. Class 1 (6 girls, 2 boys,) read Zulu well, English imperfectly, writing on slates passable. This class could work the first three Rules in Arithmetic. All are instructed in Sacred History, with which they were well acquainted. Class 2 (5 boys, 3 girls,) read well in Zulu, and wrote scrawling hands on slates. The study of Arithmetic had only recently been commenced, and the scholars were unable to do more than work the easiest sums in Addition. Class 3 (6 girls, 4 boys,) had not advanced beyond spelling easy Zulu words. A Native Teacher presided, who did not appear qualified to take sole charge of such a School. The children were neatly dressed. There is no industrial training provided for either boys or girls. The School Room, which is part of the Teacher's House, is entirely unsuitable, and a more suitable place should be provided.

HANOVERIAN MISSION NATIVE SCHOOL, MARBURG.

There was an attendance of 13 scholars at inspection. Class 1 (2 girls, 2 boys,) proved only able to spell the simplest Zulu words, and that with difficulty, and were barely able to work the easiest Sums in Simple Addition. None of them were able to write. Class 2 (7 girls, 2 boys,) had not advanced beyond spelling easy Zulu words. Some of the scholars were said to be absent, but as there is no Register kept it is impossible to say what the attendance is. The School is under the Rev. H. Deppe. No industrial training is provided. The School Building is a substantial Brick Building, and in all respects suitable. This School is far from satisfactory.

WESLEYAN MISSION EDENDALE TRAINING SCHOOL.

This Institution is designed specially for the higher training of Native youths, and is divided into two departments, a Theological and Secular. The first for the education of natives as Preachers and Evangelists, and the second as Teachers and Interpreters. The students are taken for a term of three years, the parents paying a small sum per annum towards expenses. Accommodation is provided for 40. At present there are 22, 18 out of that number being present at the inspection. These were divided into three classes. The First Class (11 boys) read in English very well indeed, which they readily translated into Zulu. Their

writing to dictation was good. All were sufficiently advanced in Arithmetic to work vulgar fractions, showing a thorough acquaintance with the previous rules, were well grounded in English Grammar, and able to do most of the Exercises in Hall's Geography. At the time of inspection they were engaged on the Geography of Africa and other British Colonies, and Geckie's Physical Primer, also studying McLearn's Bible History. The rest of the students were in a less advanced state, though making very satisfactory progress under all the above heads.

The Building, which is large, double-storied and new, is very suitable, affording every convenience and comfort to the students. Everything appeared to be conducted with great order and system. The Dormitories were clean and neat, meeting all requirements. The provision made for feeding the students was good, and the amount of food allowed ample. During two hours in the day for five days in the week, and the whole of Saturday forenoon, instruction is given in cultivation. There is a workshop attached to the Institute at which the repairing of implements is taught, also a laboratory for instruction in the Elements of Chemistry. Lessons in singing are given on the Tonic Sol-fa system. The Institute at the period of inspection was under the supervision of the Rev. E. Nuttall, assisted by a Native who was trained at Heald Town, where he passed with honours, and there is no doubt as to his suitability for the position he holds. That the Institute is in its present satisfactory state is greatly owing to Mr. Nuttall's influence and energy. At the

WESLEYAN MISSION EDENDALE PRIMARY NATIVE SCHOOL

Fifty-eight Scholars were inspected, 17 being girls. 1st Class (6 boys) read and understand English, which they readily translated into Zulu; 4 out of the 6 work Practice, the Writing in each case being good. As a class, the scholars were well grounded in both Grammar and Geography, and smart at Mental Arithmetic. The 2nd Class read and translated English fairly. All do Compound Rules, Write fair hands, and showed some knowledge of Geography. 3rd Class (7) also read and translated English, though not far advanced, and work Simple Addition sums. The rest of the scholars had not advanced beyond Spelling. The scholars appeared neat and intelligent. They have instruction in manual labour twice in each week in the school grounds—tree-planting, &c. Both boys and girls are instructed in Needlework. In addition to the scholars in the Primary School 25 girls are taught by a lady teacher. The school is presided over by a Native teacher, but Mr. Nuttall devotes much time to its supervision. It is in a very satisfactory state.

WESLEYAN MISSION NATIVE SCHOOL, NDALENI.

49 scholars were present at inspection—14 being girls all within the age required. Class 1 (4 boys) read English fluently, which they readily translated. Their Reading in Zulu was very correct. In Arithmetic all were as far advanced as Reduction, and possessed a fair knowledge of both Grammar and Geography; the Writing in each case was particularly neat. Class 2 (7 boys, 1 girl) read and translated English creditably, their reading in Zulu being good. All were able to work Long Division Sums, and had some knowledge of Geography. Their Writing was neat. Class 3 also read and translated English well, and were able to work Multiplication Sums with ease. This class only lately commenced Writing. Class 4 (4 girls) read English fairly, but translated indifferently. Their Reading in Zulu was much better; they worked Sums in Simple Addition. Class 5 (3 boys, 5 girls) had just begun the study of the English language. Class 6—Spelling from English Reading Sheets—the rest of the scholars had not advanced beyond spelling easy words. The School is under a Native teacher, who was educated at Capetown,

and who appeared to be quite qualified for the position. The Reverend J. Allsopp devotes much attention to this school. The scholars, without exception, were neat and remarkably intelligent. The School Building meets all requirements. The girls are instructed in Needlework twice in each week. No provision has been made for the boys. The

WESLEYAN MISSION SCHOOL, KLEIN FONTEIN,

has not yet been inspected. At the

WESLEYAN MISSION SCHOOL, VERULAM,

there were 31 scholars present, 20 of the number being girls. The average attendance appeared to be 25. Class 1 read English fairly, but were unable to give the meanings of a single word they were asked to translate. All worked Sums in Multiplication, but could not write. Class 2 read English imperfectly, and, like the 1st Class, proved unacquainted with the signification of words; they had not advanced beyond Simple Addition in Arithmetic, and could only work easy Sums. The rest of the scholars were unable to do more than repeat the Alphabet. There were no Zulu books in use, those used being Ixozza. The girls are instructed in Sewing for an hour each day. There is no Industrial Training for the boys. The scholars are taught by a Native girl, Mary Matiwana, who, though she may have received a fair education, should not have sole charge of such a school. There was a want of progress shown throughout the school, which ought not to be the case, considering that it is amongst the oldest schools of the Colony, and a change for the better might fairly be required, considering the amount of the grant. The Schoolroom is constructed of wood and iron, and is suitable. The

WESLEYAN MISSION SCHOOL, PIETERMARITZBURG,

was attended by 30 scholars at inspection—the majority being half-castes. Class 1 read English well, but could not give satisfactory answers as to the meanings of words. These scholars could work the Compound Rules with readiness. Class 2 read English fairly, but experienced the same difficulty as the First Class in rendering the meaning of words. They had not advanced beyond Subtraction. The other classes were in a less advanced state, though all are taught English. No Zulu is taught, owing to an objection raised by the parents, who are not Zulus, to the use of that language. The girls are instructed in needlework; the boys have no industrial training. The Teacher (Mrs. Mendenhall), explained that the great obstacle which stood in the way of advancement in the School lay in the fact of the parents taking the children away for long periods at a time. The School House is suitable in all ways. The

WESLEYAN MISSION NATIVE SCHOOL, DREI FONTEIN,

has yet to be inspected. At the

WESLEYAN MISSION NATIVE SCHOOL, CEDERA STATION,

there were 19 scholars present—13 out of the number girls. Class 1 (2 girls, 1 boy,) could read English fluently, but showed an utter want of knowledge respecting the meaning of what they read. They were able to do the first three Rules in Arithmetic, showing aptitude and intelligence. Their writing was good. Class 2 (2 boys, 2 girls,) read English passably, though experiencing the same difficulty in translating as First Class. They were not further advanced than the Second Rule in Arithmetic. Class 3 (4 girls, 1 boy,) read English very indifferently, and could only work Simple Addition. The rest of the scholars had not advanced beyond spelling easy words. The children appeared neatly dressed, especially the girls. The Zulu language is not taught, nor is there any industrial training provided for boys or girls. A Native Teacher presides. School House is satisfactory.

WESLEYAN MISSION NATIVE SCHOOL, LANGE KOP, DRAVENDE.

The attendance at inspection was 15 (12 girls). This appeared to represent the average; but there is no proper register kept, so that the average cannot be accurately given. Class 1 (2 girls and 2 boys) read English well, which they readily translate; their reading in Zulu proved very correct; 2 of the more advanced scholars work Compound Rules, the others Simple Division. Class 2 (2 girls) read English fairly, but could not render that language into Zulu. They were working Multiplication Sums. Class 3 (4 girls) could spell easy Zulu words; the rest of scholars were not beyond Alphabet. Both First and Second Class write good round hand. The school is under the care of a female Native Teacher who was educated at the Inanda Seminary, and holds a teacher's certificate. The scholars all appeared neatly dressed. School is held in one of the rooms of a Native's house, which is only 12 x 16, and unsuitable, being too small. There was a great want of books and other school material. No industrial training is provided.

WESLEYAN MISSION NATIVE SCHOOL, WENTWORTH (LATE UMBILO).

This school appears on the Returns as Umbilo; it has, however, been transferred to Wentworth, owing to the falling off of scholars at Umbilo. On the day of my visit there were eleven scholars present, 3 out of the number were under 5 years of age. The average attendance, as shown by the Register, was 12. Only 2 out of these scholars could do more than repeat the Alphabet; these two made an attempt to read in English, which they did in a very imperfect manner, understanding little or nothing of what they read. The majority of the scholars attending this school are Zanzibar children; there was 1 Indian child present. The scholars had a dirty and slovenly appearance. The school-house is constructed of bush wood, covered with old zinc case linings, and fast going to decay. This building is in no way suitable. The school is presided over by a Native Teacher. I regret that I cannot say it is satisfactory.

WESLEYAN MISSION NATIVE SCHOOL, ENDWEDWE.

The average attendance at this School, as shown by the Register, was 26. There were 32 scholars present at the inspection—16 out of the number girls—4 under 5 years of age. Class 1 (4 in number), read in English imperfectly, having but a limited knowledge of the signification of the words read. They were able to work the first three Rules in Arithmetic. Class 2 read easy sentences in English, which they also were unable to translate. In Arithmetic these scholars were divided, some being able to work sums in Multiplication, others in Subtraction. Neither of these classes could write. Class 3 had just commenced the study of English, and could do Simple Addition sums. The rest of the scholars were in different stages of advancement, from being able to spell words of 3 syllables to repeating the Alphabet. No Zulu is taught in the School, which is under the charge of a Native Teacher. The scholars, in most instances, appeared neat and clean. The School House, though wattle and danb, is well-built and suitable in every way. There is no industrial training provided for boys or girls.

WESLEYAN MISSION NATIVE NIGHT SCHOOL, PIETERMARITZBURG.

On the evening the inspection was held 60 scholars were present, mostly adults. The most advanced (7 in number,) could read English fairly, but could not give the meaning of words. They wrote fair hands; their reading in Zulu was good. They could work Simple Addition sums. The rest of the scholars were learning to read and write Zulu, in which most had made some advancement. A Native Teacher presides, and is assisted by some of the more advanced scholars. Though the scholars appeared intent upon their studies, still a want of system was apparent, which may, perhaps, be attributable to the fact of the Teacher being a Native. All the scholars were neatly dressed. The School House is constructed of brick. There is no industrial training provided

WESLEYAN MISSION ADULT EVENING SCHOOL, DURBAN.

The attendance when visited was 42—27 over the age allowed—3 being women. Class I (16) read English very fairly, which they also readily translated into Zulu, which language they also read fluently; all wrote good hands, and were able to work Division Sums. Class 2 (6) read and wrote Zulu very creditably; the remainder of the scholars were in a less advanced state. A Native teacher had charge of the School and appeared well qualified for his duties. The Schoolroom is constructed of brick, and quite suitable for the purpose. The scholars were neat and much interested in their duties. There is no provision made for Industrial Training. The

WESLEYAN MISSION SCHOOL AT GEORGEDALE

has not yet been inspected. At the

WESLEYAN MISSION NATIVE SCHOOL, DRONK VLEI,

Twenty-six Scholars were present for inspection, which number appeared to exceed the average by 8. Out of those scholars present 14 were girls; all were within the required ages. Class 1 (2 girls, 2 boys) read English very indifferently, and proved unable to render any explanation of the signification of the words; 2 were able to work Sums in Multiplication, 2 in Subtraction, though with difficulty. Class 4 (4 girls) attempted to read English, but failed; 2 could work 1st Rule in Arithmetic. The rest of the scholars were unable to do more than spell easy Zulu words. The children, in many cases, presented a dirty and slovenly appearance. No Zulu is taught, nor is there any provision for Industrial Training. A proper supply of school material was wanting. The School-house built (of yellowwood slabs) is dilapidated and unfit for the purpose. The record showed that no school had been held between May and August last, nor was there any regularly appointed teacher. It need scarcely be added that this school was in a very unsatisfactory state.

SCOTCH MISSION TRAINING SCHOOL, PIETERMARITZBURG,

numbered 27 at inspection (average being 30). Class 1 (5 in number) read and translate English very well; also read Zulu fluently. All wrote good hands, were as far advanced as Vulgar Fractions in Arithmetic, and showed a fair acquaintance with Geography. Class 2 (6) also read English and Zulu intelligently, work sums up to Reduction, and have some knowledge of Geography. Class 3 (4) read both English and Zulu fairly, and work Simple Addition sums. The rest of the scholars are beginners. All are within the required ages. The Rev. A. E. Taylor, under whose charge this school is, deserves great credit for the advancement made by the scholars, and the general satisfactory state of the school. No provision has been made for giving the boys an industrial training; but the girls receive instruction in needlework twice in the week. Part of the church is used as a school-room, and meets all requirements.

SCOTCH MISSION NATIVE SCHOOL, CEDERA,

is an outlying school, situated about 12 miles N.W. from Pietermaritzburg. 14 scholars were present on day of visit, all of whom were neatly dressed, and presented a clean appearance. Class 1 (3 in number) read and translate English in a very satisfactory manner, 1 worked sums in Long Division, 2 in Subtraction; all writing fair hands. Class 2 read English indifferently, and were unable to explain the meaning of what they read; the writing was very creditable; they had not advanced beyond Simple Addition in sums. The rest of the scholars (5 in number) were only able to repeat the Alphabet. Zulu had not been taught up to the time of inspection. The Native Teacher in charge appeared capable of imparting the knowledge required. There has not been any provision made for industrial training. The school-house, which is wattle-and-daub, is in good repair, and answers the purpose well.

SCOTCH MISSION NATIVE SCHOOL, EMPOLWENI.

The average attendance at this School is 81—62 scholars were present on day of my visit—29 of the number girls—6 under age. First Class (numbering 9) read English Standard Reader No. 3 fluently, and rendered correct translations of the words into Zulu. They were sufficiently advanced as a class to work Compound Rules, three having got as far as Practice and Proportion. All wrote good hands, and showed a very fair acquaintance with both Geography and Grammar. Class 2 (12) read and understand English imperfectly, but read Zulu in a satisfactory manner, their handwriting was particularly commendable. All in the class could work Compound Multiplication, and, with the First Class, were smart at Mental Arithmetic. Class 3: With one or two exceptions, these scholars showed an imperfect knowledge of English, in which they read with hesitation and difficulty, but all read well in Zulu. Some had advanced in Arithmetic as far as Division. Class 4 proved not far advanced in either English or Zulu reading. The rest of the scholars were learning Alphabet. The School is under the charge of Miss Miller, a lady who appeared to take great interest in the work, and who is assisted by a Native Teacher. The girls (50 in number) receive instruction in sewing three times in the week. The boys do not receive any industrial training. All the scholars are Station children, and presented a particularly neat appearance. The School Building provides ample room, and is a substantially built brick structure, roofed with iron. The above School reflects great credit on all concerned. The

SCOTCH GORDON MEMORIAL MISSION SCHOOL

has not been inspected as yet.

THE BERLIN MISSION SCHOOL, NEW GERMANY,

is one of the old established Native Schools of the Colony, with an average attendance last year of 50 scholars. The attendance at inspection numbered 53—29 being girls, all scholars were within required ages. Class 1 (4 girls, 1 boy,) read English Standard Reader No. 1 fairly well, but failed in many instances to give satisfactory translations of the words. All read Zulu intelligently. They showed a thorough knowledge of Arithmetic up to Compound Rules, and were particularly smart at Mental Arithmetic. Class 2 (5 boys, 8 girls,) could read sentences from English School Primer, and, considering that they had not long taken up the study of English, their reading was satisfactory. All read Zulu fluently. They had not advanced beyond the first two Rules in Arithmetic. The writing was particularly neat, and spelling correct. Class 3 (6 boys, 6 girls,) had only lately commenced to read Zulu, and had made considerable progress. Most could write passably on slates. The rest of the scholars had not got beyond spelling easy words. All were neat and clean. The School is under the supervision of the Misses Posselt. The girls attending the School are instructed in needlework twice in the week by these ladies, and specimens of their work shown appeared well and neatly done. The scholars manifested great intelligence throughout the examination, and the School showed evidences of being conducted in a very satisfactory manner. No industrial training has as yet been provided for the boys, but an industrial department for their benefit is in contemplation. The School House meets all requirements. The

BERLIN MISSION SCHOOL, EMMAUS,

has yet to be inspected. The Inchanga School, under the same Mission, was closed when visited, owing to the want of a suitable teacher, who has since been appointed and the school re-opened.

THE BERLIN MISSION NATIVE SCHOOL, KÖNIGSBERG,

has not been inspected up to the present.

THE NORWEGIAN MISSION SCHOOL, UMPUMULO,

has an average attendance of 25. 29 were present at the inspection, 26 out of the number being girls; 1 boy and 2 girls were over the regulation ages. Class 1 (15 in number) read Zulu well, but are not far advanced in the study of English, which has only lately been commenced; all showed a very fair acquaintance with the first four rules in Arithmetic and Geography; their handwriting was exceptionally good. The rest of the scholars were in different stages of advancement, from spelling, down to repeating the Alphabet. The girls at this school were instructed in needlework till lately, when it was discontinued, but will be resumed at an early date. Specimens of work exhibited were very neatly done. There is no provision made for other industrial training. The Rev. Mr. Nilson has charge of the school. The school-house is built of brick, roofed with iron, and is suitable.

THE NORWEGIAN MISSION KRAAL SCHOOL, UMPUMULO (No. 2),

is situated within the Mission Reserve, in very broken country, about one and a-half miles from the Station, and is attended entirely by kraal children, 27 of whom were present when this School was visited. The most advanced (3) were only able to read Zulu, and that indifferently; 8 could spell words of two and three syllables, the rest were learning the Alphabet. The scholars did not present a particularly neat appearance. The school is under the charge of a Native Teacher. The school-house, though wattle-and-daub, is suitable for present requirements, being in good repair. The

NORWEGIAN MISSION NATIVE SCHOOL, UMPUMULO (No. 3)

is also within the Mission Reserve, 6 miles from the Station. The attendance at inspection was 15—10 girls—5 of the scholars over the age laid down. Out of those present 1 could read Zulu, though very imperfectly, 2 could spell easy words—the rest were barely able to repeat the Alphabet. All the scholars were from the surrounding kraals, and were very scantily clad. The same teacher presides over this school as No. 2. The attendance is poor and irregular, the surrounding heathen natives showing very little sympathy with the effort set forth to instruct their children, who expressed a desire to be taught. Neither of these schools can be reported upon as in a satisfactory condition, or could not, at all events, up to the time of inspection. The school-house, though wattle-and-daub, is in fair repair and roofed with iron.

UNDENOMINATIONAL NATIVE SCHOOL, IXOPO.

This School was classed in the Return for 1884, under the above heading, but has since been taken over by the Wesleyan Mission Society. 35 attended the inspection—12 of this number were over the stipulated age. 22 scholars were girls. Class 1 (3 half-casts) had only commenced the study of English just before my visit; their knowledge of which proved to be very limited. Only 1 was able to work easy Sums in Simple Addition; the Writing of two was passable. Class 2 (4 in number) read very imperfectly in English, only 1 having any idea of the signification of words. One scholar in this class was able to read Zulu. None possessed any knowledge of Arithmetic; out of the remainder of the scholars, only 2 were able to read Zulu, and that indifferently; the ability manifested by the rest being confined to spelling easy words. This school, which is at present under the charge of a Native teacher, ought to be under the more direct supervision of some European, for though there is no doubt that the teacher is possessed of ability, still I do not think him capable of undertaking the entire responsibility of such a school. There is no provision made for Industrial Training. The School Building is very suitable, being built of burnt brick and almost new.

THE UNDENOMINATIONAL NATIVE SCHOOL, IKWEZI LA MACI,

presented 6 scholars for inspection—3 out of the number were girls. There was one scholar beyond the required age, and he was the only one who attempted to read in English, which he did indifferently. This scholar could work sums in the first two Rules in Arithmetic, and read Zulu passably. The rest of the scholars were barely able to spell the easiest Zulu words. All were neatly dressed. The School House, which is constructed of slabs of wood and thatched, provided suitable accommodation. The Register, though badly kept, showed a much larger number of names, but the Native Teacher in charge informed me that the names in no way indicated the attendance, which seldom exceeded the numbers I saw. In fact, I noticed that the average attendance for July last was 5, and for August 6.

UNDENOMINATIONAL NATIVE SCHOOL, ROCK FONTEIN.

Owing to the School at Rock Fontein having been discontinued, I was unable to inspect it.

GENERAL REMARKS.

Two causes have combined to render the giving of anything like a faithful record of the attendance at the different Schools, and the attainments of the scholars most difficult. The first cause is to be found in the very unsatisfactory way in which the Registers have been kept, and the want of uniformity in the Registers themselves. In some of the Schools something like system has been adopted, in others records of attendance have been made in old Copy Books, or even on stray sheets of foolscap, and the entries made in a spasmodic manner, rendering it impossible to arrive at any satisfactory conclusion therefrom. This refers specially to those Schools under the sole charge of Native Teachers—who, in some instances, have failed to keep any record whatsoever. Uniform Registers have now been issued to all the Schools, which, if kept with anything like system, will furnish all necessary information for the future.

The second cause is, that there have not been any Standards in use up to the present by which scholars could be classified and their attainments judged. The following standards have been authorised and issued lately to all the recipients of grants in aid of Native Schools, and by these all scholars will be classified in the future, which will tend to render the inspection of the Schools much more satisfactory, and the information gained more reliable :—

STANDARDS OF ATTAINMENTS UNDER WHICH SCHOLARS IN THE DIFFERENT AIDED NATIVE SCHOOLS WILL BE CLASSIFIED.

REQUIREMENTS.	STANDARD I.	STANDARD II.	STANDARD III.	STANDARD IV.	STANDARD V.
READING ...	Easy sentences in 1st Zulu Reading Book.	Read from 1st English Primer, translating the words into Zulu. Read 1st Zulu Book.	Read from Standard III. Reading Book, and translate into Zulu. Read Zulu Book.	Read from Standard IV. Reading Book, translate into Zulu and explain the words.	Read from Standard Reader or other book any ordinary narrative fluently, translating such sentence correctly into Zulu. Read Zulu fluently.
WRITING ...	Write on Slates Figures and Words in Zulu.	Write 3 lines dictated from English Reader No. 2. Write both English and Zulu words in copy book.	Write ordinary passages dictated slowly in both English and Zulu. (Capitals and Figures, large and small hand.)	Write to dictation passages from Reader. Write text and small hand in copy books.	Write freely to dictation in round or small hand (good).
ARITHMETIC ...	Repeat Multiplication Tables and do the first three Rules in Arithmetic.	Long Division and all former Rules.	Compound Rules (money).	Division and Rednction of Money. Weights and Measures.	Practice, Bills of Parcels, and Rule of Three by the method of Unity. Addition and Subtraction of Proper Fractions with denominators not exceeding 20.
GEOGRAPHY	Outlines of Political Geography (Natal).	Physical and Political Geography, Natal and South Africa particularly.	More detailed Physical and Political Geography (Africa).
GRAMMAR	Point out Nouns, Verbs, Adjectives, Adverbs, and Personal Pronouns.	Parse simple sentences, and illustrate the use of parts of speech.	Analyse and Parse sentences.	Analyse and Parse Complex Sentences, Prefixes, and Affixes (with derivation).

NATIVE EDUCATION.

Experience tends to establish the belief that there is a growing desire on the part of the natives for education. This is particularly the case with those residing in the vicinity of Mission Stations. In justification of this opinion may be instanced the kraal natives residing within a radius of 8 miles of the Umsunduze Mission Station, those around the Lindlay (Inanda) Station, and the Chiefs Timimi, Umkonto, and Sakayedna. The former have desired Miss Tyler to establish schools for the benefit of their children, who signified her readiness to comply if suitable buildings could be erected, and as an earnest of their sincerity these kraal natives procured the necessary material, which they had to carry a considerable distance. Two schools have been established in this way, one at a place named Undondolo, about 8 miles from the mission, and another at Engonyameni (with an average attendance of 20 scholars) about four miles from the same point. The children purchase their own books at both these schools as well as material for suitable garments. The school at Engonyameni was visited, and there is no doubt as to the satisfactory nature of the work being done amongst the native children. Then the chiefs Timini, Umkonto, and Sakayedna have asked that schools may be established amongst their people. In the case of the first two mentioned, the appeal has been made to the Norwegian Mission at the Mapumula, Sakayedna having appealed to His Excellency the Governor direct. It may be urged, with reference to those natives residing within the Mission Reserves, that they feel in some measure bound to send their children to the schools provided, but both in the cases of the chiefs cited as well as in many others which could be mentioned, there are instances of those removed from all such influence soliciting education for their children, which may fairly justify the conclusion that the benefits of education are becoming year by year more appreciated by the native races of this Colony.

NATIVE TEACHERS.

The question of procuring suitable and reliable Native teachers is one great difficulty with which those connected with Native Schools have to contend. Native teachers are obtainable, but their suitability, both so far as their education and general qualifications are concerned, is open to question. This difficulty has been pointed out almost universally by those who are responsible for the different schools. The want is being met to a certain extent by sending young Natives to such places as Lovedale, Heald Town, Amanzimtoti, Edendale, and Lindlay Training School, for the purpose of being properly trained as teachers eventually, but these places can only relieve the difficulty for years to come; in fact, it is questionable whether Native teachers if placed in sole charge of schools (with perhaps a few exceptions) will ever be a success. When under direct European supervision, these teachers appear to do very well, and the scholars have shown remarkable progress; but when left entirely to themselves there has appeared to be a want of energy, system, and discipline. The expediency of the employment of female Native teachers in schools where a large proportion of the scholars are boys, is open to question. Many of the Native teachers at present in charge of schools hold nothing to show that they are in any way qualified to undertake the duties assumed, and the question of the necessity of all such teachers being certificated has been raised, and is at present under the consideration of the Council of Education, as well as that of establishing a system of training for Pupil Teachers.

KRAAL SCHOOLS.

Though a great proportion of the scholars in these schools are the children of heathen parents, and not as a rule far advanced, yet it would be unfair to characterize them as being of little use. It

must be ever remembered that those attending them have required to have even the rudiments of education drilled into them, and that they are surrounded by many difficulties and disadvantages in connection with their school life—such as being taken away from school by their parents on every slight pretext, and the influences of kraal life. These schools have their use; they bring the Native children under a certain amount of discipline, give them an insight into the usages of civilization, and create a desire for extended knowledge, which has, in many instances, resulted in such scholars coming out from the degrading influences of heathenism and becoming good citizens.

In some instances more might fairly be expected for the sums expended on these Kraal Schools, it will, however, be unnecessary here to particularise.

Industrial training is made one of the conditions in the Native Education Law No. 1 of 1884, and an absolute one, and the question has been repeatedly asked by those interested,—What is understood by Industrial Training? That has now been defined as follows —“No training can be regarded as industrial that does not provide for the teaching of trades or agriculture, or some productive labour that would enable the student to earn a living.” Under these conditions there are but three Schools out of those receiving grants in aid which are carrying out the provision fully.

In pointing out the non-fulfilment of the Law to the responsible parties, the impossibility of carrying out the required conditions has been urged, and as the answers have in every instance been the same, one may be quoted as conveying all—“To provide even the elements of Industrial training for the male scholars would necessitate the employment of at least one competent artizan, suitable buildings, tools, &c., which could not be done without considerable outlay, and we have no funds at our disposal for this purpose. We are, therefore, unable to do more than simply impart what learning our funds will allow. If anything is to be done, therefore, in the way of industrial training, we see no other course than that the Government should either increase the grants in aid to meet the additional expenditure or undertake such instruction, by the formation of industrial schools at central points.” In the majority of Aided Native Schools provision has been made for the elements of industrial training in the case of girls, and a good work in most is being done so far as the imparting of an ordinary education is concerned, which it would in my opinion be inexpedient to cause to be discontinued. The discretionary power conferred on the Council of Education by Clause 1 of Law No. 13, of 1885, will meet the difficulty.

The buildings in use as school-rooms are, with the exceptions mentioned in my report, suitable for the purpose.

FRED. B. FYNNEY,
Inspector of Native Education.

Pietermaritzburg, 7th February, 1886.

INDIAN SCHOOL REPORT.

1885.

R E P O R T

ON

INDIAN SCHOOLS FOR 1885.

REVENUE AND EXPENDITURE.

“The Indian Immigrant School Board shall have power to administer such sums of money as may be voted, from time to time, by the Legislative Council for the purposes of the education of children of Indian parents.” (Sec. 3 of Law No. 20, 1878.)

The only sum at the disposal of the Board was £1,500 “Grant, Indian Education,” voted by the Legislative Council for the year 1885.

The Expenditure has been as under :—

	£	s.	d.
Inspector's Salary and Travelling Allowance	350	0	0
Travelling Expenses of Members and Secretary	67	10	0
Teachers of Board Schools	174	0	0
Pupil Teachers at ditto	7	10	0
Ditto at Aided Schools	20	15	0
Rent, Tongaat Board School... ..	24	0	0
Repairs and Improvements to Buildings, &c., of Board Schools	22	11	8
Furniture and Books for ditto	12	13	4
Prizes	15	0	0
Books for Aided Schools	33	0	0
Material for Salisbury Island School Building	5	1	6
Stationery, Printing, Apparatus, Sundries, and Petty Expenses	32	9	5
Carried forward	764	10	11

						£	s.	d.
Brought forward						764	10	11

						£1,461	4	3

The Board held eight meetings during the year 1885. The Inspector's Report on the condition of Indian Schools is appended. The Board has reserved for further consideration portions of the Report in which certain opinions of the Inspector are expressed, accompanied by the recommendations of that Officer. The document, therefore, except in so far as it deals with existing facts, must be viewed as the Inspector's Report rather than that of the Board.

W. BROOME,

Secretary to the Indian Immigrant School Board.

Education Office, Natal.

March 15, 1886.

Durban,

9th February, 1886.

Sir,—I have the honour to submit my Annual Report on the Indian Schools of this Colony for the Year 1885.

SCHOOLS.

2. During 1885 Twenty-five Schools have been under inspection. Of these 3 are Board Schools, i.e., maintained entirely at the Board's expense—22 are Aided Schools, in receipt of grants ranging from £12 to £50 a-year.

3. The Schools are classified as follows:—

Board.	Increase compared with 1884.	Aided.	Increase compared with 1884.	Total.
Board ... 3	...	Departmental 1 Dean Green 1 Archdeacon Barker ... 2 Dr. Booth 9 Rev. S. H. Stott 6 Father Barret 1 Private Adventure ... 2	3	25
Net increase Board	...	Aided	4	4

During the year one Private Adventure School, Vinden's, Pietermaritzburg, has been closed owing to failure of attendance.

4. The table shows the number of School, number of Pupils on the Register, and an increase during the past three years.

Year.	Board Schools.			Aided Schools.			Total.		
	Schools.	Pupils.	Increase.	Schools.	Pupils.	Increase.	Schools.	Pupils.	Increase.
1882	10	323	...	10	323	...
1883	1	40	40	17	971	648	18	1,011	688
1884	3	203	163	18	1,168	197	21	1,371	360
1885	3	205	2	22	1,275	107	25	1,480	109

There were nominally eleven Schools in operation in 1882—in reality only ten, with an average attendance of 224 pupils, some of whom were Night Scholars. The progress indicated is real, but not without an element of instability, the impulse having come from above, not from below.

5. Table showing the condition of Indian Schools during 1885 :—

32	31	27	26	29	
20	21	13	17	18	
18	13	11	9	12	
31	33	25	20	27	
8	12	14	14	12	New School Closed.
9	9	Closed.
505	604	548	563	576	

6. The average daily attendance for the year is 576, or 39 per cent of the number on Register, against 476, or 35 per cent., in 1884. But if the actual working number on the Registers be taken, this percentage is increased to nearly 80.

7. The table shows the attendance in Board and Aided Schools during 1885.

Schools.	No. on Register.			Increase over 1884.	Average Daily Attendance.	Increase over 1884.
	Boys.	Girls.	Total.			
Board	189	16	205	2	93	14
Aided	1,068	207	1,275	107	483	86
Totals	1,257	223	1,480	109	576	100

8. The number of pupils on Register is 1,480, against 1,371 in 1884, and 1,011 in 1883. Of these 205 have attended the Board Schools, against 203 in 1884, and 40 in 1883. The number of Girls in attendance (223) is greater than in previous years, but is still insignificant. I estimate the number of Boys of School age, who do not attend School, as from 1,000 to 1,500, the majority of these are already at work.

9. The Indian population is very scattered. Besides the Coolies employed on farms and estates stretching along the Coast line from Tagela to the Umzimkulu, and from Durban inland to the Drakensberg (too few in numbers generally to support a school of any sort) Indians are to be found in twos and threes everywhere. They will not, as a rule, suffer their children to go any distance from home by themselves, even where the Railway is available, and I have offered to arrange for their being taken at the nominal school rate. It has been in vain. Only if the teacher will undertake to fetch them and see them home again will they trust them out of their sight.

10. The work of the Schools has been tested by an examination held in November and December last, according to the following Schedule of Standards :—

STANDARD I.

English.—Read from Standard I. Reading Book, learn by heart 20 lines of simple verse, and know their meaning.

Writing.—Write 10 easy words from Dictation; show Copy Books (large hand).

Arithmetic.—Notation and numeration up to 1,000; Simple Addition and Subtraction; Multiplication Table up to 6 times 12.

STANDARD II.

English.—Read from Standard II. Reading Book, learn by heart 40 lines of Poetry, and know their meaning.

Point out Nouns and Verbs.

Geographical terms simply explained. Point out Continents and Oceans.

Writing.—Write three lines dictated from Standard Reader.

Show Copy Books (large and half text.)

Arithmetic.—Notation and numeration up to 100,000. The four simple Rules. Multiplication Table. Pence Table to £1.

STANDARD III.

English.—Read from Standard III. Reading Book.

Recite with intelligence and expression 60 lines of Poetry.

Point out Nouns, Verbs, Adjectives, Adverbs, and Personal Pronouns, and form simple sentences containing them.

Chief Countries, Towns, and physical features of the Continents.

Writing.—Write 6 lines dictated from Standard Reader. Show Copy Books (capitals and figures, large and small hand.)

Arithmetic.—The four simple Rules with Long Division, Addition, Subtraction, and Multiplication of Money.

11. The number presented for Examination in the different Standards was :—

Standard I	136 or 52 per cent.
Standard II	72 or 27 per cent.
Standard III	53 or 20 per cent.

The number who passed was :—

Standard I	119
Standard II	64
Standard III	44

12. Table showing the Passes made in the three Standards :—

53	71	129	39	63	130	41	59	99	684	

NOTE.—The Schedule of Standards is the one adopted by the Council of Education in January, 1882, and is almost identical with that of Mundella's New Code.

13 It will be seen from the above that of 704 on Register there were 607 present, and 261 examined; and that out of a possible 783 Passes, 684, or 17 per cent., were gained.

14. The result, except for the percentage of Passes gained, is not as good as I had expected, the number presented for examination, 37 per cent. of that on the Register, being too small. There are two reasons for this: one is the excessive irregularity of attendance—many of the pupils entered on the Schedules not being present on the days fixed for the examination; the other is the teachers' over caution in holding back pupils who were not considered capable of passing in the three subjects—Reading, Writing, and Arithmetic—but who might have passed in one or more of them. There has also been too much straining after the higher Standards, in spite of my advice to pay the most heed to Number I. But after all, it is the first examination that has been held, and keen interest was shown by both Teachers and Pupils.

15. I purpose making use at any future examination of the simpler First Standard of the Mauritius second grade Schools, in addition to the above. This will add largely to the number presented for examination. It is as follows:—

Reading.—A few easy sentences from Standard Book I, or other similar Reader, distinctly and accurately pronounced.

Writing.—Form on slate or paper from dictation words of one syllable spelt by the Inspector.

Arithmetic.—Form on slate, from dictation, figures up to 20; add and subtract figures up to 20 orally.

16. The Board Schools maintain their position. They are not first in point of numbers, but they are well attended, and the Passes gained by their pupils speak for the efficiency of the Teachers.

17. Among the Aided Schools, the Railway School (Mr. Hunter); the Durban, Sydenham, Umbilo, and Isipingo Schools (Dr. Booth); the Umzinto School (Archd. Barker); the Pietermaritzburg School (Dean Green); the Durban, Springfield, and Bridgeford Schools (Rev. S. H. Stott), and the Pietermaritzburg School (Father Barret), are most to be commended, either for attendance or Passes gained. They happen to have better teachers or to be more favourably situated than the others.

18. The only Schools that have been wholly unsatisfactory are the Avoca School (Dr. Booth) and the Umbilo School (Rev. S. H. Stott.) There has been a change of teachers, and is, I think, a prospect of improvement.

19. Of the two Estate Schools now in operation, Prospect Hall has shown some improvement of late, while Clare has dwindled. The opinion I have expressed with regard to the establishing of more of these Schools remains unchanged. Employers cannot spare any of their labour, and Indians, until they have got past the Coolie stage, have little or no appreciation for the advantages of education. I must not be taken, however, as wishing to place obstacles in the way of any Mission or individual who may think it worth while to make another trial.

20. Some of the Schools have required a good deal of what may be termed "nursing." They need, particularly in outlying districts, more constant supervision than they get. In my first Report to the Board (dated January, 1883) I recommended that the Schools should be visited by the Inspector as nearly as possible once a month.

21. The table shows the number of visits paid to each School during the past year and the distance from the Railway Station, Durban—both ways :—

No.	Schools.	Visits.	Distance.	Remarks.
			Miles	
1	Durban Board	37	1	
2	Umgeni Board	28	8	
3	Tongaat Board	11	54	
4	Railway	25	...	
5	Durban (Dr. Booth)	21	1	
6	Sydenham „	14	10	
7	Prospect Hall „	10	12	
8	Avoca „	16	16	
9	Blackburn „	7	34	New School.
10	Verulam „	8	38	Do.
11	Wentworth „	10	14	
12	Umbilo „	17	8	
13	Iisipingo „	10	24	New School.
14	Umzinto (Archd. Barker)	12	106	
15	Equifa „	6	120	
16	Pietermaritzburg (Dean Green)	9	146	
17	Durban (Rev S. H. Stott)	25	1	
18	Point „	18	4	
19	Clare „	11	14	
20	Springfield „	13	12	
21	Bridgeford „	13	34	
22	Umbilo „	20	8	
23	Pietermaritzburg (Father Barret)	9	146	
24	Salisbury Island	9	6	New School.
25	Pietermaritzburg, Vindens	4	146	Closed.

The Schools being visited *en route* these distances do not represent the actual amount of travelling, which has been about 4,000 miles for the year.

22. Possibly the frequency of my visits may in some measure have lessened the Managers' sense of responsibility. I am of opinion that the grant in aid should impose upon a Manager the obligation of at least a weekly visit to each School in his care; and that all Returns should be certified by him before they are sent to the Inspector.

23. I have also to ask the Board's consideration for the following proposals:—

- (a) That a fixed scale of grants be adopted, and made public, in order that each teacher may know the amount to which his attendance entitles him.
- (b) That the grant be subject to immediate reduction should there be any serious falling off in the attendance.
- (c) That the grants in aid of existing Schools be re-adjusted on the basis of the past year's average attendance, taken with the promise of the opening quarter of 1886.
- (d) That in the case of new Mission or Private Adventure Schools, the grant shall be on the same principle as grants of public moneys to Libraries and such Institutions, viz.: proportionate to the amount contributed by the Mission or individual.

24. The same principle might be applied to the existing Schools with advantage. The want of sufficient and suitable accommodation is greatly felt in many of them. Several are mere huts; and when a living room for the Teacher has to be taken off, as is sometimes the case, the School must suffer. The furniture and appliances, too, are very defective. I have put up with all sorts of makeshifts for the last three years in hope of improvement taking place, but it is very gradual. Managers are fully aware of these shortcomings, but are unable to correct them for want of funds. The capital represented by the whole number of Schools is not much more than would suffice for the equipment of a single good one. The inference is that more has been attempted than is justified by the funds at disposal. Maintenance grants would seem to be the only remedy. Nothing better is to be expected from the education under unfavourable conditions of Indians than of Europeans or Natives.

25. In Mauritius, the Superintendent of Schools for that Colony informs me, the Public Elementary Schools (Government and Aided) are open to all children without distinction. The distinction between Creole and Indian Schools has disappeared through the Indian pupils having gradually abandoned their own Schools for those of the general population, *in which English was better taught*.

26. We have to look forward to the same end in Natal, and it is a question in my mind whether it is well to continue a system inherently defective, and which can only be bolstered up for a time by the expenditure of money that might be turned to better account economically.

27. Five Indians attended the Durban Boys' Model Primary School during 1885; and were an Indian branch attached to the various Schools in towns and other localities where Indians are settled, they would certainly avail themselves of the opportunity to send their children. By this means, too, in districts where there are no Schools, the European children being too few, the objection which is now made to the provision for Indian education only might be obviated, and an attendance obtained which would secure the Government grant in aid: see Section 4, Law 20, of 1878.

28. Nothing has yet been done towards the provision of Schools specially for Girls. I still think the experiment, under the direction of European lady teachers, is well worth trying. Instruction in Needlework would, I believe, prove most attractive. Female education is probably the best, if not the only means, of raising the admittedly low tone of the race.

29. I may mention here that classes for Indian Women and Girls, which it might be possible to convert into a School, are held in Durban in connection with the Church of South Africa by two English ladies. Sewing is taught, and these people are brought to some extent under English women's influence. A similar class for religious instruction is held in connection with the Wesleyan Mission.

30. The following Table gives some statistics of the Schools which have been maintained and aided by the Board during 1885:—

1

31. The chief centres of population not yet supplied with a School are Mount Edgecumbe, Pinetown, Lower Illovo, Ifafa, and the region between Verulam and the Tongaat. I believe that a Board School might be tried at Mount Edgecumbe with a fair prospect of success, although the Bridgeford and Blackburn Schools are within easy distance. At neither of the other places is there sufficient inducement to warrant the attempt. An effort will be made to provide some of them with denominational Schools during the current year. At Stanger, and even at Estcourt, there are Indians whose educational wants need attention. But in neither case, so far as I can ascertain, is there an opening for a purely Indian School.

TEACHERS.

32. At the end of the year there were 24 Teachers, 1 Assistant, and 13 Pupil Teachers, making a total of 38 of all grades.

33. Mr. A. Peter, a young man educated at the Durban Boys' Model Primary School, has proved a valuable acquisition to the teaching staff.

34. The difficulties referred to in previous Reports, viz., indifference of parents, and facility with which children can earn a living, have still to be contended with. Nothing but the zeal and energy of the teachers avail to overcome these in so far as they can be overcome. The foregoing tables of attendance and examination results prove that steady progress has been made during the past year.

35. As before stated, "without a grant in aid no School could be maintained, while a trifling addition would often make all the difference between securing a good and an indifferent teacher." Men will not work, certainly not their best, for a mere pittance, or where there is no prospect of improving their condition.

36. The time has come, I think, for the adoption of the system of part payment by results—a small payment being made on account of each pupil who passes in a Standard at the Annual Examination—under similar restrictions to those which obtain in the European Schools.

37. As a further stimulus to the teacher's energy, a capitation allowance should also be made for each pupil who has attended School for 175 days during the year in town, and for 100 days in country Schools (I think 100 days would be enough to expect in the country where Indians so frequently require their children's services to help in their planting operations). It should be greater in the case of the Board Schools, the grant to Aided Schools being already a grant for attendance.

38. If made to all, the question of "check" will have to be dealt with, basing the allowance on the average number of pupils found in attendance by the Inspector and Manager on their periodical visits; and by any other visitor who noted the number present on the occasion of his visit in a book kept for the purpose, would be an effective means.

39. As an alternative course, the salaries of the Board School teachers might be increased by a small amount annually, and a bonus be given to each Aided School conducted to the Inspector's and Manager's satisfaction by the same teacher for the whole year. I do not recommend this course.

40. Trained teachers are *sine qua non*. No amount of effort on the part of untrained men can make

up for ignorance of the methods of imparting instruction, or qualify a smatterer for the post of Teacher : progress in this respect is slow. It will be observed that only two of the teachers on the list are certificated. Those employed in town and the neighbourhood might be called upon to obtain certificates. Two or three have expressed their willingness to do so. The offer of an addition to the salary of teachers holding the Natal certificate would give a fillip to the movement.

41. Men of the required stamp could perhaps be obtained from Mauritius, but the cost would be considerable. The Superintendent of Schools, commenting upon the remarks in my last Report, that most of our teachers come from that Colony, says : " Here we issue Certificates of Competency of the I., II., III., and IV. Classes, the lowest being granted under very modest requirements. If the teachers from Mauritius do not hold one of these certificates you will be enabled to estimate their value according to the Standard adopted here. In the First Grade Government Schools an Assistant Teacher is not recognised unless he holds at least a III. Class Certificate."

42. I do not see why the charge of some, at any rate, of these Schools should not be undertaken by young men upon their leaving the Government Schools. The advantage would be mutual, and with grants of from £75 to £100 a-year, the appointments would be worth competing for.

43. Thirteen Pupil Teachers have been employed during the year, the Board having authorised the appointment of one to each School with an average attendance of 25 pupils. (Bridgeford School is exceptional, the attendance having fallen off through Indians leaving the neighbourhood). They are the most advanced boys, and passed as follows in the examination :—

			Reading.	Writing.	Arithmetic.
In Standard III	12	10	11
„ Standard II	1	3	2
			—	—	—
Total	...		13	13	13

44. The remuneration allowed is at the rate of five shillings a month. This amount was sufficient in the beginning, but does not offer any inducement to a boy to remain and qualify for the post of a teacher. He can get greatly more by his going out to work, which his friends and relatives continually urge him to do.

45. I recommend that authority be given to increase this sum to ten, fifteen, and twenty shillings, in cases where it may be considered advantageous to retain a lad's services, giving him at the same time the title of Assistant, with a share of the capitation allowance or bonus, and making an agreement with him for a term.

46. The system appears of sufficient importance to be thus extended if it is to be regarded as a source for the supply of teachers in the future. Already three boys trained in this way have been placed in charge of Schools, and applications for employment have been received from others. They are too youthful generally to be entrusted with the sole charge of a School.

47. The Table shows the name, nationality, &c., of the Teachers employed during 1885, and is followed by the Statistical Report made monthly by the Inspector :—

Total	78 16 9	80 6 5	68 11 10	227 15 0	

51. The Durban and Umgeni Schools were erected by the Board in 1883 and 1884 at a cost of £225 15s. 6d. and £154 11s. 9d. respectively.

52. The site for the Umgeni School cost £81 6s. 9d.

53. The Tongaat School is rented for £24 a year.

54. The furniture of the three Schools has cost £51 9s. 4d.

55. Each new School gets a grant of £3 for the purchase of School books and apparatus, continued at the rate of £1 a year to help in keeping up the supply.

56. The Table shows the quarterly collection of fees at the Board Schools :—

School.	Collections.					1884.	1883.
	March.	June.	September.	December.	Total.		
	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.

Totals ...	6 9 3	6 16 3	6 16 6	6 16 10	26 18 10	16 5 6	1 7 6

57. These fees are paid into the Colonial Treasury, and form part of the General Revenue.

58. The children of free Indians pay sixpence, those of indentured Coolies threepence a month.

59. Only 8 “free” pupils have attended the Board Schools. But I have allowed any very young children to be admitted for threepence a month on application being made by the parents—with the understanding that when they pass in the First Standard sixpence must be paid. I have now to ask the sanction of the Board to—

(a) The admission at half the above rates of all members of the same family.

(b) The free admission of all beginners, for a period of six months, the time usually taken in getting them into the First Reader.

60. These little concessions would, I believe, be welcomed by Indians in the present “hard times.”

61. The amount paid as fees by the pupils at Aided Schools is £88 14s. 9d., an average of 1s. 5d. per head. It would appear that the majority of the pupils are non-paying though not “free.” The collection of fees is never an easy matter. There are always arrears. No fees at all are paid at the Umzinto and Equifa Schools. I object to this as the parents of the children are well able, ordinarily, to pay the small amount required of them. The Manager, however, assures me that the imposition of any fee would have the effect of emptying the benches.

62. The rate of fees is not uniform in these Schools, as much as one shilling and sixpence being charged in some. I have not thought fit to interfere with a practise which existed before I was appointed Inspector; but I think if the system of payment by results, and a capitation allowance is adopted, that a uniform rate of sixpence and threepence, as in the Board Schools, should be insisted upon. The attendance would probably be increased, though it must be admitted that in two instances it has not been affected by a high rate of fees.

63. I have been unable on the whole to obtain the neatness of dress and cleanliness of person, the necessity for which I constantly urge upon the teachers; there is, however, a marked improvement, and I do not care to be too exacting in the matter, as I am sure that Indian parents who have the means will always vie with Europeans in securing a decent appearance in public for their children. The example set by the teachers themselves leaves much to be desired. The provision of basins and towels for the Board Schools has been a help in this [direction, but the want of properly constructed lavatories begins to be felt.

64. Some teachers get a good deal of home work out of their pupils. I discourage the practise: not from any fear of "over pressure," but because the home surroundings are seldom compatible with good work.

65. Some religious instruction is given in all the Schools. In a few cases it is rejected, but it does not, so far as can be ascertained, affect the attendance either for good or ill.

66. The table shows the number of pupils who have left School during the year 1885 :—

		(1)	(2)	(3)	(4)	
School.		Beginners.	R.	R.W.	R.W.A.	Total.
Board	39	17	14	18	88
Aided	330	104	108	89	631
Total	...	369	121	122	107	719

(1) Alphabet and Primer.

(2) Read First Royal Reader.

(3) Read Second Royal Reader, and Write on Slate.

(4) Read Third Royal Reader, Write Dictation, and work the first four rules of Arithmetic.

67. Of these 719, some have only gone from one school to another : as often as not to avoid payment of school fees when the teacher became pressing. It has been suggested that no teacher should be

allowed to admit a pupil coming from another School in the same locality, except upon a certificate from his former teacher showing the cause of his leaving. I have declined to adopt this suggestion, as it does not appear advisable at present to restrict the attendance in any way.

68. There are no data as yet for ascertaining the average period for which Indian children remain at School. Many of those now in attendance have been so for the last three years. When they can read and write fairly well, and have some knowledge of Arithmetic, they have completed their course.

69. The Madrassees in the Schools exceed the Calcuttas (as they are commonly called) by 375. They seem to be more alive to the advantages derivable from education, and to have fewer prejudices to overcome than their Aryan fellows.

70. One European and a few Mauritius and St. Helena half-castes, Zanzibarees, and Natives have attended the Schools.

71. The sum of £15 was allowed by the Board for the purchase of prizes: these are awarded more for regularity of attendance and general good conduct than for proficiency—liberality in this respect would not be thrown away. It is something pathetic to witness the transports of delight with which these children receive the unaccustomed book or toy.

72. The little interest taken by any one in these Schools is detrimental to the cause of Indian education. It will hardly be credited, but from one year's end to another they are entered by no one but the Inspector and Manager, when there is one. The "Visitors' Book" remains a virgin page. Of all the landlords and employers, but one has cared to visit a School and find out for himself what the pupils can do. He paid a deserved compliment to the teacher and offered a prize for competition. It would have a good effect if Members of the Board would look in occasionally when they happen to be in the neighbourhood of a School.

FUTURE OF PUPILS.

73. In each of my previous Reports I have called attention to the necessity for supplementing the education which is being given to the Indian children. I trust I shall be excused for once more returning to the subject; but I owe it to myself as well as to the Board, to make my conviction quite clear, that under present conditions we are only twisting a rope of sand, or, worse even, doing positive harm in half educating a number of boys and letting them loose upon the community at an age when they are ripe for any mischief, with minds in a state of unrest by means of what they have been taught, and with no apparent object for self improvement—their future being the same as that of their uneducated fellows.

74. I am no nearer a satisfactory answer now to the question frequently put by both Europeans and Indians ("What are you going to do with the children when you have educated them?") than I was three years ago. The generalities in which I am fain to take refuge satisfy no one—myself least of all perhaps.

75. One hundred-and-seven boys who can read and write and do a little arithmetic are returned as having left the Schools during the past year. The percentage who obtain employment, for which they would not be equally eligible without any education at all, is practically nil.

76. In the case of the Natives there is a consensus of opinion that Industrial Education should go hand in hand with book-learning; and I observe that the first steps taken by the Council of Education are directed towards the attainment of this end. An Industrial School is about to be established, and grants in aid are to be made only to those Schools in which Industrial Training is given.

77. More immediate results might be expected were a similar course followed with respect to Indians.

78. I do not think the immediate establishment of Industrial Schools by the Board feasible; nor would it be expedient to restrict grants in aid to Schools in which Industrial Training is provided for. But I should like to see the offer made of a special grant to Schools in which such training should be given. One of the existing Schools would be prepared to make the attempt. In addition, a certain number of apprentices might be selected, as in Mauritius, where 12 are annually selected from Plaine Lauzun and the Botanical Gardens—on probation the first year, under agreement for the two following.

79. Several boys have expressed the desire to learn a trade. The motion comes from themselves, not from their parents. It is not, therefore, to be expected that their wish will be gratified. The parents have a large interest in the children's earnings, and look for the earliest possible return for their trouble and outlay in bringing them up, obtained generally by sending them out as waiters in hotels, hawkers of vegetables, and so on.

80. I would also recommend that for two or three years a few of the more advanced boys, say from those who pass in Standards III. and IV. (beyond which I see no chance of the pupils in Indian Schools ever attaining), be drafted off to the Model Primary Schools—those especially who wish to become teachers. A sum sufficient to ensure conformity with European ideas, and defray cost of books, &c., would be needed in some cases. But it would be an inexpensive mode of training teachers, and, by holding up an object to be striven for, must needs do good.

I am, &c.,

F. COLEPEPER,

Inspector of Indian Schools.

Private Bills are usually purchased by the Banks at a margin of about 1 per cent. under selling rates for Bank Bills, as quoted above.

COINS.

With the exception of some Australian currency, in sovereigns and half-sovereigns, the coins in circulation are exclusively British, and are the legal tender in discharge of all debts; consisting, in gold, of sovereigns and half-sovereigns; in silver, of crowns, half-crowns, florins, shillings, sixpences, and three-penny pieces; and in copper, of pence and half-pence.

The coins in circulation have not in any way been defaced, altered, diminished, or augmented in their respective values.

Under authority of Circular to all Collectors of Revenue, dated August, 1876, Indian rupees are not accepted as current coinage.

AMOUNT OF COIN IN CIRCULATION.

This cannot be correctly ascertained; but the probable amount may be estimated at not more than £700,000.

PAPER CURRENCY. —GOVERNMENT PAPER. Nil.

BANKS.

Name.	Place.	Subscribed Capital.	Shares.	Paid-up Capital.	Note Circulation.
Natal Bank ...	Pietermaritzburg (head office), Durban, Ladysmith, and Newcastle.	£ 231,790	46,358 £5 each	£ 114,590	13,530
Standard Bank of South Africa (Limited)	Pietermaritzburg, Durban, Newcastle, Estcourt, and Greytown.	4,000,000	£100 each, 40,000 of £25 paid up.	1,000,000	Natal Branches, 13,175.
Bank of Africa (Limited)	Pietermaritzburg and Durban	1,000,000	40,000, of £25 each	500,000	

The Natal Bank is a Chartered Bank, and has a power to increase to £500,000, from time to time, as may be found expedient, and to amalgamate with any other Banking Institution.

ACCOUNTS.

All accounts, both public and private, are rendered in this Colony in British money; and biddings at Sales by Auction are also made in British money.

WEIGHTS.

Weights of the Imperial Standard were legalised and brought into use in this Colony under the Ordinance No. 11, 1852.

Among the Dutch Inhabitants, and in their commerce with English, weights of the standard of Amsterdam are occasionally used; the proportion being 92 lbs. Dutch to 100 lbs. English.

MEASURES.

The Standard Measures in this Colony are the Imperial, and were legalised by Ordinance No. 11, 1852.

The Dutch Inhabitants, however, in disposing of grain, are in the habit of adhering to the old Dutch standard, viz. :—

1 Schepel, equal to 766 old Winchester Bushels, or 743 Imperial.

1 Muid, equal to 4 Schepels, or 3061 old Winchester Bushels, or 2927 Imperial.

1 Load, equal to 10 Muids, or 3065 old Winchester Bushels, or 2972 Imperial.

Thus 170 Dutch Schepels are equal to 82 Winchester Bushels.

4 „ „ about 3 Imperial Bushels.

11 „ „ about 1 Quarter.

The measurement of Land in Natal, since it was proclaimed a British Colony, has always been Imperial, viz., by acres, roods, perches, &c.

Since the commencement of selling at the Pietermaritzburg Market of all produce by Imperial weights and measures, the practice of dealing by the old Dutch Standard has been gradually discontinued, though still adhered to in some of the country districts.

CLASSIFICATION OF PRISONERS.										
GOOD CONDUCT RATIONS.										
After two months' uninterrupted good conduct, Prisoners shall receive the additional rations named in the Dietary Scale ; and after six months in the First Class, as a further reward for good conduct, Prisoners shall receive a ration of Tea or Coffee, and Sugar, for Supper, instead of Gruel.										
But in every case of misconduct against the Rules of the Gaol, or making complaints that may be deemed by the Board of Visitors to be frivolous and vexatious, the Prisoner may be awarded to be deprived of the extra allowance of either Meat or Tea for one month.										
* NOTE.—First-class Prisoners, on Second-class Diet, to have, on Sundays, 12 ozs. of Meat, instead of 8 ozs.										
† When Milk is not procurable, His Excellency the Lieutenant Governor sanctions an equivalent of 12 ozs. Bread, with Coffee and Sugar, instead of 12 ozs. Meal and half-pint Milk.										
‡ First-class Prisoners to have 1 lb. of Meat on three days a week, instead of 12 ozs. Meat.										
European Women to have ¼ less solids in the scale, according to the class of diet.										
Europeans, not at hard labour, to have ¼ less of solids—Sick Diet.										
Spare Diet, same for all Prisoners.										

Hottentots at Hard Labour and St. Helena's and Crooles to receive 4 ozs. uncooked meat extra after being 6 months in Gaol	Sundays, Tuesdays, Thursdays.										Mondays, Wednesdays, Fridays.										Saturdays.

CRIMINAL STATISTICS.

1885.

I. OFFENCES.

TABLE showing the Number of Offences reported to the Police or the Magistrates during 1885.

Total Number of Offences reported.	Offences against the Person.	Prædial Larceny.*	Offences** against Property (other than Prædial Larceny.)*	Other Offences.
17,639	2,776	178	1,610	13,075

* By "Prædial Larceny" is meant the offence prevalent in the sugar-growing and Coolie-importing colonies—robbing provision grounds and homesteads. It need not be filled up in colonies where such crime is not prevalent; and, it being struck out, any other prevalent crime may be substituted—as Cattle-stealing, Arson, &c., &c.

** Include both Offences against rights of Property and Injuries to the subjects of Property.

II.—APPREHENSIONS AND SUMMONSES.

TABLE showing the Number of Persons brought before the Magistrates' Courts by Arrest Warrant or Summons for Offences, and how their Cases were disposed of in the Magistrates' Courts.

	Number discharged for want of Prosecution by the Party complaining, or for want of evidence.	Number of Cases Dismissed on the merits.	Number of Persons summarily Convicted.	Number of Persons Committed for Trial in the Superior Courts.
Offences against the Person	116	401	1,791	942
Prædial Larceny	8	23	104	7
Offences against Property * other than Prædial Larceny	59	318	946	193
Offences against Master and Servants' Acts, includ- ing Acts relating to Indentured Coolies ...	68	249	2,229	...
Other Offences	205	418	7,935	25
Total number of Persons Summoned for Appre- hended	456	1,409	13,005	1,167

NOTE.—Purely Civil Cases in which Magistrates exercise jurisdiction are not to be included in this or the following table.

* See foot note (**) above.

III.—SUMMARY CONVICTIONS.

TABLE showing the Number of Summary Convictions for various Classes of Offences, and the kind of Punishments Inflicted.

Punishments.	Total Number of Offences.	Assaults and other Offences against the person.	Malicious Injuries to Property.	Prædial Larceny.	Offences against Property other than Malicious Injuries to Property or Prædial Larceny.	Offences against Revenue Acts, Highway Acts, Health Acts, and other Acts relating to the Social Economy of the Colony.	Offences against Masters and Servants Acts, including Acts relating to Indentured Coolies.	Other Offences.
Fine	6,064	1,332	13	9	105	553	1,074	2,978

V.—COMPARATIVE TABLE.

COMPARATIVE TABLE showing the number of Offences, Apprehensions, Convictions, and Acquittals
for last Four Years.

	1882.	1883.	1884.	1885.
The number of offences reported to the police	17,551	17,990	20,039	17,639
The number of persons apprehended by the police or summoned before the Magistrates	16,339	16,046	19,139	16,037
The number of summary convictions :—				
1. For offences against the person... ..	1,576	1,744	2,101	2,089
2. For prædial larceny	219	16	42	96
3. For offences against property other than prædial larceny ...	922	811	861	844
4. For other offences	10,308	10,804	12,700	9,976
The number of convictions in the Superior Courts :—				
1. For offences against the person... ..	1,055	1,132	904	612
2. For cattle stealing, &c.	113	117	119	116
3. For offences against property other than prædial larceny ...	329	14	70	53
4. For other offences	370	110	6	5
The number of persons acquitted :				
1. In the Inferior Courts	1,117	1,668	2,376	1,865
2. In the Superior Courts	128	40	546	380

REPORT OF THE ATTORNEY-GENERAL ON CRIME.

The number of cases reported during 1885 was 17,639, being a decrease of 2,400 on the previous year, as compiled from the returns furnished by Resident Magistrates.

In the Supreme and Circuit Courts 149 indictments were issued, being the same number as in 1884. These 149 indictments represent a total of 162 prisoners; the number of prisoners in 1884 being 174.

The number of capital offences unfortunately shows a large increase on previous years. No less than 23 prisoners were indicted for the crime of murder, as against 6 in 1884, and 12 in 1883. Of this number 7 were found guilty of culpable homicide, 2 of being accessory to the crime of murder, one (an Indian woman) was found to be insane, one not guilty, and 12 were found guilty of the crime of murder.

Of these 3 were sentenced to imprisonment for life, the remaining 9 being sentenced to death. Eight were executed, and the sentence of the remaining one was commuted to imprisonment for life.

The nationalities of the 23 prisoners were as follows :—

Europeans	1
Natives	12
Indians	10

The number of cases of attempted rape or indecent assault by Natives upon European females was considerably smaller than in 1884, and the convicted offenders were severely punished. The number of such cases was in 1884 10. The number in 1885 was 8 cases.

Preparatory Examinations were received at this office in 533 cases during 1885, being an increase on any previous year.

The cases tried before the Native High Court and the Court established under Law 10 of 1876 for the trial of Natives accused of cattle-stealing, stabbing or killing, are included in Table IV., but for purposes of comparison they are extracted and classified as under :—

	Total.	Offences against the Person, Riots, &c.	Cattle Stealing, &c.
Judgment for Crown	675	559	116
Judgment for Prisoner	334	315	19
	1,009	874	135

There is a large decrease in the number of riot cases—the total in 1884 being 1,320—and the cattle stealing cases also show a decrease. The proportion of acquittals, however, has strikingly increased during the years 1884 and 1885, as compared with previous years. In 1882 and 1883 the acquittals numbered 110 and 113 respectively—the total number of cases being 1,479 in 1882, and 1,221 in 1883. In 1884 and 1885 the acquittals numbered 507 and 334—the total number of cases being 1,484 in 1884, and 1,009 in 1885.

I may state that a new Judge was appointed to the Native High Court in January, 1884, and he assigns as a reason for the large number of acquittals the fact that Administrators of Native Law were in the habit of committing for trial all who were present at a riot, even those who acted as mediators and who took no part in the fight. These men, the Judge, on the case coming before the Native High Court for trial, discharged. I apprehend the learned Judge did not recognise the distinction between assault and riot.

There is one matter connected with the discretionary power of a presiding Judge in cases where prisoners have been convicted or have pleaded guilty to the crime of murder which calls for some remark. In the October Session of the Durban Circuit Court, two Indian prisoners, Virasamy and Vengetigadoo, the venue of whose trial had been removed from Pietermaritzburg to Durban by reason of the jury at Pietermaritzburg being unable to agree upon a verdict, were convicted in Durban of the crime of murder. The presiding Judge passed sentence of imprisonment for life. In another case an Indian, Mothoosamy, pleaded guilty to the crime of murder. After having being cautioned as to the effect of the plea, and after admitting the motive of his crime, yet in both cases the presiding Judge passed sentence of imprisonment for life upon the prisoners.

The Judge had the power to award discretionary punishment under Roman Dutch Law—the law prevailing in Natal—but this power of discretionary punishment in capital cases is not possessed by the Judges in the United Kingdom, and is contrary to the English Statute Law in such cases. I suggest that a Law should be introduced into the Legislative Council requiring the presiding Judge upon every conviction for murder to pronounce sentence of death, and enacting that every person convicted of murder should suffer death—see 24-25, Vic. C. 100. The prerogative of mercy should be exercised in the manner prescribed by the Royal Charter of Natal and by Her Majesty's instructions.

"	12	17.8	11.9	13	3	899.6					
"	13	14.4	8	13	1	1490.6					

(QUESTION II.—*Continued.*)

(I.) What quantity of water is available for each patient every day? An unlimited supply.

What is the source of the water supply?—From the Corporation Waterworks, which supply the City generally.

What is the quality of the water? Good.

(II.) Detail the arrangements as to baths and lavatories?—Two small rooms used as bath-rooms, adjoining the Main Wards, each containing an enamelled (fixed) iron bath, one for hot water, the other for cold; the water being supplied to each bath, and discharged by means of iron piping.

Portable baths, when ordered, are given at the patients' bedside. Each patient is bathed on admission, previous to entering bed. There is a lavatory fitted with four hand-basins and three iron foot-basins, water being supplied by means of iron piping, and discharged by same means.

(III.) What is the system of sewerage, and what the condition of the privies?—There are eight privies, situated 115 feet from the nearest Ward, at the back of the Hospital. The soil is collected in buckets placed in the privies, and removed daily by the Corporation night-soil carts. Night-stools are used, strict attention being paid to their being kept perfectly clean.

QUESTION III.

(Give the number of visits of inspection paid to the Hospital during the year 1885.)

Specifying the character of the visit in respect to notice.	And stating the official position of the visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a committee of the governing body.
By appointment	This Institution is under the entire control of the Trustees, who visit and report monthly.		
Of Surprise			

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced?—Always produced.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination?—On every occasion they were found properly made up.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:

- * (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited.
- (b) Reports by persons charged with the management of the Hospital.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital

GREY'S HOSPITAL.

The other attendances were either repeated visits of the patients entered in the Case Book, or trivial cases.

The number of Natives seeking advice continues to increase.

The expense of the Out Patient Department has not been materially greater than last year.

The Hospital has been put into a good state of repair. The whole building has been painted within and pointed without.

The total sum received from paying patients was £748 12s. 6d.

The cash surplus, probably £500, will be paid into the Colonial Treasury.

The value of goods and medicines in the Hospital at the beginning of the year was £381 4s. 6d.

At the end of the year the stock was about the same value.

The total number of patients admitted was 500.

The daily average in Hospital was 30.

The cost of maintaining each bed daily cannot be ascertained with correctness until a capital account is opened. It is evident that charges, such as are entailed in keeping the building in repair, or those resulting from the purchase of furniture, or any outlay which may occur during the year on permanent improvements should not be charged in full to the Maintenance Account. It has been so charged in the past; with the result of making the apparent cost of maintaining a bed vary in the most unaccountable manner. This year a considerable sum has been spent which should have been charged to the Capital Account, but which has not been so placed. On this account the cost of a bed per day seems to be this year much greater than last. As such is not the case, a return of the kind is very misleading. To correct this error a Capital Account should be started and the interest on the capital charged to Maintenance. When this is done a correct estimate of the cost of each bed can alone be made.

The following is a tabular statement of the cases treated in the Hospital during the year :—

RETURN OF DISEASES TREATED IN GREY'S HOSPITAL DURING THE YEAR 1885.

Diseases Treated.				No. of Cases.	Diseases Treated.				No. of Cases.
Abscess	10	Hepatitis	2
Accouchements	3	Hæmorrhoids	1

JAMES F. ALLEN.

HOSPITAL RETURN FOR THE COLONY OF NATAL FOR THE YEAR 1885.

D U R B A N.

QUESTION I.																
	Number remaining in the Hospital at the beginning of the year 1885.	Number admitted during the year 1885.	Daily average in Hospital during the year 1885.	Attendants.					Patients Discharged.			Average stay of those.			Out Patients.	
				Nurses doing no other duty.		Servants partially or not at all employed as Nurses.			Cured.	Relieved.	Not improved.	Number who died in 1885.	Average stay of those.			
				Day Nurses.	Night Nurses.	Not Nurses.	Partial Day Nurses.	Partial Night Nurses.					Dead in 1885.	Discharged.		Remaining at the end of 1885.
Males	37	472	36.2	1		6	5	Two on Duty every Night.	415			65	45.8	19.75	29	450
Females	6	72		1		2	1		63			11	73.9		2	

QUESTION II.														
Give the Name or Number of each Ward.		Length in feet.	Breadth in feet.	Height in feet.	Number of beds assigned to the Ward.	Amount of cubic space available for each patient for the average number of patients in the Ward.	The greatest number of patients in the Ward at any one time during the year.	Windows and ventilating openings.		Connection of the Privy with the Ward.		Is there any Sink or Drain opening in Ward.		Remarks.
								Total area in square feet.	Area capable of opening in square feet.	If Privy in Ward.	If leading out of Ward.	Trapped ?	Untrapped ?	
Ward	No. 1	14	11	14	3	756.6	3	58	29	None.	None.	None.	None.	
	2	24	24	14	7	1152.	7	98	49					
	3	35.3	24	14	13	911.	13	196	98					
	4	35.3	24	14	13	911.	13	196	98					
	5	24	24	14	7	1152.	7	98	49					
	6	24	24	14	6	784.	6	78	44					
	7	14	12	14	2	1176.	2	28	14					
	8	14	12	14	2	1176.	2	28	14					
	9	14	12	14	2	1176.	2	28	14					
	10	14	12	14	2	1176.	2	28	14					
	11	50	24	14	12	1200.	12							

(QUESTION II. -Continued.)

(I.) What quantity of water is available for each patient every day? There has been sufficient rain water available for all purposes during the past year.

What is the source of the water supply? Rain water collected from roofs and stored in two underground tanks and eight iron tanks. There is also a well on the premises.

What is the quality of the water? Good.

(II.) Detail the arrangements as to baths and lavatories? - Two baths fixed in the Lavatories at the end of each wing; portable, hip, foot, and warm baths.

(III.) What is the system of sewerage, and what the condition of the privies?—Good. Night soil tubs now in use, and emptied every night.

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the year 1885.

Specifying the character of the visit in respect to notice.	And stating the official position of the visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a committee of the governing body.
By appointment	Colonial Secretary, Twice.	Resident Magistrate, 15 times. Authorised Substitute, 11 times.	
Of Surprise	Colonial Engineer, once.	Official Visitors, 22 times.	

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced?—Records always available for inspection of any visitor when called for.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination?—Returns rendered to the Auditor, Pietermaritzburg, monthly.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:

- * (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited. -Monthly return showing all expenditure during each month; monthly nominal returns of fees received and return of fees outstanding on last day of month.
- (b) Reports by persons charged with the management of the Hospital.-- Monthly nominal return of patients under treatment, and monthly diet roll; return of cash received and expended on last day of month.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital.— Annual return and report for Blue Book, and list of Government property in possession.

* NOTE [Copies of above Reports, if any appended.]

QUESTION IV.

Fill up the following Table of Cases of each kind of Disease treated in the Hospital in the year, with the number of Deaths from each such Disease.

Name of Disease.	No. of Cases.	Deaths.	Name of Disease.	No. of Cases.	Deaths.
Chicken Pox	7		Digestive System	74	17
Enteric Fever	14	5	Gonorrhœa	6

Respiratory	46	12	Dislocations... ..	3	
Traumatic Tetanus	2	2	Hip Disease	3	
			Disease Knee Joint	3	
			„ of the Spine	1	
			Other Diseases	6	

TABULAR STATEMENT OF SURGICAL OPERATIONS.						
Description of Operation.					No. of Operation.	Results.
Amputation of Arm (1)					1	Satisfactory.
,, Thigh (2)... ..					1	Satisfactory.
,, Foot (Chopurt's) (3)... ..					1	Satisfactory.
(1). Caused by Gun Shot wound.						
(2). Cancerous growth of Knee Joint.						
(3). Railway Accident.						
Fracture.					No.	Results.
Fracture of Spine					2	Died.
,, ,, Tibia and Fibula					5	Satisfactory.
,, ,, Compound					4	,,
,, ,, Lower Jaw					1	,,
,, ,, Ribs					3	,,
,, ,, Skull					4	1 Died (favourable other 3)
,, ,, Pelvis					1	Died.
,, ,, Arm					5	Satisfactory.
,, ,, Ankle, Compound					1	,,
,, ,, Patella					1	,,
,, ,, Thigh					1	,,
,, ,, Maleolus					1	,,

REMARKS BY MEDICAL OFFICER OF HOSPITAL.

The proportion of deaths, viz., 76, and the number of patients under treatment, 585, has been large. Many of these cases were such that would not be admitted or retained in European Hospitals. They would there have been sent into the workhouses or their own homes.

Many of the Natives and Indians were also admitted in a hopeless condition, who, if not received into the Hospital or turned out, would only die of starvation and neglect in the streets. There were nine deaths from pulmonary phthisis and twelve from other diseases of lungs. There were also several deaths from dysentery and other diseases of the digestive organs.

We have had no outbreak of any epidemic during the last year. The only cases necessary to isolate have been those of chicken-pox, and occasionally a case of leprosy. We have had three cases of leprosy in Hospital during the past year. These were sent out, as Government and local authorities had no power to dispose of them otherwise.

WM. HY. ADDISON, M.D.,

District Surgeon

January 26th, 1886.

HOSPITAL RETURN FOR THE COLONY OF NATAL FOR THE YEAR 1885.

HOWICK COOLIE HOSPITAL.

QUESTION I.

QUESTION I.																	
		Number remaining in the Hospital at the beginning of the year 1885.	Number admitted during the year 1885.	Daily average in Hospital during the year 1885.	Attendants.					Patients Discharged.			Number who died in 1885.	Average stay of those.			Out Patients.
					Nurses doing no other duty.		Servants partially or not at all employed as Nurses.			Cured.	Relieved.	Not improved.		Dead in 1885.	Discharged.	Remaining at the end of 1885.	
					Day Nurses.	Night Nurses.	Not Nurses.	Partial Day Nurses.	Partial Night Nurses.								
Males	}	...	45	3 $\frac{1}{3}$ patnt.	One Male Attendant is Nurse, Cook, chops wood, and carries water.					58	2	18 $\frac{1}{12}$	18 $\frac{3}{8}$	71 $\frac{1}{2}$	
Females		1	16														

QUESTION II.

Give the Name or Number of each Ward.		Length in feet.	Breadth in feet.	Height in feet.	Number of beds assigned to the Ward.	Amount of cubic space available for each patient for the average number of patients in the Ward.	The greatest number of patients in the Ward at any one time during the year.	Windows and ventilating openings.		Connection of the Privy with the Ward.		Is there any Sink or Drain opening in Ward.		Remarks.
								Total area in square feet.	Area capable of opening in square feet.	If Privy in Ward.	If leading out of Ward.	Trapped ?	Untrapped ?	
Ward	No. 1	14	12	10	3	1124		22						
"	2	14	12	10	3	1124		22		None.	None.	None.	None.	

(QUESTION II.—*Continued.*)

(I.) What quantity of water is available for each patient every day? Supply unlimited.

What is the source of the water supply?—A Well.

What is the quality of the water? Pure and healthy.

(II.) Detail the arrangements as to baths and lavatories?—Two baths are used and given to the patients in their wards.

(III.) What is the system of sewerage, and what the condition of the privies?

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the year 1885.

Specifying the character of the visit in respect to notice.	And stating the official position of the visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a committee of the governing body.
By appointment		Twelve.	None.
Of Surprise			

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced?—

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination?—They were always made up to date of examination.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:

- * (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited.—None.
- (b) Reports by persons charged with the management of the Hospital.—None.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital.—None.

* NOTE [Copies of above Reports, if any appended.]

QUESTION IV.

Fill up the following Table of Cases of each kind of Disease treated in the Hospital in the year, with the number of Deaths from each such Disease.

Name of Disease.	No. of Cases.	Deaths.	Name of Disease.	No. of Cases.	Deaths.
Bronchitis	4	...	Debility	1	...

(QUESTION II.—*Continued.*)

(I.) What quantity of water is available for each patient every day?—Practically unlimited.

What is the source of the water supply?—Underground Tank for drinking purposes. River water for washing purposes.

What is the quality of the water? Good.

(II.) Detail the arrangements as to baths and lavatories?—Two Bath Rooms—one at each end of the Hospital—opening on to back verandah.

(III.) What is the system of sewerage, and what the condition of the privies?—Refuse is buried. Privies in good order.

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the year 1885.

Specifying the character of the visit in respect to notice.	And stating the official position of the visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a committee of the governing body.
By appointment	By a Commission appointed by the Governor.	Five.	
Of Surprise			

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced?—Always produced.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination?—No.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:

- * (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited.
- (b) Reports by persons charged with the management of the Hospital.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital.

* NOTE [Copies of above Reports, if any to be appended.]

QUESTION IV.

Fill up the following Table of Cases of each kind of Disease treated in the Hospital in the year, with the number of Deaths from each such Disease.

Name of Disease.	No. of Cases.	Deaths.	Name of Disease.	No. of Cases.	Deaths.
Abscesses	7	...	Laryngitis	1	...
Accidents	9	...	Observatio	12	...

TABULAR STATEMENT OF SURGICAL OPERATIONS.

Description of Operation.	No.	Results.
No Capital Operations.		

Fracture.	No.	Results.
Compound Comminated Fracture of Skull ...	1	Died.
Fracture of Clavicle	1	Discharged well.
Fracture of Forearm	1	Good union.

HOSPITAL RETURN FOR THE COLONY OF NATAL FOR THE YEAR 1885.

VERULAM.

QUESTION I.

	Males ...	26	331	19·8	Attendants.					Patients Discharged.			24	Average stay of those.			25	Out Patients.	
					Nurses doing no other duty.		Servants partially or not at all employed as Nurses.			Cured.	Relieved.	Not improved.		Number who died in 1885.	Dead in 1885.	Discharged.			Remaining at the end of 1885.
					Day Nurses.	Night Nurses.	Compounder.	Partial Day Nurses.	Partial Night Nurses.										
	Females...		76		1		1	3		384					37·4		25		

QUESTION II.

Give the Name or Number of each Ward.		Length in feet.	Breadth in feet.	Height in feet.	Number of beds assigned to the Ward.	Amount of cubic space available for each patient for the average number of patients in the Ward.	The greatest number of patients in the Ward at any one time during the year.	Windows and ventilating openings.		Connection of the Privy with the Ward.		Is there any Sink or Drain opening in Ward.		Remarks.
								Total area in square feet.	Area capable of opening in square feet.	If Privy in Ward.	If leading out of Ward.	Trapped ?	Untrapped ?	
Ward	No. 1	17	11½	13	5	508	Every Ward has some time during the year had full complement of patients, and at one time (March) some were overfilled.	50¼	42½					
	2	17	11½	13	5	508		64½	50¼					
	3	19	17	13	9	466		109½	87½					
	4	19	17	13	9	466		109½	87½					
	5	12	10	13	3	520		51½	44	None	in	any	wards	
	6	12	10	13	3	520		5½	44					
Office	7	17	14¾	13										
		Average number of patients in each ward not being ascertainable, the number of cubic feet for each patient is given when the ward has its full complement.												

(QUESTION II.—Continued.)

(I.) What quantity of water is available for each patient every day?—Quantity available depends greatly on the weather; but, guessing roughly, about 15 gallons is allowed to each patient for all purposes.

What is the source of the water supply?—Rain. Twice a week, weather permitting, such convalescent patients as considered fit are allowed to go to the river to wash.

What is the quality of the water? Good when from tanks; but during the dry season the Hospital tanks ran dry.

(II.) Detail the arrangements as to baths and lavatories?—One large and one hip bath, five washhand basins, and four buckets.

(III.) What is the system of sewerage, and what the condition of the privies?—In ward patients too ill to go out use close-stools; others use the latrines.

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the year 1885.

Specifying the character of the visit in respect to notice.	And stating the official position of the visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a committee of the governing body.
By appointment		Nine.	
Of Surprise	Two.		

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced?—Books produced whenever called for.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination?—From an examination of the notes made by visitors the books appear to have been always made up to date. Only minor errors (i.e., of omission) being complained of.

(III.) State also how many reports of the following kinds have come under the notice of the Governor:

- * (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited.
- (b) Reports by persons charged with the immediate management of the Hospital.
- (c) Reports by a Government Inspector, independent of the governing authority of the Hospital.

* NOTE [Copies of above Reports, if any, to be appended.]

QUESTION IV.

Fill up the following Table of Cases of each kind of Disease treated in the Hospital in the year, with the number of Deaths from each such Disease.

Name of Disease.	No. of Cases.	Deaths.	Name of Disease.	No. of Cases.	Deaths.

„ (Female) 4	16.10	11.5	13	6	407.49	2	28.16	12.37	None	None	None	None	None

(QUESTION II.—Continued.)

(I.) What quantity of water is available for each patient every day ?—*Ad libitum.*

What is the source of the water supply ?—By two underground Tanks.

What is the quality of the water ? Good.

(II.) Detail the arrangements as to baths and lavatories ?—No Bath-room or Lavatories. Baths given in round Tin Baths.

(III.) What is the system of sewerage, and what the condition of the privies ?—Good and Clean.

QUESTION III.

Give the number of visits of inspection paid to the Hospital during the year 1885.

Specifying the character of the visit in respect to notice.	And stating the official position of the visitors.		
	By the Governor or Colonial Secretary.	By a Government Inspector.	By a committee of the governing body.
By appointment	None	None	None
Of Surprise	None	Four by Assistant Protector of Immgrts.	None

(I.) In reference to the above table, state whether or not the Register Books were produced on every occasion; and if not, on how many occasions they were not so produced ?—Produced on every occasion.

(II.) And if on any occasion when they were examined, they were found not to be properly made up to date of examination ?—None.

(III.) State also how many reports of the following kinds have come under the notice of the Governor :

* (a) Reports of a financial and statistical kind, especially such as show the system on which money and store accounts are kept and audited ?—None.

(b) Reports by persons charged with the immediate management of the Hospital ?—None.

(c) Reports by a Government Inspector, independent of the governing authority of the Hospital ?— None.

* NOTE [Copies of above Reports, if any, to be appended.]

QUESTION IV.

Fill up the following Table of Cases of each kind of Disease treated in the Hospital in the year, with the number of Deaths from each such Disease.

Name of Disease.	No. of Cases.	Deaths.	Name of Disease.	No. of Cases.	Deaths.

SPACE AND ACCOMMODATION TABLE.

Description of rooms.	The number of such rooms.	The gross cubic space of all such rooms.	The gross superficial area of all such rooms.	The average amount of cubic space available for each patient.	Average temperature.		The amount of window space.
					Winter.	Summer.	
Dormitories ...	5	46,474	3,313	499	525
Day rooms, and corri- dors used as day rooms }	2	20,890	1,492	224	250
Single rooms ...	18	20,160	1,440	1,120	400

What is the source of the water supply; the quality of the water; and the amount of water available for each patient every day?—Water is laid on from the Town Mains. There is also a Well with force pump; and two Underground Tanks for roof water, capable of containing 17,000 gallons each. The water is of good quality, and, taking the combined sources, there is abundance for all ordinary purposes.

What is the number of (I.) Lavatories?—Three.

(II.) Baths?—Four; three plunge and one shower.

(III.) Latrines?—Three.

What is the system of sewerage?—The solid and greater portion of the liquid excrement is received in wooden tubs and disposed of in the Asylum Garden daily. Cesspools are connected with the Latrines for the reception of urine. The water from the Lavatories is received in covered Tanks and allowed to filter through the soil, and that from the Scullery is carried outside the building in a covered drain.

QUESTION II.—MANAGEMENT.

RESTRAINT.

Restraint.	Seclusion under Lock and Key.	Restraint by Attendants.	Mechanical Restraint.
The number of times resorted to...	65	None.	None.
The number of persons subjected to	22		
The greatest duration of, in any single instance	Part of 18 days.		

In reference to the above table, state:—

I. The authority on which patients are restrained?—On the authority of the Medical Officer.

II. The kinds of mechanical restraint in use?—None.

III. How many cases of cruelty by attendants to patients have been brought to the notice of the proper authority, and what was the result in each case?—None.

IV. The number of cases of injury to patients. (I.) By themselves?—None.

(II.) By other patients?—None.

(III.) By attendants?—None.

OCCUPATION.

The extent of ground?—About 50 acres.

(I.) The airing courts?—None.

Are the patients, as a rule, given daily exercise, their health permitting?—Yes.

Are they confined to airing courts, or allowed to walk in other grounds, and sent beyond the Asylum?—They are not confined to airing courts, but are allowed to walk in the Asylum grounds, and occasionally sent beyond the Asylum.

Are any means taken to amuse the patients, or to induce them to amuse themselves? Detail them. Local and English newspapers and journals are provided. Various games are engaged in from 6 to 9 p.m., *e.g.*, Cards, Draughts, Dominos, &c.

How many religious services were held in 1885?—None.

Give the daily number of Patients who were employed in 1885.

Distinguishing the Sexes.	Specifying the character of the employment.		
	Agriculture and Gardening.	Trade.	Household Work, drawing Water, &c.
Male	38	1	15
Female	7·66

QUESTION III.—DIET.

DIETARY SCALE FOR INMATES, NATAL LUNATIC ASYLUM.

Approved of by C. O. Letter, October 28th, 1870.

EUROPEANS.

Breakfast : 8 ozs. bread, $\frac{1}{2}$ oz. coffee, 1 oz. sugar, $\frac{1}{2}$ oz. butter.

Dinner : 1 lb. potatoes, 12 ozs. meat, 2 ozs. rice, $\frac{1}{2}$ lb. vegetables.

Supper : 8 ozs. bread, $\frac{1}{2}$ oz. coffee, 1 oz. sugar, $\frac{1}{2}$ oz. butter.

KAFIRS.

Breakfast : 12 ozs. meal.

Dinner : { 1 lb. mealies.
Sundays, Wednesdays, and Fridays : 12 ozs. meat, 8 ozs. mealies.

Supper : 8 ozs. bread, 1 pint gruel.

COOLIES.

Breakfast : 12 ozs. meal.

Dinner : { 8 ozs. rice, $\frac{1}{8}$ oz. curry powder.
Sundays, Wednesdays, and Fridays : 12 ozs. meat, 4 ozs. rice.

Supper : 8 ozs. bread, $\frac{1}{2}$ oz. coffee, 1 oz. sugar.

HOTTENTOTS.

Breakfast : 12 ozs. meal, 1 oz. sugar.

Dinner : { 4 ozs. meat, 6 ozs. potatoes, 6 ozs. bread, Sundays, Tuesdays, and Thursdays.
12 ozs. potatoes, 1 oz. vegetables, 1 oz. meal, $\frac{1}{2}$ pint of soup, Mondays, Wednesdays, and [Fridays].
12 ozs. potatoes, 1 pint gruel, Saturdays.

Supper : 6 ozs. bread, $\frac{1}{2}$ oz. coffee, 1 oz. sugar.

One ounce of salt to each inmate daily.

QUESTION IV.—INSPECTION.

Divide the patients in the Asylum into the following classes :—

	Males.	Females.
I. Maniacal and dangerous	47	7
II. Quiet chronic	19	3
III. Melancholy and suicidal	6	3
IV. Idiotic, paralytic, epileptic	5	3

Give the number of visits of inspection paid to the Asylum in 1885.

Distinguishing those visits in which all patients were seen, and every part of the building visited from visits of partial inspection.	And stating the official position of the visitors.							
	By the Colonial Secretary.		By His Excellency the Governor.		By a committee of the governing body.		By an inspectorspecially charged to ascertain the continued lunacy or otherwise of the patients.	
	By appoint-ment.	Of surprise.	By appoint-ment.	Of surprise.	By appoint-ment.	Of surprise.	By appoint-ment.	Of surprise.
1. Complete inspec-tions	...	4	10
2. Partial inspec-tions	1

* State how many Reports of the following kinds have come under the notice of the Governor :—

(I.) Financial and Statistical (showing, amongst other things, on what system the money and Store Accounts are kept and audited) ?—Financial and Statistical Returns made every month, which pass through the offices of the Colonial Secretary, Auditor, and Resident Magistrate.

(II.) Reports by the Person or Persons charged with the immediate Management of the Asylum ?—Twelve.

(III.) Reports by an Official Inspector, independent of the Governing Body of the Asylum ?—None.

GENERAL STATISTICAL TABLE.

Number of Inmates on 1st January, 1885	85
Number admitted during 1885	36
Number discharged during 1885	17
Number died during 1885	9
Escaped during 1885	2
Number of Inmates on 31st December, 1885	93

Append copies of these Reports, if any.

REPORT BY RESIDENT SURGEON, LUNATIC ASYLUM.

In the beginning of the year there were 85 patients in the Asylum, and on the 31st December the number had increased to 93.

The admissions during the year number 36, and of these 30 were males and 6 females. Ten of those admitted were private, and the remainder pauper patients. A large proportion of the cases admitted seemed to have been of considerable duration, which shows a state of matters much to be regretted from a curative point of view.

Some of the admissions were of a type requiring very great care, not only on account of their mental state, but more particularly because of their very weak bodily health.

There were 19 discharges during the year, of these 15 were males and 4 females.

Most of the patients discharged had been resident for a short time only, but one had been an inmate of the Asylum for seven years.

The deaths were 9 in number, 5 males and 4 females. Two of the deaths occurred within a month, and one within two months of the patients' admission to the Asylum, and were the result of conditions which had existed prior to admission.

The total number of patients under treatment during the year was 121, and the general health of the Asylum has been upon the whole good.

The following table shows the Numbers, Nationality, &c., of the patients resident on the 1st January and 31st December, 1885, and of those Admitted, Discharged, and Died, during the year :—

	Resident on 1st January, 1885.			Admitted.			Discharged.			Died.			Remaining on 31st December, 1885.		
	M.	F.	Total.	M.	F.	Total.	M.	F.	Total.	M.	F.	M.	M.	F.	Total.
Europeans ...	31	13	44	10	4	14	7	4	11	3	2	5	31	11	42
Indians ...	11	0	11	4	1	5	2	0	2	0	0	0	13	1	14
Natives ...	26	5	31	16	1	17	6	0	6	2	2	4	33	4	37
Total ...	68	18	86	30	6	36	15	4	19	5	4	9	77	16	93

There is no serious injury to any of the patients to record.

One of the European Male Attendants met with a serious accident, having had his skull fractured by a patient. Fortunately, however, he made a good recovery.

A great deal of attention continues to be paid to the occupation of the patients. Several chronic cases who had for years led a useless and aimless existence have been, after several fruitless attempts, induced to set to work, and this has been followed by a marked improvement, not only in their bodily health, but also in their mental condition. In one case more particularly, an inmate has, from being one of the most repulsive and untidy patients in the place, become quite a reformed character, his habits having not only improved, but whereas previously he could scarcely be got to take any notice of anyone, he is now quite ready to converse, and even to address people of his own accord. This change is, I feel convinced, almost wholly due to his having been prevailed upon to engage in useful work.

The planting and laying out of the grounds provides occupation for a great number of the patients.

The improvements in the building, in the way of painting and decorating, are still being prosecuted, and the increased cheerfulness in the appearance of the rooms, &c., cannot fail to be more or less reflected in the state of mind of the patients.

A large room formerly occupied by the Native servants has been converted into a Reading and Recreation Room, and has been not only tastefully decorated, but substantially and elegantly furnished. The furniture, consisting of Reading, Writing, and Card Tables, Settees, &c, having been designed and made by one of the patients; by whom also most of the decoration was done.

Those patients who care to do so meet here and read, or engage in games from 6 till 9 o'clock in the evening, in place of going to their rooms at 6 o'clock, as was the custom previously, and several of them seem to appreciate the change very much. If it were possible to secure the services of a Clergyman to conduct religious exercises on Sundays, this room might also be used as a Chapel.

Additional accommodation is urgently needed, and I am afraid the requirements in this respect will only be temporarily met by building a house for the Steward, which, however, I am glad to notice has been decided on.

I think more ought to be done in the way of providing suitable accommodation for the better class of private patients, as I am convinced in such cases the chances of recovery are too often interfered with, or altogether destroyed, by mistaken kindness on the part of relatives, whose aversion to placing their friends in the Asylum is greatly increased by the want of such accommodation as they would approve of.

The water supply has been greatly improved by the laying on of the pipes from the Corporation Main. The pressure at times is fairly good, but occasionally it is insufficient to raise the water to the Asylum—more particularly is this the case during dry weather, and is, I presume, to be accounted for by a greater consumption of water in town at such times.

There are various additions and alterations which should be made to the Institution as soon as possible; among these might be mentioned a Mortuary, Airing Courts, and a large general Bath.

It is with considerable reluctance that I recommend the establishment of Airing Courts; but taking into consideration the class of patients to be dealt with, and the absence of any enclosing wall, I consider some such arrangement necessary for the safety and well-being of the inmates.

There appears to be considerable difficulty in securing the services of reliable Female Attendants, and I am afraid it will become a question for consideration as to whether it would be advisable to have one appointed from England.

I should like to direct attention to a very important omission in the Rules for the government of the Asylum, viz.: a Rule empowering the Medical Officer to inflict a fine, in cases of neglect of duty, &c., by the Kafir Attendants. In many of the Home Asylums European Attendants are subject to fines for such offences, and the system is found to work well. There is at present, I understand, a difficulty in the way of granting the Medical Officer power to levy fines, but I do not suppose it is insuperable, and I consider it would materially add to the efficiency of the Attendants if they knew he possessed such power.

The amount received from Private Patients during the year—£495 13s.—is slightly in excess of that earned during 1884.

JAMES HYSLOP, M.B., &c.
